Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas - Also Maryland, New Jersey and Delaware

VOL. 23 No. 33 | Lancaster Farming, Saturday, June 17, 1978 | $6.00 Per Year

Ken Sechrist and Leroy Bowles celled in poultry judging, placing st and third, respectively. Both are m Red Lion Area High School.

The first-place FFA dairy cattle juding team for 1978 comes from the Oley Valley Chapter. Wendy Shaw led the trio. Her brother, Steve, left, and Scott Hauseman were also on the team.

Sandy Weaver and Barbara Herr of Garden Spot High School placed third and sixth, respectively, in the land judging contest.

State FFA contests held

By DIETER KRIEG

UNIVERSITY PARK – Future Farmers of America from all over Pennsylvania exhibited their talents and skills here on Tuesday, Wednesday and Thursday. The event was State FFA Activities Week, a competitive and colorful gathering of blue-jacketed vocational agriculture students. Penn State University hosts the annual extravaganza, sponsored jointly by the College of Agriculture's Department of Education and the Pennsylvania Department of Education, Harrisburg.

More than 2000 students, advisors and guests participated in the 3-day affair. Among them were more than 400 girls. That's significant since girls weren't admitted into the FFA until just a few years ago. At the 1977 FFA Activities Week, 351 girls took part in the ceremonies and contests.

The major events for the more than 1600 participating students included 23 state contests, the selection of officers, and the crowning of a new Pennsylvania FFA Queen.

The lucky young lady who won that coveted honor for 1978-79 is Allyson Fleck of Hollidaysburg, Blair County. Runnerup was Cheryl Byers of Crawford County Vo-Tech and Miss Congeniality was Chris Heaney of the Folcroft

Senate Bill 522 gets mixed reactions

By KENDACE BORRY

HARRISBURG -- Pa. Senate Bill 522, which in one aspect deals with land that the Pa. Dept. of Transportation had decided to sell since it is not needed for roads no longer planned, has just passed the Pa. House of Representatives at the beginning of this week, according to Noah Wenger, Representative. But, the bill left the House in considerable changed form.

According to Wenger, the Bill now basically deals with the disposal of land that orginally had been purchased by the state to build roads. Now these roads are no longer on the planning stage, and PennDot is looking for a way to settle what is the be done with the land.

"When the bill came into the House," Wenger explained, "the main thrust of the bill dealt with fee-simple legislation, which would give PennDot the authority to buy whole properties rather than just take possession of the right of way needed for roads. There have been considerable changes in the bill."

Wenger further stated that the House put amendments on the Bill so that now it deals mainly with the selling of formerly-purchased land.

Shop around for lower fertilizer prices

By JOANNE SPAHR

LITITZ – If you are going to need fertilizer in the upcoming weeks, it might pay to shop around. According to several fertilizer blenders in Lancaster Farming's coverage area, the cost of various raw materials has dropped due to suppliers' backlogs. And, in some cases, these price reductions to blenders will be passed along to customers.

In some companies prices had already been lowered as of June 1 and, with other fertilizer blenders reductions began this week. Still other blenders, however, report that they are not aware of the cost-change, and that their prices will remain steady.

"There's no secret about this drop in raw materials," says one competitive fertilizer blender. "If you read the trade journals, you can find it in there."

That particular blender offered a five per cent reduction on all farm fertilizer.

Another company noted that farmers should see an $8 to $12 per ton downward change in top dressing grades. This company also noted that there was some decrease in nitrogen.

Thursday, June 15, 1978
HOGS: 1000 - Barrows & gilts fairly active, under 240 lb. opening 25-50 higher, over 240 lb. not established.
Early sales US 1-3 200-240 lb. 50.00-50.50. Sows: Slow, steady to weak in very limited test. US 1-3 Few 300-400 lb. 42.00-43.00; Few 400-600 lb. 43.00-44.00.

Omaha Cattle

Thursday, June 15, 1978
Compared with the previous week's close through midweek, prices on slaughter steers were 1.75-2.25 lower and heifers were .75-1.50 lower. Late supplies were not sufficient to reflect the full bearishness of the situation; a few closing sales both classes 3.00-3.50 off. Cows closed .50-1.00 higher and bulls steady.

Four day receipts 15,500 as compared 14,700 previous week and 19,300 a year ago. Fed cattle prices showed some mild strength on the initial session but prices turned sharply downard on later sessions in reflection of a dull carcass trade despite the reduced rate of slaughter. Several slaughterers curtailed hours because of the poor movement of the finished product, and all buying interests took a firm stand to bring live costs in line and carcass realizations. The situation was further aggravated by another poor distribution of supplies over the trading period. Much of the supply was purchased for slaughter for points outside the immediate Omaha area. The overall finish of the steer supply was fairly attractive with a rather liberal percentage of choice and several loads choice and prime; much of the heifer supply was good to average-choice. Steers made up approximately 49 per cent and heifers 30 per cent. Cows comprised 10 per cent and feeders 6 per cent.

STEERS: On Monday, five loads choice and prime 3-4 1214-1470 lbs. 60.50-61.00. At midweek, load same grade 3-4 1214 lbs. 58.75, two loads 1229 lbs. 58.25. Choice 2-4 975-1345 lbs. late 56.50-58.00, two loads 3 1175 lbs. 58.25. Mixed good and choice 2-3 950-1250 lbs. 55.00-57.00. Good 2-3 51.50-55.00. Small lots standard and good 2-3 47.50-49.00.

Average of LS-214, detailed quotations, for choice 900-1100 lb. steers this week 57.75; choice 1100-1300 lbs. 58.15. Average weight steers this week 1157 lbs. as compared 1139 lbs. previous week. Average weight heifers this week 989 lbs. as compared 976 lbs. previous week.

HEIFERS: Early, load and part load choice and prime 3-4 1027-1043 lbs. 58.00-58.50. In midweek trade, two loads choice predominately 3 1168 lbs. 57.00, bulk choice 54.50-56.50. Mixed good and choice 2-3 850-1000 lbs. 53.00-54.50. Good 2-3 47.00-52.50.

COWS: Utility and commercial 2-4 37.00-39.50. Cutter 35.00-37.00, Canner and low cutter 32.50-35.00.

BULLS: 1-2 1300-2000 lbs. 45.00-49.00, individual 1 49.50-50.00.

Peoria Hogs

Thursday, June 15, 1978
HOGS: 2000 - Barrows & gilts slow, opening fully steady on weights under 240 lb. US 1-2 200-230 lb. 50.50-51.00; US 1-3 200-230 lb. 50.00-50.50.
Sows: 50-1.50 lower. US 1-3 350-500 lb. 41.50-42.50; 500-650 lb. 42.50-43.00.

Lancaster Grain

Friday, June 16, 1978
These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Friday, June 16 are as follows:

	Bid+	Offered+
Ear Corn	69.25	80.00
Shelled Corn	2.76	2.98
Barley	1.94	2.15
Oats		
Local	1.51	1.87
Western	1.82	2.03
Wheat	2.99	2.90
Soybeans	5.97	——
Soybean Meal		221.00

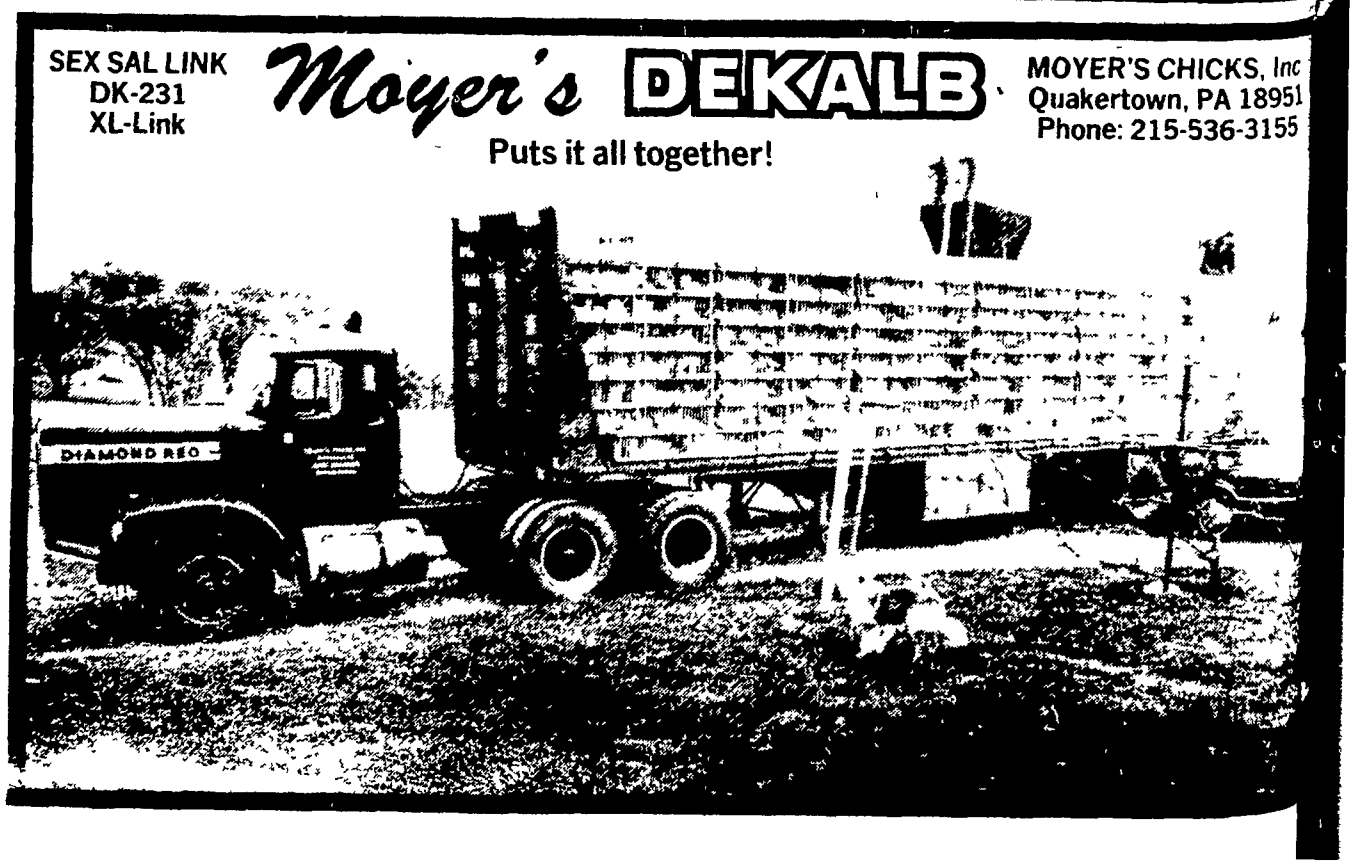
Puts it all together!

MOYER'S CHICKS, Inc
Quakertown, PA 18951
Phone: 215-536-3155



From chick to cage, we formulate feeds and feeding programs with your profit in mind.

Do you have an open mind?

Are you ready to devote an hour or two of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop *custom* feeding programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. The health and overall condition of your birds. Whether you grow chicks or buy started pullets. The type of equipment you use. The production potential of your flock. Your management practices. And other factors that have an effect on your profit potential.

With the aid of computers, we then design a feeding program specifically tailored to *your* birds needs—a program that can improve your profits by reducing expenses, increasing production, or both.

For example, when we recommended producers switch from a competitive 18% protein feed to an optimum-nutrient density Pennfield feed, there was no loss in production—and this one recommendation has saved as much as $12,000 a year depending on flock size.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us. Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll free 800-732-0467.

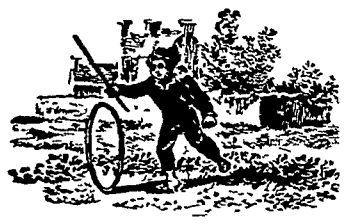
THE OLD FARMER'S ALMANAC

JUNE 19-25, 1978

June is really here, and life is dear.

Summer begins June 21 at 1 10 PM EST Bernard Baruch died June 20, 1965 Full moon June 20 Very high tides on the 23rd and 24th . Average length of days for the week, 15 hours, 17 minutes

Tobruk fell to Rommel June 19, 1942 *Scatter with one hand, gather with two*



Ask the Old Farmer: One of my mother's expressions was, "He doesn't know any more than Adam's off-ox" Never could figure out what it was all about Can you help me? E J , Fitchburg, Mass

An off-ox was never supposed to be as intelligent as the near one — never mind who owned him

Home Hints: Oven cleaner really whitens whitewall tires

OLD FARMER'S WEATHER FORECASTS

New England: First of week partly sunny and warm, cold and stormy with heavy rain for end of week

Greater New York-New Jersey: Sunny and hot with scattered showers, end of week mild with frequent showers

Middle Atlantic Coastal: Sunny and hot with light showers, weekend rainy and cooler

Piedmont & Southeast Coastal: Seasonal to hot with scattered showers all week

Florida: Sunny and hot to midweek, then heavy rain, scattered showers in the north

Upstate N.Y.-Toronto & Montreal: Mostly sunny to start, then seasonal and showery at midweek, turning rainy and very cool for weekend

Greater Ohio Valley: Sunny, hot east, few showers, rainy and cool last part of week

Deep South: Rain likely all week

Chicago & Southern Great Lakes: Clearing and seasonal to start, end of week very cool and rainy

Northern Great Plains-Great Lakes: Seasonal with a few showers turning cold with showers over weekend

Central Great Plains: Sunny, hot northwest to start, then rainy, except west, at midweek, mild with scattered showers at week's end

Texas-Oklahoma: Rainy and very cool, then sunny and cool, may rain by Sunday

Rocky Mountain: Cloudier, cool with rain north to midweek, sunny with showers northwest and east through weekend

Southwest Desert: Partly cloudy and hot, end of week clear and hot

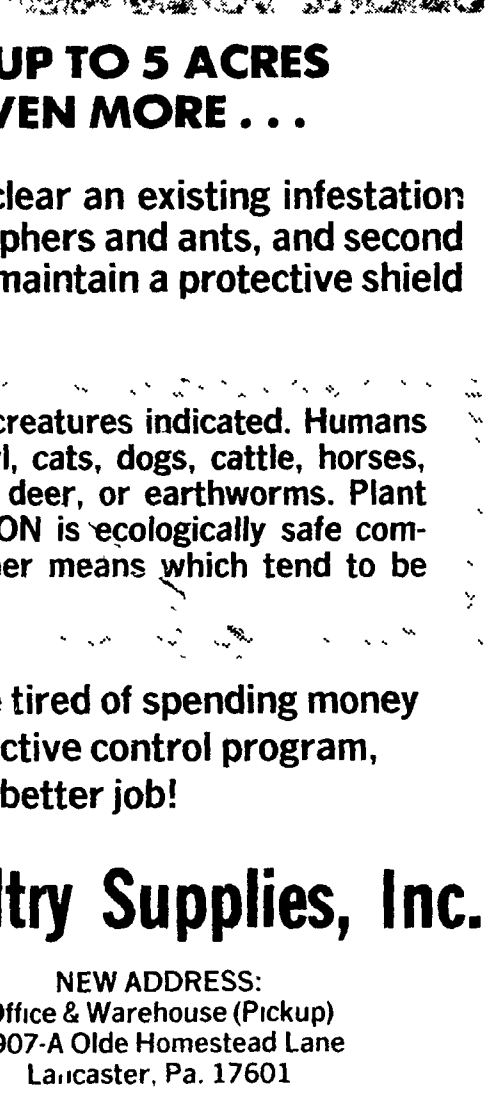
ERGON
PEST CONTROL
SYSTEM
For
Electro-Magnetic Pest Control



ERGON is designed to control the problems caused by rodents and other pests wherever infestation occurs. ERGON controls buildings, residences and field acreage.

ERGON WILL CONTROL UP TO 5 ACRES
AND IN SOME CASES EVEN MORE . . .

The function of ERGON is first to help clear an existing infestation of unwanted pests such as rats, mice, gophers and ants, and second to establish lasting control; and third to maintain a protective shield to prevent future infestation.

ERGON will affect only the habitats of the creatures indicated. Humans are not affected, nor are any domestic fowl, cats, dogs, cattle, horses, sheep, goats, pigs, ducks, pheasant, quail, deer, or earthworms. Plant and vegetable life is also unaffected. ERGON is ecologically safe compared to the use of poisons, gases, or other means which tend to be harmful to the environment.

★ If you have a pest problem and are tired of spending money or effort on a continuous and ineffective control program, ERGON will do a much better job!

EDITORIAL COMMENTS By DIETER KRIEG, EDITOR

PFA survey shoots cholesterol theory

Farmers who have been insisting that eating meat, eggs, and dairy products are good for you now have an additional bit of ammunition at their fingertips, thanks to a study conducted by the Pennsylvania Farmers Association.

The bottom line of the survey adds weight to the growing theory that physical lifestyles are more closely linked to good health than whether or not you eat eggs, meat, and dairy products.

The PFA report noted that out of 3578 health program participants, only 45 showed sign of cholesterol abnormalities Since farmers are traditionally big consumers of the foods which are often blamed for causing cholesterol problems, the PFA study is a two-pronged document towards dispelling the idea that eggs, meat and dairy products are bad for you, while strengthening the thought that physcial exercise is very important.

The study grew out of a health program which was initiated by the PFA Women's Committee A mobile health van traveled to 39 County Farmers Associations and invited farmers to come in for physical checkups.

Of the 3578 individuals who were examined, 50 were children under the age of 16 The average age was 49.

LIFE on the farm

My father could have entered any one of a number of professions. Gifted with both physical and mental powers, his opportunities were broad. During his younger years he was a star athlete, excelling in track and field events, soccer, and boxing. In fact, he was never defeated in amateur heavyweight bouts. He played soccer until age 40 and threw the discus to distances which rivaled tosses seen at the 1936 Olympics in Berlin.

My father's interest and involvement in sports undoubtedly could have led to a career, had he wanted it that way.

Another one of my father's interests some 40-50 years ago was aviation. He had top grades in school and had dreams of perhaps becoming an aeronautical engineer There's no doubt he could have entered that field successfully, because even though I have never seen his report cards, I've seen his mind at work. He can figure mathematical problems faster in his head than many other people can use calculators. But despite his abilities and the promises that were evident in aviation, my father chose to keep that door closed too

Instead, he went on to attend an agricultural school where he graduated with the highest honors ever bestowed on a student at that institution. His chosen career was farming, specifically dairy cattle breeding and management.

Rather than work and live in the limelight as an athlete, my father elected to work in a cow stable Instead of a challenging and rewarding career at the nearby Heinkel aircraft works, he chose a profession which most people roll their noses up at.

In the years that followed I have seen my father pitch manure for hours without ever showing signs of fatigue. Some folks may quit working at 5 p.m. and others when they're tired, but my father always kept going until the work was done.

I've seen him uncover a cesspool and think nothing of it. A tight money situation meant that if the job was to be done, we had to do it ourselves. Anyone will take a pleasant job, and most people will go for the jobs that pay well, but only a few will take on a chore such as emptying a cesspool with old grease buckets

For a couple years, my father got up every morning at 2:30 a.m By 3 o'clock he'd be milking as many as 106 cows by himself. Not too many folks would subject themselves to such demanding schedules When there was hay to haul, only milking time could be counted upon as a sure break in the routine. The air in the mow would get almost unbearably hot, and the sweat would roll, but the bales kept coming and coming Dad was in his fifties but he worked as though he was half that age

One Spring we cleared about a 5-acre section of land for pasture It had grown wild over the years and was the kind of place in which the cows liked to hide at calving time Most people would have taken a heavy-duty rotary mower into a place like that, but we didn't have one and couldn't afford one Dad led the way with an ax and saw Many people would have staggered just at the sight of that enormous task, but my

NOW IS THE TIME By Max Smith, Lancaster County Agricultural Agent Phone 394-6851

TO HANDLE GASOLINE AND DIESEL FUEL WITH RESPECT

We use a lot of gasoline and diesel fuels on our farms and when they are not handled properly, they are a source of unwanted fires.

Gasoline should be stored in an underground tank. When it is necessary to store it above ground, then the tank should be located at least 40 feet away from any building. Small amounts can be stored in approved safety cans. Be sure to label all cans plainly so there is no danger of a mix-up.

Gasoline and diesel fuel must be kept away from flames or heat. Strictly enforce no smoking rules. Always refuel outdoors where vapors cannot accumulate. If you spill some fuel, wipe it up before starting a motor.

Storing gasoline or diesel fuel in glass jugs or bottles is inviting trouble. It is also dangerous to use them to start burning trash, leaves, barbecue pits or stoves. Gasoline should not be used as a cleaning or degreasing agent.

TO CHECK PASTURES FOLLOWING A STORM

The season for storms and high winds will be with us throughout the summer. These conditions often break tree branches and leave them in your pasture fields. If you have any wild cherry or choke cherry branches lying in your pasture fields, be sure to remove them before allowing any livestock in the field. When these leaves are damaged by broken limbs, they wilt down and a poisonous substance is formed within the leaves. A handful of these wilted leaves can kill a cow or several sheep if eaten. Death occurs very quickly because the poison interferes with the oxygen carrying ability of the blood. Treatment is possible, but the animals are usually found dead in the field. The only way t

TURNING THE TABLES

Lesson for June 18, 1978

Background Scripture:
Acts 16.
Devotional Reading:
Luke 8:4-15.

Did it ever strike you that much of the Book of Acts is set inside jails?

In Acts 5 the high priest, jealous of their success, imprisons some of the apostles. Of course that night an angel came and freed the apostles and sent them back to the city to continue their public work. In Acts 8 we are told that Saul dragged off to prison some of the followers of Jesus. In Acts 12 Herod has Peter thrown in jail, but with the help of another angel Peter escapes and his jailers are executed by the enraged Herod. In Acts 22-26 we find Paul in prisons in both Jerusalem and Caesarea, scenes of some of his most significant confrontations with the civil authorities. And Acts closes with Paul under house arrest in Rome.

Praying and Singing

There is one other prison incident in Acts. 16. When Paul exorcises a demon from a young woman whose madness is being exploited, a riot ensues and after they are severely beaten, Paul and Silas are thrown in jail. One would expect that these two men would feel a deep sense of dispair over their plight. But Christians in those days exhibited rather strange behaviour when they were in jail. Thrown into Herod's prison, you will remember, Peter slept, although his life was surely in danger. Now at Philippi we find Paul and Silas "praying and singing hymns to God" (16:25). And it is interesting to note that "the prisoners were listening to them."

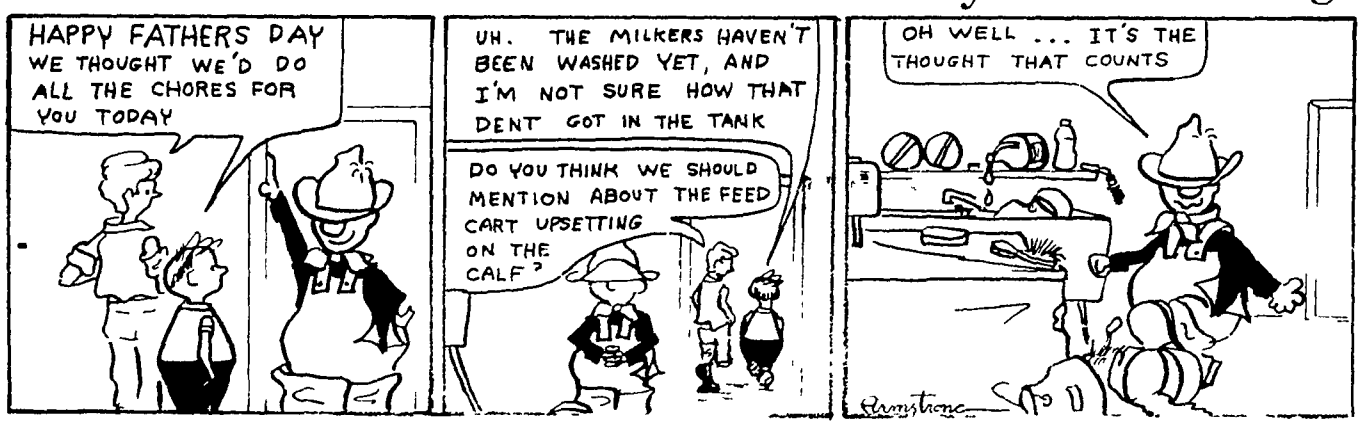
One or more angels had figured prominently in some previous escapes from jail by apostles. This time, however, it was to be an earthquake that would open the prison doors. (What chance does a mere persecutor have when God has angels and earthquakes at his disposal!).

What Must I Do?

It is not just an earthquake that is important in this story, however, but something else. When the earthquake rips open the prison, the jailkeeper, knowing that he will be tortured and killed if his prisoners escape, decides to take his own life. All is lost, it seems. But out of the darkness there comes this reassurance from Paul: "Do not harm yourself for we are all here." Although the prison doors stand wide open, Paul and Silas are not going to escape.

Why not? One cannot help but conclude that they decide to remain out of concern for the jailor. They know what fate lies before him if they escape. So Paul communicates to the jailor a loving concern that is probably as amazing to the jailor as the sheer force of the earthquake. Here are two men who care about him, who are willing to sacrifice their freedom for him. No wonder he turns and asks that important question: "Men, what what must I do to be saved?" Once again God has turned the tables to reach a man's heart.

Rural Route By Tom Armstrong



HAPPY FATHERS DAY
WE THOUGHT WE'D DO ALL THE CHORES FOR YOU TODAY
UH. THE MILKERS HAVEN'T BEEN WASHED YET, AND I'M NOT SURE HOW THAT DENT GOT IN THE TANK
DO YOU THINK WE SHOULD MENTION ABOUT THE FEED CART UPSETTING ON THE CALF?
OH WELL ... IT'S THE THOUGHT THAT COUNTS

While some companies look for ways to build bins cheaper, we find ways to build bins *better*. Bins that will last longer, look nicer and protect grain better.

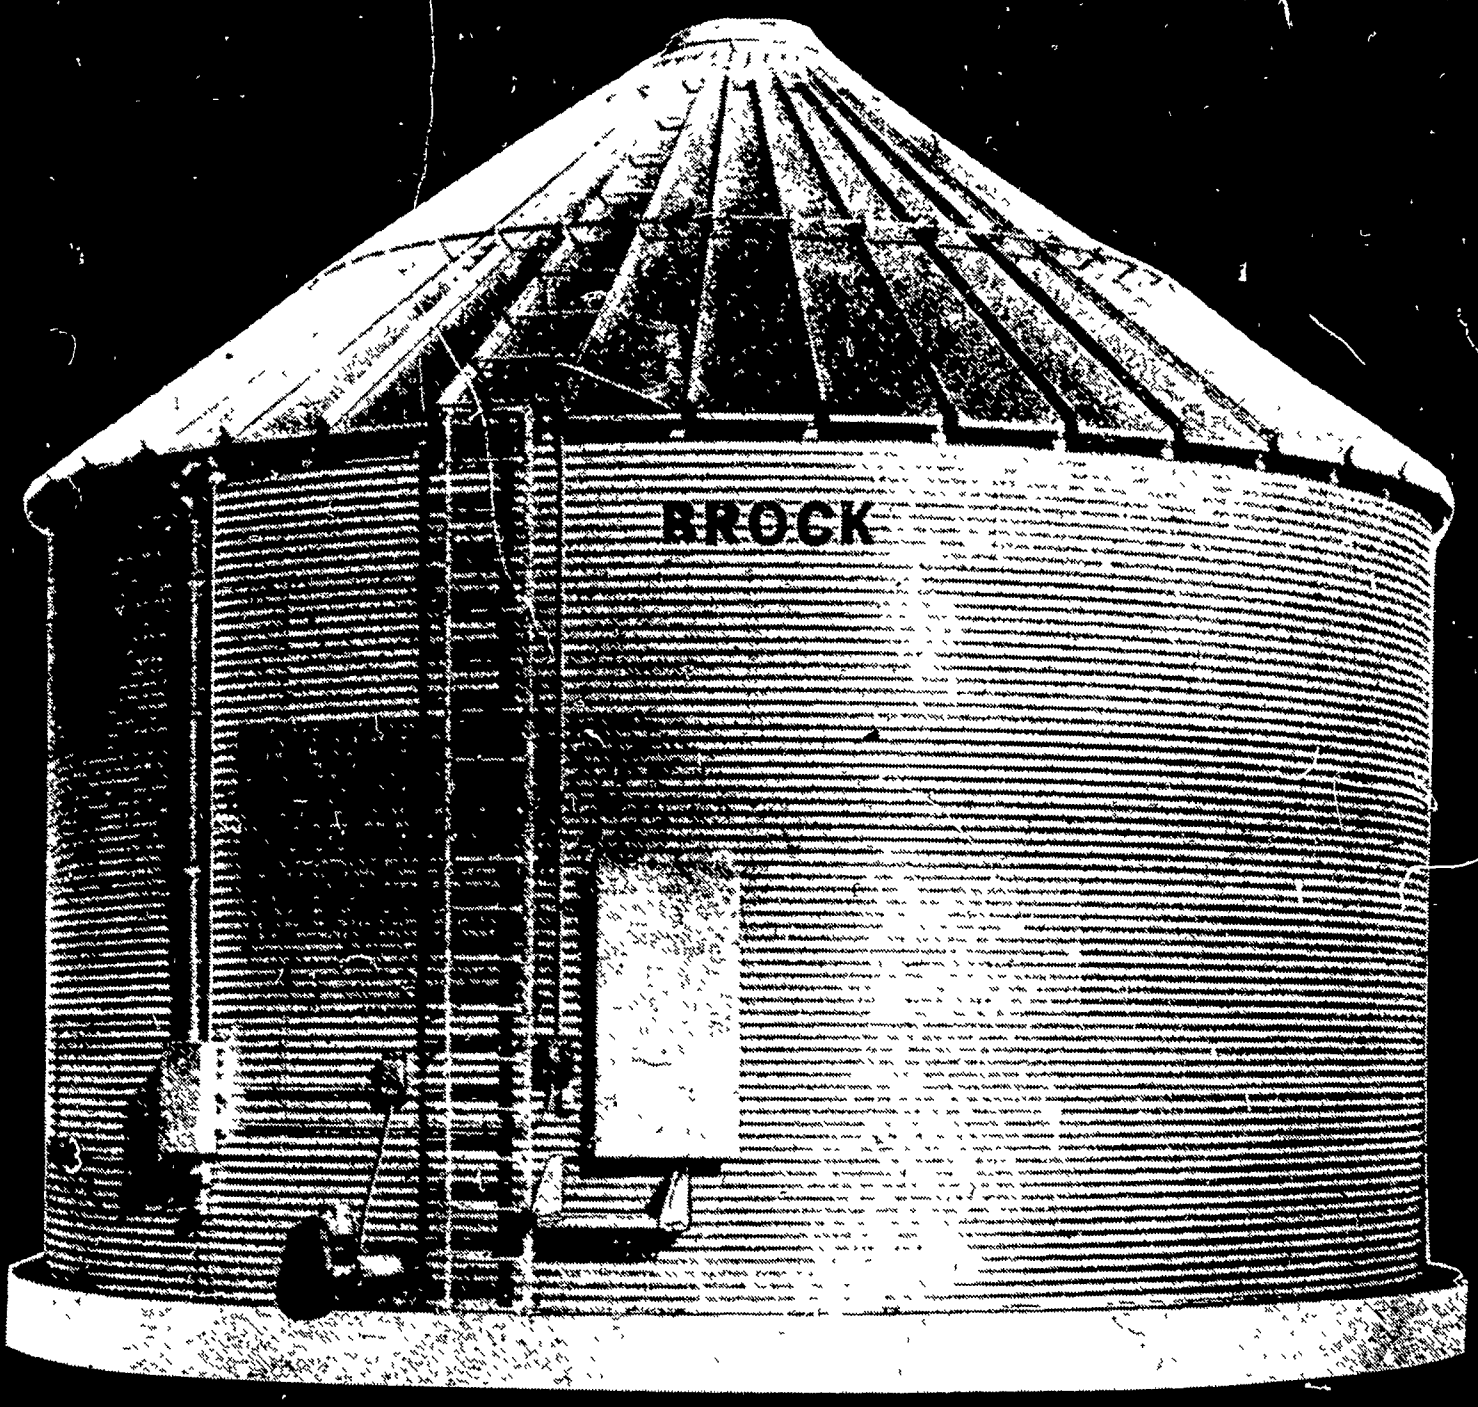
That's why we use only prime high-tensile steel. And precision form and punch each piece.

No, we won't cut corners. Because in the long run, cutting corners would just cost you more money.

For more information about all our money-saving design features, just write for a copy of our latest catalog.

BROCK Hershey Equipment Company, Inc.

There are 10 ways we could cut our price. Any one of them will cost you.



- ☐ Reduce the 40-inch fill hole width to 24 inches.
- ☐ Eliminate the exclusive fill hole collar seal.
- ☐ Eliminate the circle of safety steps.
- ☐ Eliminate the adjustable roof stiffner ring.
- ☐ Eliminate 3-inch high roof ribs.
- ☐ Make the roof pitch less than 35 degrees.
- ☐ Eliminate the safety handrail by the manhole.
- ☐ Eliminate the tab between each rafter.
- ☐ Switch to a lighter gauge steel sidewall.
- ☐ Use lower grade bin bolts and washers.

Peoria, Illinois
June 15, 1978

CATTLE: Estimated receipts this week 4900; last week 4250 and last year 5979.

Slaughter Steers through mid-week 1.00-1.50 lower on Choice and few loads High Choice and Prime; Standard and Good 50-1.00 lower. Heifers at mid-week 50 to mostly 1.00 lower, most decline on Choice and Prime. Cows and Bulls steady. Trading on Monday was stronger but the liberal Wednesday run made for slow trading and prices were sharply lower. Slaughter Steer and Heifer supply mostly high Good and Choice on both Monday and Wednesday. Heifer supply up to 40 on Wednesday and about 30 for the week.

SLAUGHTER STEERS: Few loads Mixed Choice & Prime 3-4, 1025-1300 lbs. mostly 58.50-60.00, but 59.50 down on Wednesday; few 1155-1200 lbs. Monday, 60.25-60.50; Wednesday load 4-5, 1321 lbs. 57.00. Choice 2-4, 1000-1325 lbs. late 57.00-58.50, few 950-1000 lbs. 56.50; on Monday mostly 58.50-59.50. Mixed Good and Choice 2-4, 950-1150 lbs. 55.00-57.00 late. Good 2-3, 900-1150 lbs. 52.00-56.00. Few Good and Choice 2-3, 1100-1350 lb. Holsteins 51.00-52.00, some Monday to 54.00.

SLAUGHTER HEIFERS: Few loads Mixed Choice and Prime 3-4, 900-1025 lbs. 57.00-58.50, part load 58.75; Wednesday 57.00-57.25. Choice 2-4, 850-1000 lbs. late 55.00-57.25. Mixed Good and Choice 2-4, 750-1000 lbs. 53.50-55.50. Good 48.00-53.00.

COWS: Utility and Commercial 1-3, 36.50-39.50, few High Dressing Utility 1-2, 40.00-41.00. Cutter 1-2, 33.50-36.50. Canner 30.00-33.50.

BULLS: Yield Grade 1-2, 1100-1700 lbs. 41.00-49.00, individual 2045 lbs. 51.00.

NBMA defined as not a co-op

WASHINGTON, D.C. – John W. Scott, Master of the nation's oldest farm organization, the National Grange, hailed the 7-2 decision of the Supreme Court as a "victory for farmers and their cooperatives."

The National Broiler Marketing Association during the last five years or more has claimed they are exempt from ani-trust action because of the Capper-Volstead Act which shields co-ops from anit-trust attack. The question became in NBMA a true co-op as defined under the Capper-Volstead Act?

The district court ruled that NBMA's members qualified for the exemption because they were engaged in the production of agricultural products. However, the U.S. Court of appeals for the Fifth Circuit reversed that decision stating that farming means "either husbandry of animals or crops or farm ownership."

The U.S. Supreme Court on June 12 ruled that exemption from Sherman Act liability is not available to a cooperative poultry marketing association in which there is even a single member outside the orbit of protection provided by the Capper-Volstead Act. Justice Harry Blackmun, in issuing the ruling, said, "Clearly, Congress did not intent to extend the benefits of the (Capper-Volstead) Act to the processors and packers to whom farmers sold their goods, even when the relationship was such that the processor and packer bore a part of the risk."

Scott said, "The Capper-Volstead Act was enacted by Congress to allow farmers to join together in cooperatives, thereby bolstering their market strength and improving their ability to survive adverse economic periods. We are pleased that the Supreme Court recognizes the clear distinction between a farmer and an integrator who is not by definition a farmer."

In conclusion the Court said any NBMA member "who owns neither a breeder flock nor a hatchery and that maintains no grow-out facility at which the flocks to which it holds title are raised, is not among those Congress intended to protect by enacting the Capper-Volstead Act."

HEIFERS — STOCK BULLS

State FFA contest

(Continued from Page 1)

Vo-Tech in Delaware County.

In the competitive events, FFA chapters from southeastern Pennsylvania dominated. The Cloister Chapter from Ephrata was clearly out in front again this year when the number of gold medals were counted. They picked up 11 gold medals, nearly twice as many as their closest rival, the Solanco Chapter from southern Lancaster County. Both schools are perennial powerhouses in FFA competition. A year ago both schools won nine gold medals.

Solanco, with seven gold medals, was followed by Penn Manor and Red Lion, each with five golds. The Oxford Chapter in Chester County had four golds.

Some impressive victories were scored by individuals and chapters from southeastern Pennsylvania.

One young man who brought distinguished honors to Solanco was Sam Long. He placed first out of 149 students in the livestock judging contest. He is the son of Mr. and Mrs. Sam Long, Peach Bottom.

Another one of Solanco's big winners was Axel Linde, son of Mr. and Mrs. K.D. Linde, Oxford R1. He won his gold in the farm management contest.

Ephrata's dairy foods judging team made a clean sweep in that contest. Placing 1,2,3, respectively, were Fred Burkett, Galen Hurst, and Marvin Fox. More gold came to the Cloister Chapter when Tim Gockley steered his way to a second place in the Safe Tractor Operation Contest. The run for gold continued. Curtis Snavely and Randy Bucher earned one in the Agricultural Mechanics Contest, John Zimmerman placed first in dairy showmanship, Ronald Good won the Small Gasoline Engine Contest, and Larry Burkholder saw the gold in the dairy cattle judging event.

Red Lion excelled in poultry and agronomy contests, picking up three of its five gold medals in those events. The others were earned in dairy and livestock judging events.

Penn Manor's contestants brought in the gold after impressive placings in meats, land, dairy cattle, and livestock judging. Wayne placed second out of 149 in the latter contest, while James Harnish followed in eighth place.

Garden Spot High School got its three gold medals on the strength of efforts by Maxine Messner in public speaking, and Sandy Weaver and Barbara Herr in land judging.

The Oxford Chapter earned gold twice in the dairy cattle judging contest, thanks to Barry Hostetter who placed seventh out of 215 and Ed Breckbill, 11th. The team was third in the state. The third member was Alan Mason. More gold came in livestock judging, thanks to David Wylie placing seventh among the 149 competitors. The fourth top medal was won by Renee McCardell in the interview contest.

The most popular event, dairy cattle judging, was won by Tim Peachey of Huntingdon County. Kress Simpson of Mansfield was second, followed by Solanco's Tom Kirk, Kennard-Dale's James Knight, and Cedar Crest's Roy Shirk. In sixth place was Wendy Shaw from the Oley Valley Chapter in Berks County. She paced the trio which went on to win the team title. The others on the team were her brother Steve, and Scott Hausemann.

Continuing with the individual placings in the dairy judging contest, Barry Hostetter of Oxford was seventh, 8. Allen Kretzing of West Perry; 9. Nelson Breneman, Penn Manor; 10. Brad Hershey, Octorara; 11. Ed Breckbill, Oxford; 12. Duane Hershey, Octorara; 13. Edward Kulp, O.J. Roberts; 14. Lisa Shirey, West Snyder; 15. Cathy Arnold, Red Lion; 16. Duane Yoder, Rockwood; and 11. Larry Burkholder, Ephrata. All of the above received gold medals.

In team scoring, it was 1. Oley Valley, 2. Mansfield (members Kress Simpson, Glenda Brewer, and Jun[illegible] Sweely) 3. Oxford, 4 Red Lion (members Cathy Ar[illegible]nold, Patty Greek, and Abb[illegible] Johnson), 5. Octoran[illegible] (members Brad and Duan[illegible] Hershey and Ivan Yost) 6 Solanco (Tom Kirk, Don[illegible] Hershberger and Tim[illegible] Bucher) 7. Huntingdon (Tim[illegible] Peachey, Rick Houp, an[illegible] Kevin Long), 8. O.J. Robert[illegible] (Ed Kulp, Chester Soltys[illegible]

(Turn to Page 16)

The Oxford FFA Chapter's dairy cattle judging team, consisting of Barry Hostetter, Ed Breckbill, and Alan Mason, won third place in the state during FFA Activities Week.

Duane Richard, West Perry; 56. Scott Hauseman, Oley Valley; 57. Ed Whitesell, Bedford; 58. Teresa England, Williamsburg; 59. Larry Miccicki, Hamburg.

LAND JUDGING

There were 173 students entered in this contest, with the first 15 receiving gold

(Turn to Page 20)

The top four FFA land judges in Pennsylvania are, left to right, Gerald Derosiers, Blue Mountain High School; Neil Leffler, Upper Dauphin; Marty Clouse, Central High; and Sandy Weaver of Garden Spot. Marty and Sandy were tied for third place.

FUEL OIL HEAT

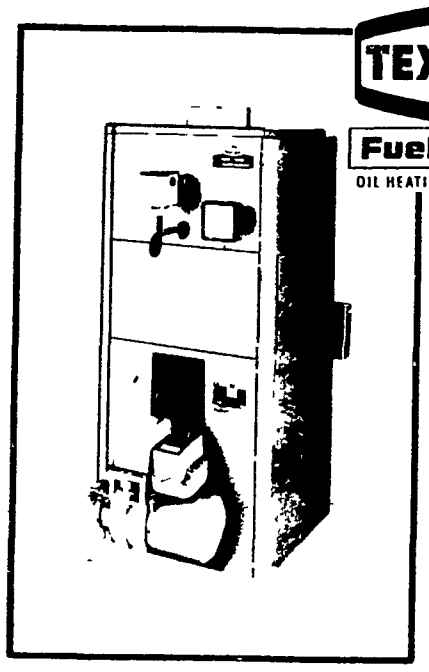
The modern design of the "FC-13" Series Texaco Fuel Chief Wet Base Boiler-Burner Unit features waterbacked heat-transfer surfaces on all sides and bottom to provide maximum heat absorption for greater fuel savings. Integrally cast fins staggered to increase the travel of hot gases in flue passages — prevent loss of otherwise wasted heat. Installation time is reduced to a minimum.

The entire unit is only 20" wide. Exterior is finished in attractive baked-on, decorator-approved colors. Features the dependable, economical Texaco Model TFR Fuel Chief High Speed Flame Retention Oil Burner with non-adjustable stainless steel firing head.

The "FC-13" Series Texaco Fuel Chief Wet Base Boiler-Burner Unit has been manufactured to furnish home-heating at its most comfortable-best!

FEATURES WHICH ASSURE RELIABILITY AND ECONOMY

- **FLUSH CABINET** — beautifully finished in green Hammertone Extension which completely encloses burner—optional
- **INSULATION**—Fiberglass blanket retains heat within boiler keeps jacket cool
- **WET BASE CONSTRUCTION** — bottom sides top and rear of fire chamber are completely surrounded by water backed cast iron sections to assure maximum absorption
- **COMBUSTION CHAMBER**—Ceramic fiber light weight one piece—molded unit is factory installed eliminates assembly of heavy fragile refractory materials
- **BUILT-IN WATER HEATER**—copper coil located at hottest point to assure ample hot water for house hold use the year round
- **HEAT FINS** — retard upward flow of hot gases for greater fuel economy



- **FUEL CHIEF HIGH PRESSURE OIL BURNER** — featuring the Texaco Fuel Chief High Speed Flame Retention design with non adjustable stainless steel firing head

LIFE

(Continued from Page 10)

father never gave a thought to perhaps not doing it.

Whether it was pounding a sledge hammer to break concrete where a new silo was to be erected, or giving artificial respiration to a newborn calf, my father has always faced his responsibilities without hesitation. We did everything the hard way for quite a few years, but in spite of that, nothing was ever left undone

There were a number of months that the milk check didn't cover expenses, but Dad kept right on struggling, managing, and achieving. He had to. Having come to the United States as a refugee from communist East Germany (where his farm, prized Holsteins and other belongings were forciby taken away by the government), he aimed for new goals. And he never backed away from them.

The communist government in East Germany had stripped him of everything but his family, determination, ability to work hard and long, and good health. He knew that that was all he needed to make a new start in life. Nobody said it would be easy, and it wasn't.

Aside from the thousands of days of hard work, there have also been countless days for headaches and heartaches. Examples would include the horror with the communists in East Germany and ordeal with a tuberculosis infected dairy herd which claimed nearly 200 head.

Dad has always worked hard. Even now, in his mid 60's, he can tuck a bulky 100-pound feed bag under one arm and empty it evenly into a manger. No hour of the night is too important for rest when cows and heifers are giving birth. During many a night Dad has gotten out of bed three and four times in order to assist a cow and calf. Occasionally he gets no sleep at all.

I remember walking across more than 100 acres of pastureland each Spring There were thistles out there and the way to get 'em was to dig 'em out. We had chores ranging from the most boring to the most fun. Some we minded, and others we didn't. Dad never showed whether or not he was bothered by any of the more boring tasks. He just worked. Stifled by neither physical demands nor debts, he has proven what hard work and determination can do.

I've seen him work hard, and I have watched him take satisfaction in his accomplishments. I have heard him talk proudly of his best cows and bulls, and followed him on a tour of the remodeled house. It's almost fit for royalty.

But most precious of all are the years of life on the farm. My father could have been a professional athlete or an aeronautical engineer. He could have made life much easier for himself and his family. But his preference was to become a dairy farmer.

Because of that decision some 40 years ago, I was given the opportunity to experience life on the farm. Despite the hard work and occasional shortcomings, I wouldn't trade that away for anything.

In choosing to work and live on a farm, my father gave me a most precious and treasured gift, and I love him for it.

Have a happy Father's Day!

Del. produce-selling law under fire

HARRISBURG -- An unprecedented move by Delaware State Revenue agents to enforce an obscure law against a Pennsylvania farmer selling produce in the neighboring state has brought reciprocal action by State Rep. Noah W. Wenger, R-Lancaster.

As co-sponsor of House Bill 2487 which has been released from the Agriculture and Rural Affairs Committee, Wenger said the legislation would combat a decision by Delaware Revenue agents to require an eastern Pennsylvania farmer to purchase a license before marketing his unprocessed fruits and vegetables in the state.

"Our sister state decided suddenly to not only execute an old law on its books for the first time but also require the farmer to pay for his previous nine years of doing business in Delaware," Wenger said.

"This would amount to several thousand dollars and small Pennsylvania truck farmers do not have that kind of money. It's a case of discriminatory harassment which could set a dangerous precedent. I am not going to sit by and allow any state to penalize Pennsylvania farmers who attempt to do business in neighboring states."

The 99th District legislator's measure would require all nonresident producers of unprocessed fruits and vegetables doing business in the Commonwealth to obtain a license unless a reciprocal agreement exists between Pennsylvania and the producer's home state.

However, the Pennsylvania Secretary of Agriculture could waive the licensing requirements if the nonresident's state does not require a similar license from a Commonwealth resident.

"Since last October, we have enlisted the support of Agriculture Secretary Kent Shelhamer, the Pennsylvania Farmers Association and even Delaware State's Agriculture Department in an effort to get the ruling against the farmer overturned by the Delaware Revenue agent, but to no avail," Wenger explained.

"The only concession we could get was a verbal statement that they would not force the farmer to pay the thousands of dollars in back-license fees. This is not the way to reach agreements between states and, besides, what would stop Delaware from picking on another Pennsylvania fruit and vegetable producer tomorrow?

"We are pushing to have H.B. 2487 considered by the entire House membership as soon as possible so that it can be sent to the Senate and then signed into law before the 1977-78 Session of the General Assembly ends," Wenger said.

Feed short course attended

LANCASTER – Tim Horn, Director of Livestock Nutrition at Pennfield Corporation, is one of 52 feed industry employees from 45 companies in 18 states and 10 foreign countries who attended Kansas State University campus through June 16 participating in the Feed Manufacturing Technology Short Course.

The purpose of the three-week short course, sponsored by the university and the American Feed Manufacturers Association, is to provide those persons with some experience in the feed manufacturing industry with a better appreciation of the basic theories and concepts of the feed industry and to increase their knowledge of current industry practices. Course work is being conducted on the KSU campus, utilizing the University's pilot feed mill, laboratories and classroom facilities. The group is also scheduled to make field trips to nearby industry plants.

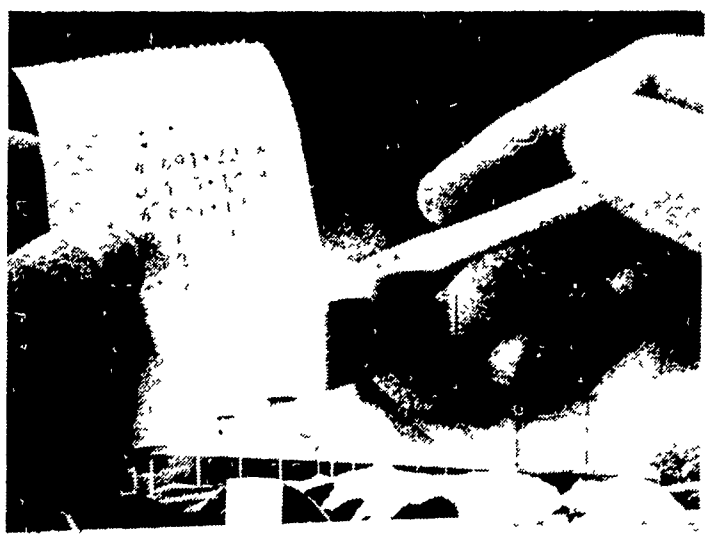

Figure it for yourself.

When you shortchange their nutrition, you shortchange yourself.

Looking for ways to cut on down on out-of-pocket feed costs without cutting down on milk production?

Cutting production costs will backfire if you end up shortchanging your herd's nutrition in the process.

But you can cut those costs safely by feeding homegrown grains and grain silage fortified with the right Vigortone Dairy Pre-Mix. These potent pre-mixes contain the proper levels of vitamins, calcium, phosphorus, and other minerals needed to balance your farm's feedstuffs.

Vigortone Dairy Pre-Mixes can be mixed in or metered on any palatable grain or roughage. This lets you change ration content to fit the supplies you have on hand without risking herd performance.

Better herd nutrition means a bigger milk check. Minimum out-of-pocket feed costs mean more in your pocket.

Your figures will prove it.

Dry cow nutrition pays future profits.

Shortchanging your dry cow's nutrition can be risky too. Most problems dairymen experience in getting cows back in the string can be traced to careless treatment during the dry period.

Keep them in top condition until their next lactation. To help you do it, Vigortone has developed unique dairy pre-mixes specially concentrated for dry cow rations.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's cost-saving dairy feeding programs with any other you name.

The top nine in the livestock judging contest were, left to right: 2. Wayne Hess, Penn Manor; 3. Frank Hunter, Lakeview; 4. Charla Janney, Southwestern; 5. Lewis Crouse, West Greene; 6. James Tretter, Lehigh County AVTS; 7. David Wylie, Oxford; 8. James Harnish, Penn Manor; and John Janney, Southwestern. The contest, which was entered by 149 students, was won by Sam Long of Solanco. He is pictured on page 1.

Penn Manor; Ed Weaver, State College; and Crystal Givler, Manheim Central.

Silver medalists

6 Paula Deitch, Cumberland Valley; 7. Harold Kauffman, Ephrata; 8. Harry Kreiser, Pequea Valley; 9. David Harpster, State College.

Bronze medalists

10. Anna Hursh, Garden Spot; 11. Donald Brubaker, Lampeter-Strasburg; 12. Lana Kyler, Clearfield; 13. James McDonald, W.B. Saul; 14. Randy Watkins, State College.

AGRONOMY

Robert Dehoff, Red Lion, won top honors in this contest, in which 39 students were entered. Placing behind him for gold medals were: 2. Glenn Bertl, Rockwood; 3. Jim Holstead, Knoch; and 4. Mary Ann Herren, Bermudian Springs.

Silver medalists

5. Phil Topper, Gettysburg; 6. Alan Kemmerer, Central Columbia; 7. Diane Foertsch, Knoch; 8. John Ratvosky, Wilmington; 9. Chris Baker, Purchase Line; 10. David Boyd, Reynolds; 11. Vic Maga, Black Hawk.

Bronze medalists

12. Lloyd Hewlett, Linesville; 13. Richard Neff, Pequea Valley; 14. Chris Bear, Kutztown; 15. Brill Yale, Kennard-Dale; 16. Robin Ohler, Meyersdale.

DAIRY FOODS

It was Ephrata all the way in this event, for which 14 students were signed up. Fred Burkett, Galen Hurst, and Marvin Fox placed 1, 2, 3, respectively to hoard all the gold. Silver medals were awarded to: 4. Calvin Baxter, Troy; 5. Christian Herr, Garden Spot; 6. Tim Hanks, Solanco; and 7. Scott Augsburger, Ephrata. Capturing bronze medals were: 8. Daniel Brennan, Athens; 9. Jeff Roland, Oxford; 10. Christian Davis, Mifflinburg, and 11. Erik Ely, West Grove.

DAIRY SHOWMANSHIP

With 24 entered in the contest, medals were presented to nine students. John Zimmerman, Ephrata, won the top spot. Others to win gold medals were: 2. Cindy Urbanick, Linesville; 3. Karl Torrey, Coudersport; 4. Scott Foreman, Cumberland Valley. Silver medals went to Todd Carey of Lehigh County AVTS and Carl Peachey, Jr. of Juniata-Mifflin AVTS. Winning the bronze emblems were Kennard Henley of Octorara, Gerald Garger of Lampeter Strasburg, and Art Gerber of Wilmington.

AGRICULTURAL MECHANICS

Gold medalists

Jeff Carns beat the field of 40 students for top honors. Placing second was Ephrata's Curtis Snavely, followed by: 3. Mark Swatsworth, Clearfield; 4. Dan Myers, Kane; 5. John Punako, Mifflinburg; 6. Randy Bucher, Ephrata.

Silver medalists

7. Fred Charles, Penn Manor; 8. Lester Heineman, Cedar Crest; 9. Jonathan Johnson, Lower Dauphin; 10. Richard Starr, Brockway.

Bronze medalists

11. Daryl Beiler, Mifflinburg; 12. John Shearer, Juniata; 13. Jeff Stull,

(Turn to Page 24)

Winners in safe tractor operations were, left to right, Dean Pysher of Eastern Northampton, Tim Gockley of Ephrata, and Scott Zeigler of Bermudian Springs.

SMALL GASOLINE ENGINES

Ephrata beat the field of 58 students in this event, winning the high individual spot, as well as the number one team position. Leading the way was Ronald Good. Glen Garside of Mifflinburg and Howard Greist of Twin Valley followed in that order.

Silver medalists

4. Jerry Gabel, Newport; 5. Russell Unger, Northern Lebanon; 6. Dave Stamm, Mifflinburg; 7. Charles T. McGee, Curwensville; 8. Andrew Blank, Octorara.

Bronze medalists

9. Barry Herman, Ephrata, 10. Kenneth Swope, Elizabethtown; 11. Ken Hamson, Octorara; 12. (tie) Erick Kingston, General McLane; Leslie Kreider, Elizabethtown; 14. Lloyd Hoyett, Twin Valley.

Team placings

1. Ephrata High School, 2. Mifflinburg High, 3. Twin Valley High, 4. Newport High, 5. Northern Lebanon, 6. Octorara, 7. Elizabethtown.

PUBLIC SPEAKING

There were 12 contestants in the general public speaking contest, all of whom received gold medals for their efforts. They placed as follows: 1. Ann Murren, Conewago; 2. Donald Burns, Bellewood-Antis; 3. Candy Barker, Northern Potter; 4. Kathleen Jones, W.B. Saul; 5. Marie Ackerman, Lehigh County AVTS: 6. Steve Bennett, Everett Area; 7. Stuart Hellam, West 8. John Zubler, Penns Valley; 9. Maxine Messner, Garden Spot.

In a separate contest for speeches dealing with conservation, all eight contestants received gold medals. They placed as follows: 1. Denise Krause, Lebanon County Vo-Tech; 2. Debbie Miller, Mifflinburg; 3. Barry Sheaffer, West Perry.

CHAPTER PROCEDURES

The team from Annville-Cleona won first place. Team members were Reid Hoover, Ellis Meyer, Jeff Landis, Joe Harvatine, Alan Graves, Alan Hostetter, Bryan Burkholder, and Darryl Landis.

Teams with silver medals included, in order, Derry Area High School from Westmoreland County, Selinsgrove High School from Snyder County, and Ephrata Area High School from Lancaster County.

Bronze emblems were won by teams from Middleburg, Bellwood-Antis, and Lower Dauphin, in that order.

NURSERY LANDSCAPE

The Willow Street Vo-Tech School garnered top honors in this event, which was entered by 34 students. Tammy Lefever, Tracy Wittig, and Andrew Ressler captured the first three places and the gold that accompanied them. Silver medalists were Jim Caldwell of the Mount Joy Vo-Tech School and John Oswald and Daniel Salt, both from the Western Montgomery County Vo-Tech School Bronze emblems were won by Christine Snavely of Mount Joy AVTS, Lori Klein of Eastern Northampton AVTS, and Terri Keener of York County AVTS.

FARM MANAGEMENT

This contest, entered by 14 students, was pretty much a duel between Mifflinburg

(Turn to Page 29)

Senate Bill 522

(Continued from Page 1)

"Now, what the bill does is give the prior owner to the land the first chance to buy it back at the price he sold it for when it was thought to be used in a new road," he noted.

Now the Senate Bill will go back to the Senate where that legislative body will either vote to pass the bill in its amended form or send it to a conference committee where members from the House and Senate will try to compromise with a bill that would suit both groups.

"If the bill is passed, it will go to the governor to be signed," Wenger added. "But when the Senate will act on it is not now known."

John Hohenwarter, special assistant to the Pa. Secretary of Transportation thinks that in its present form the bill does not do what it was intended to do.

"Not to get this bill passed in its original form would be a serious mistake," was his comment. "It does not address the problem and motorists will lose considerable money. This bill is being totally misunderstood.

"The bill relates to the public, it lets PennDot be able to address certain properties which would be damaged by highways being located near to them in the future."

"Acquisition and fee of land is really no different than what was done in the past," he added. "The only change is the interest put in the land. As it is now, the law is extremely restrictive. This bill would have no impact on the public."

Referring to the sale of the land, he explained that about a year and a half ago, there were serious financial difficulties and many highway projects underway were stopped and projects for which land had already been bought were dropped. The roadbuilding program was reduced and the land originally intended for those projects now dropped would be available

He noted that how much land and the location of that land to be sold has not been determined yet

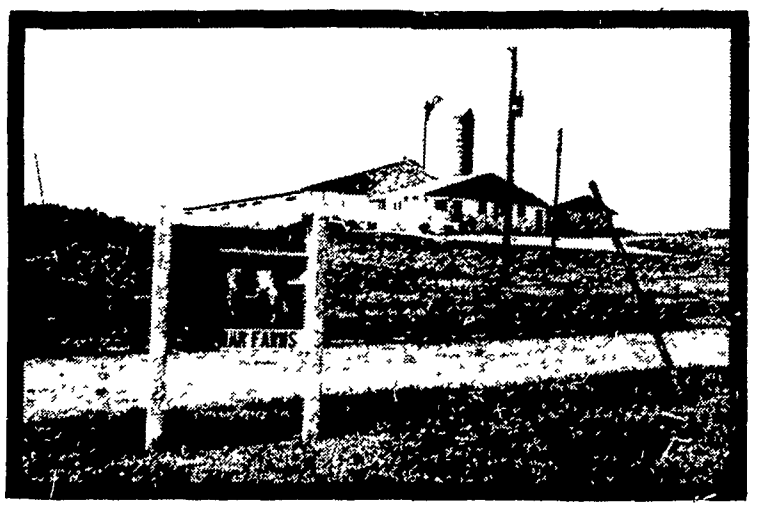
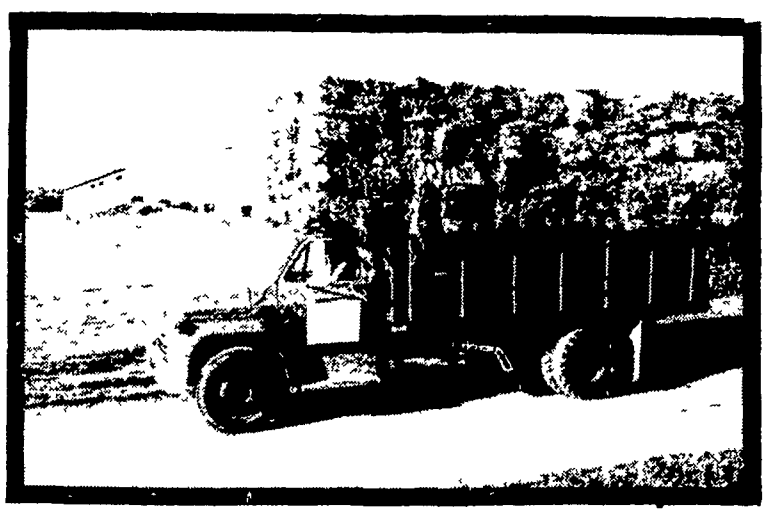
Silo King On Baled Hay

Harold and Wayne Lesher of Way-Har Farms in Berks County tell of their experience in using Silo King on baled hay.



The Lesher Brothers Dairy Set-Up.



Harold on his way to auction with a load of their top quality hay.

"We feel that hay is the best cash crop (return per acre) a farmer can raise in this area today. We had 400 acres of hay last year and we baled over 26,000 bales plus filling our 20x50 silo twice with haylage. We baled very little rained on hay, but we did bale a lot that was not fit to bale because of weather conditions. By using **Silo King** we were able to bale the hay at a higher moisture level which helped us to beat the weather and save more nutrition."

"We feed over 200 head of dairy livestock and sell the remainder of the hay. Last year we sold over 200 tons, and to our surprise we found very little mold in any of the hay; and it also kept its color."

"We have used **Silo King** 5 our of the past 6 years. We became sold on **Silo King** after trying another preservative for one year. The **Silo King** works and it is easy to apply by using the Gandy Applicator on our baler."

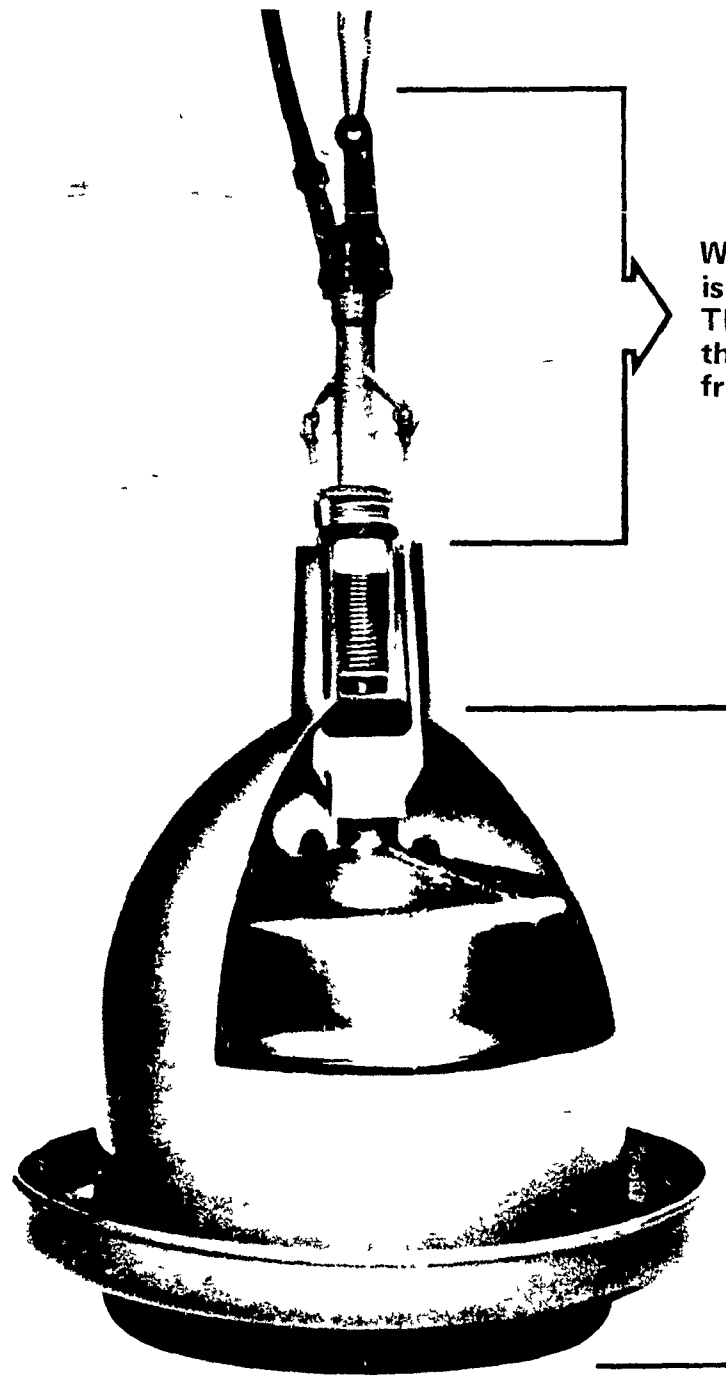
PLASSON® DRINKER

...NOW! The Standard of the Industry... The Complete Watering System for Commercial Broilers, Breeders, and Turkeys from Day Old to Market Age.



The Inside Story of the Plasson Drinker:

With all other plastic hanging waterers the ballast weight is attached to the bell. Not so with the Plasson Drinker! The ballast hangs independently and eliminates wear on the spring and valve mechanism to provide trouble-free performance.

The independent ballast feature allows the Plasson Drinker to function while sitting on the ground, thus permitting chicks to drink from day old. Whether hanging or sitting on the ground, a regular single-action valve is all that is needed to keep the drinker at the proper water level.

As your birds drink, there is a slight movement between the bell and the independent ballast. This action allows the water to rock in the trough of the bell . . . cleaning both sides and bottom . . . suspending the feed in the water . . . thus enabling birds to consume all the feed that comes off their beaks.

By keeping the water level at the correct height, ¼" to ½" maximum (just enough for birds to immerse beak), your birds will clean the trough as they drink.

Lower Dauphin FFA members attend national leadership congress

HUMMELSTOWN — Jon Johnson and Michelle Henry of the Lower Dauphin FFA chapter at Lower Dauphin High School, attended a national FFA leadership conference in Washington, D.C. last week. The week-long Washington conference was held at the Olde Colony Motor Lodge and the National FFA Center near the nation's capitol.

The FFA conference program is designed to improve leadership skills, develop an understanding of the national heritage, and prepare FFA members for more effective leadership roles in their chapter and community. The conference is also a forum for the exhcnage of FFA Chapter activity ideas among members from across the nation.

Besides the training sessions, the 1978 program includes visits to Mt. Vernon Plantation, the National Archives, Smithsonian Institution, Arlington National Cemetery, and several other historic monuments and memorials in and around the capitol.

A highlight of the conference was a Thursday morning visit to the office of Congressman Allen E. Ertel. Participants also attended a Capitol Hill meal featuring a question and answer period with congressmen and Washington leaders in business and industry.

Michelle Henry, 16, is the daughter of Mr. and Mrs. James Henry of Hummelstown. Johnson is the son of Mr. and Mrs. Ogden Johnson, Palmyra. Their vocational agriculture teacher is Stan Bucher.

Jon Johnson and Michelle Henry of Lower Dauphin FFA are greeted in Washington, D.C. by N.H. Hunsicker (right) of Washington D.C., national advisor of the FFA. Jon and Michelle attended a week-long national FFA Washington conference program.

Greenleafs win cattle show

LANCASTER — Martin Greenleaf, Jr., of Green Acres Farms, Oxford R1, won the silver bowl trophy at the annual fat cattle show held at the Lancaster Stockyards. The show was held on June 7.

The Greenleafs had the first place prize for the pen of six fat Angus in that breed division. They were also named as the grand champions of the show.

The steers averaged 1276 pounds. They were sold for $63.25 per hundredweight to Cross Bros., Philadelphia.

Reunion set

LANCASTER -- The Oregon School Reunion will be held on June 25 at the Refton Pavilion. Lunch will be at 1 p.m. Those who plan to attend are asked to bring one hot dish, one cold dish, and a beverage. Entertainment will be provided by the Joy Singers.

Masonic Homes Ayrshires win national awards

ELIZABETHTOWN -- Masonic Homes Farm, here in Lancaster County, has been awarded one of 12 coveted French Memorial Trophies awarded by the Ayrshire Breeders' Association, Brandon, Vt. To win this award, the Masonic Homes herd of 97 registered Ayrshires maintained a production average of 13,119 pounds of milk and 535 pounds of butterfat during 1977.

According to Ayrshire Association Executive Secretary David Gibson, the French Memorial Trophies are presented each year to two Aryshire herds in the United States in each of six herd size groups. In determining the trophy winners, the annual milk production of each Ayrshire in every herd is adjusted for variation in age and butterfat test. Then individual herd averages are computed. The two herds with the highest production average figured on this basis in each herd size catagory receives a trophy. The production average for the Masonic Homes Ayrshires adjusted to a four per cent butterfat mature equivalent was 14,207 pounds of milk. This was the highest average for 75 to 99 cows.

The French Memorial Trophies are named for Mr. J. D. W. French, a charter member of the Ayrshire Breeders' Association and its first permanent secretary. To be eligible for this prestigious award, an Ayrshire herd must be enrolled on official DHIR, the production testing program of the Ayrshire Breeders' Association.

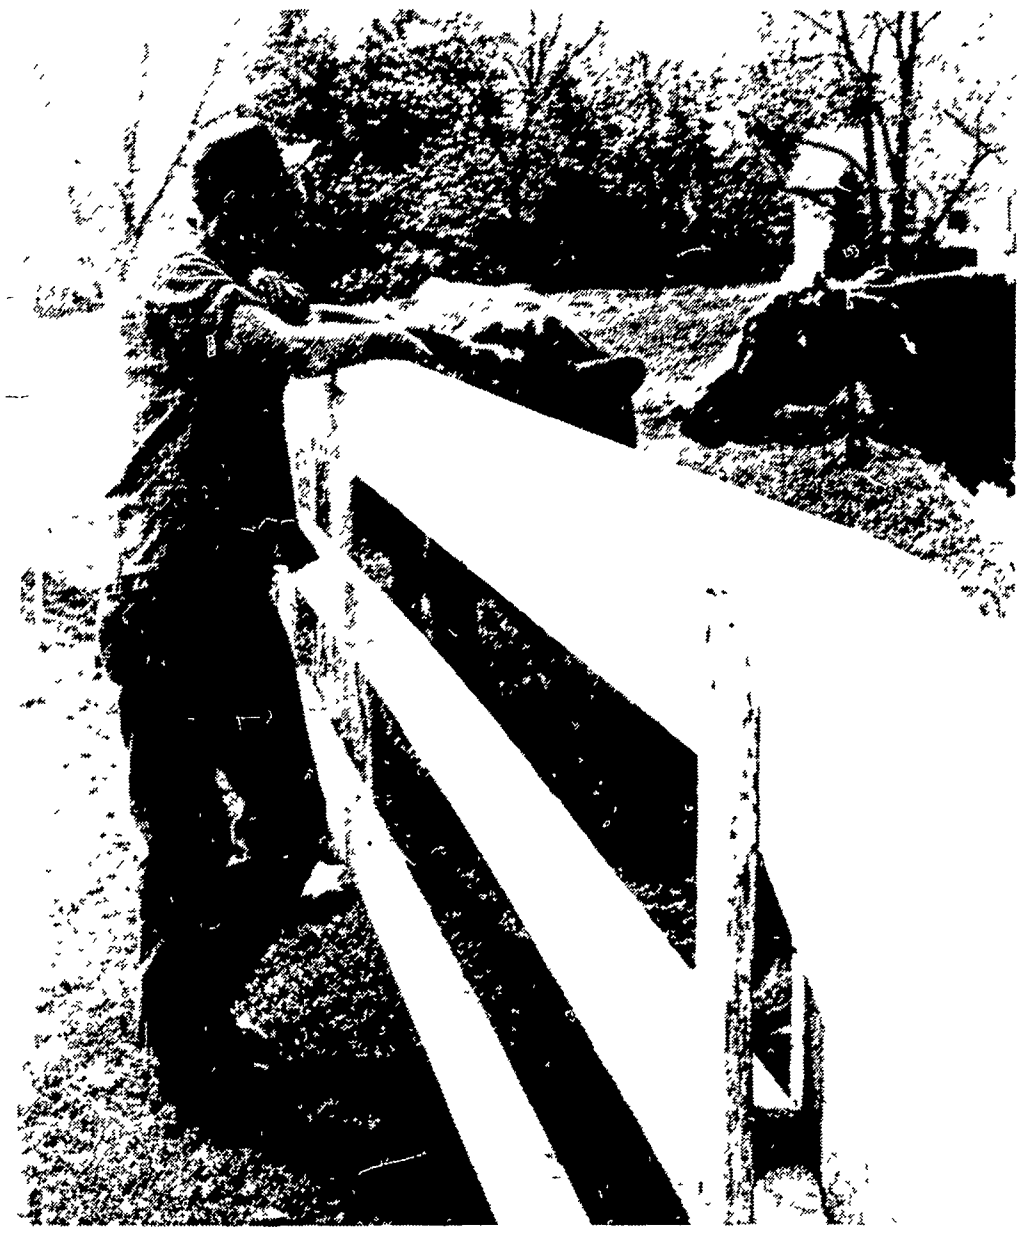
The Ayrshire Breeders' Association also announced that Masonic Homes Farms qualified for its 13th Constructive Breeders Award during 1977. The award is presented each year.

In winning this award, the Masonic Homes Ayrshire herd maintained a mature equivalent production average of 14297 pounds of milk and 577 pounds of butterfat, and had an average classification score of '85.0' on 77 head of cattle. Twenty-six Ayrshire Breeders nationwide qualified for this prestigious award in 1977.

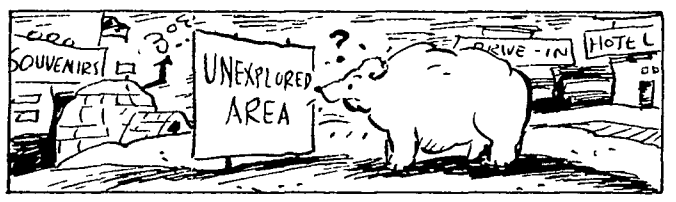
The Constructive Breeders Award is presented by the Ayrshire Breeders' Association to honor Ayrshire Breeders enrolled on the Official DHIR testing program and who regularly have their herds classified for type. To qualify, the majority of the registered Ayrshires in the herd must be bred by the owner and they must maintain a high level of type and production.

The Ayrshire Breeders' Association records and preserves the parentage of all the registered Ayrshires in the United States. In addition to registering over 11,000 Ayrshires each year the organization conducts a wide range of programs and services to promote and improve the Ayrshire Breed.

The Ayrshire Breeders' Association was founded in 1875.



Barney Wilson, assistant farm manager in charge of dairy at the Masonic Homes, now in his 24th year of work, checks on some of the award winning cattle.



The largest expanse of unexplored terrain in the world is northern Alaska.

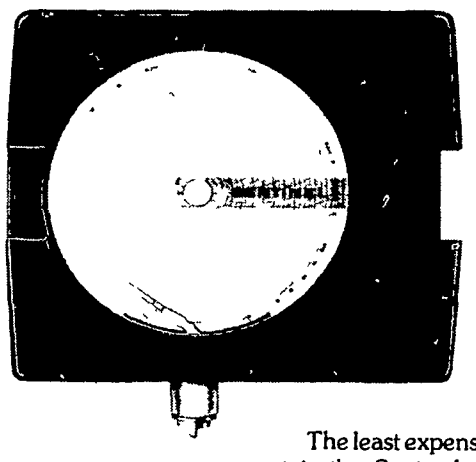
WHO'S MINDING THE MILK?



If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank Here's what it provides

- Permanent proof that proper temperature was maintained
- Record of cooling equipment efficiency
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded

Remember — if it prevents the loss of only one tank of product, the Sentinel has paid for itself It minds your milk

Longwood Gardens' waters begin Summer dance

KENNETT SQUARE – The nighttime skies around here will be brilliantly lit by the spectacular fountain displays at Longwood Gardens held every Tuesday, Thursday, and Sunday evening from now until Sunday, September 3.

Viewing the evening water show in front of the main conservatory has become an annual tradition for area residents. This year it will again atract thousands of spectators, both first-time as well as repeat visitors.

Longwood's waterworks have earned the reputation of being the finest colored fountains in the world. During a half-hour evening display, 250,000 gallons are thrown into the air at a rate of nearly 10,000 gallons per minute. The tallest jet rises 130 feet.

The display is controlled from a small console under the conservatory terrace. An electrician operates switches and dimmers to create innumerable combinations of water and tinted light.

Each fountain display begins at 9:15 p.m. regardless of the weather. The conservatories remain open from the normal closing time, 5 p.m., until 10:45 p.m. Special lighting enhances the indoor displays of exotic plants from around the world which fill the glass houses to overflowing.

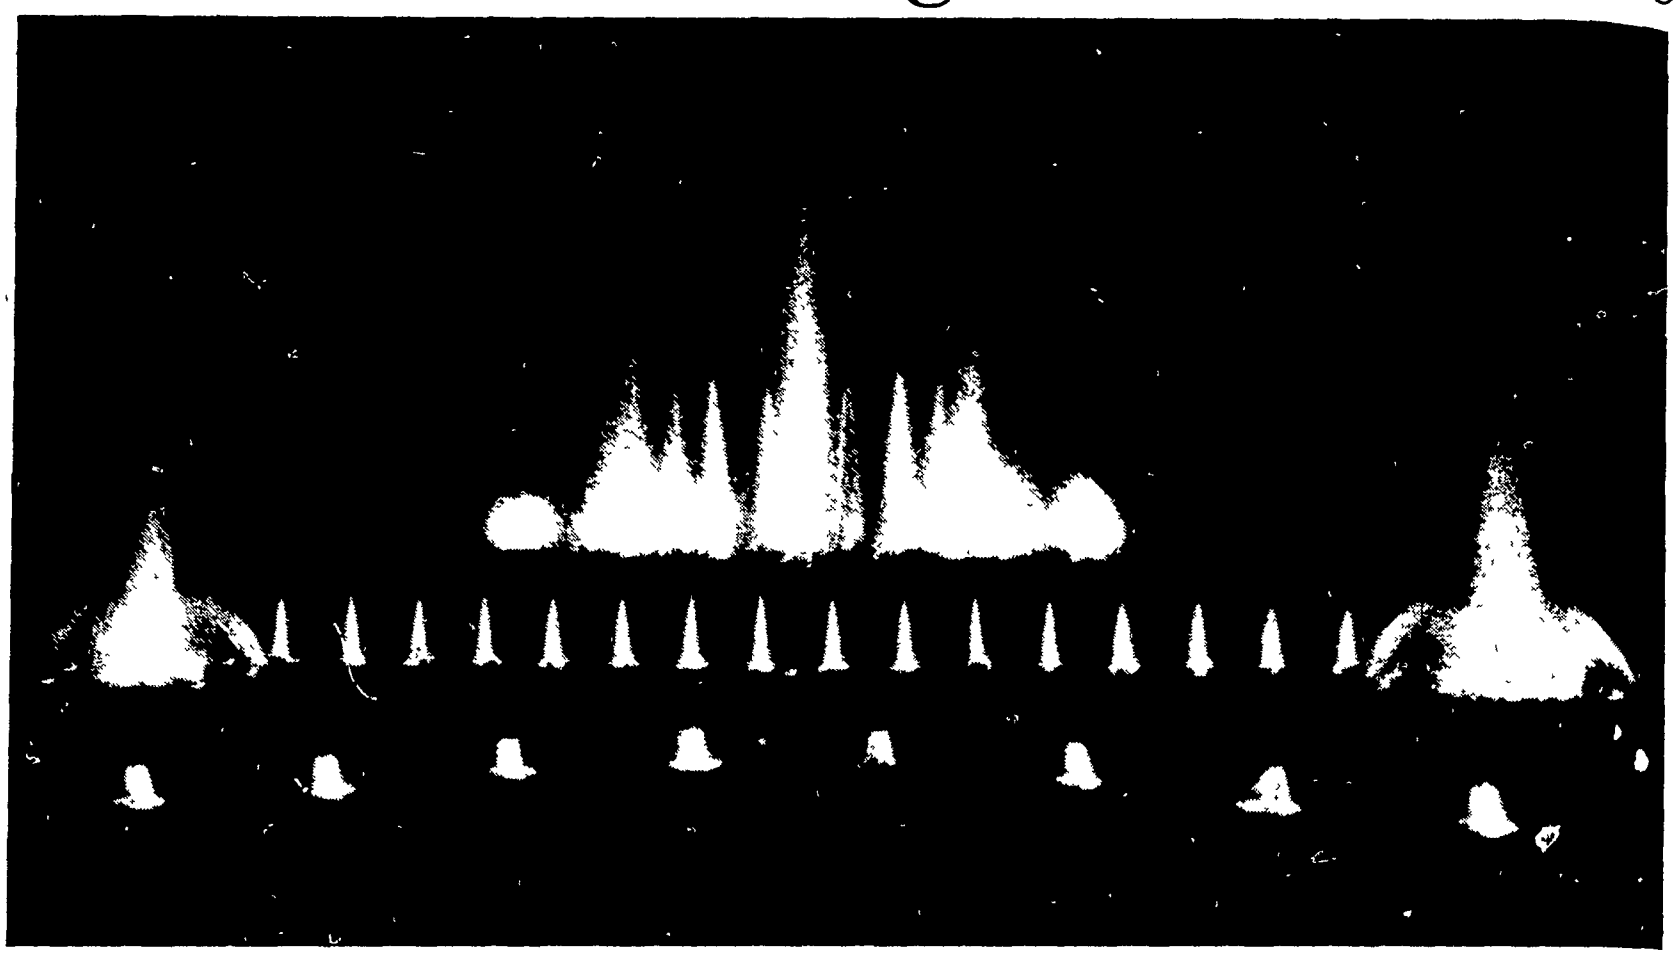
Surrounding the fountain garden are 350 acres of woodlands, flower gardens, meadow areas, lakes, the Italian Water Garden, vegetables, and a rock garden. In the Open Air Theatre, performing arts groups present free concerts on selected Sunday evenings throughout the summer at 7 p.m.

In addition to the fountain display on Independence Day, July 4, a special holiday show is also scheduled for Monday, September 4, Labor Day.

This is the last year that the fountains will play on Sunday evenings. Beginning in June, 1979, displays will be scheduled on Tuesday, Thursday, and Saturday evenings. The change will accommodate travelers with more time to spend on Saturday evening.

Longwood Gardens, formerly the estate of the late Pierre S. du Pont, is one of the best known horticultural showplaces in America. The grounds are open daily from 9 a.m. until 6 p.m., the conservatories from 10 a.m. until 5 p.m. Admission is $2 for adults, $1 for children agest 6 to 14, and free for children under 6.

Longwood is located on U.S. Route 1, three miles northeast of Kennett Square, 30 miles southwest of Philadelphia, 12 miles north of Wilmington, De., and 72 miles northeast of Baltimore.



Spectacularly colorful jets of water reaching up to 130 feet into the air will grace Longwood Gardens on Tuesday, Thursday and Sunday nights from now until the end of the Summer.

Cindy Darde and Bonnie Cole were third and fourth, respectively, in the FFA floriculture contest. Cindy is from Bucks County AVTS; Bonnie from Eastern Northampton AVTS.

State FFA

(Continued from Page 24)

and Solanco. Mifflinburg took first and third with Tom Mincemoyer and Steve Richards, respectively. Axel Linde of Oxford took the second spot. Glyn Boone of Derry High School was fourth, while John Groff of Solanco placed fifth. Both received silver medals.

SAFE TRACTOR OPERATION

Twenty students entered this contest, won by Eastern Northampton's Dean Pysher. He was the only gold medalist. Silver awards went to: 2. Tim Gockley, Ephrata; 3. Scott Zeigler, Bermudian Springs; and 4. William Romberger, Tri-Valley.

AGRICULTURAL SALESMANSHIP

Thirty-three students vied for top honors. When it was all over, Patricia Crossan of the W.B. Saul School, Philadelphia, was in first place. No one from **Lancaster Farming**'s prime coverage area placed, except Luann Wolfgang of the Lehigh County Vo-Tech School and Duane Bowman of Northern Lebanon. They were seventh and 10th, respectively, and won bronze medals. Ted Dutrow of Penns Valley, Centre County won a silver medal with his fourth place finish.

FLORICULTURE

The Brownstown Vo-Tech School had the top two contestants – Rose Marie Myers and Felicia Gordner. Cindy Darde of Upper Bucks AVTS was third and Bonnie Cole of Eastern Northampton AVTS was fourth. All received gold medals.

Silver medalists

5. Carole Ebersole, Mount Joy AVTS: 6. Tracy Ross, Mount Joy; 7. Connie Buehl, Brownstown; 8. Patricia Otter, Western Montgomery; 9. Joseph Panfile,

(Turn to Page 30)

Nursery landscaping is what these three students from Willow Street Vo-Tech did best during FFA activities Week. Tammy Lefever, Tracy Wittig, and Andrew Ressler placed 1, 2, 3, respectively.

Rose Marie Myers and Felicia Gordner, both from the Brownstown Vo-Tech School, were first and second, respectively, in the FFA floriculture contest.

Curtis Snavely and Randy Bucher of Ephrata won gold medals and honors when they finished second and sixth, respectively, in the agricultural mechanics contest.

State FFA

(Continued from Page 29)

Aston AVTS; 10 Kim Bernhardt, Mount Joy; 11. Donna Grams, Middle Bucks AVTS, and 12. Deborah Weikel, Western Montgomery County AVTS.

Bronze medalists

13. Donna Hamacher, Cumberland-Perry AVTS; 14. Dwayne Heckert, Cumberland-Perry; 15. Christopher Miller, Lehigh County AVTS; 16. Kyra Sirbak, Willow Street AVTS; and David Blough, Somerset AVTS.

There were 76 contestants in the event.

OTHER CONTESTS

In the interview contest, entered by 44 FFA'ers, Verna James of the W.B. Saul School, Philadelphia, won first place. Renee McCardell of Oxford placed second, followed by Randall Paull of Bermudian Springs and Jay Temchack of Bellefonte. All received gold medals. The only other medalists from **Lancaster Farming**'s prime coverage area were: 9. Dawn Donley, Mount Joy; 11. Ellean Berry, W.B. Saul; 12. Michelle Collins, Mount Joy, and Denise Kingkiner, W.B. Saul.

The forestry event was won by students from western Pennsylvania. James Buffy of Somerset took first place.

In pleasure horse judging, Mary Beth Pawlowicz of Butler County won first place, followed by Tina Richards of W.B. saul. The only other medalists from southeastern or southcentral regions of the state were: 5. Susan Arford of Hollidaysburg; 6. (tie) Marilyn Snyder of Upper Bucks, Robin Cary of Lehigh County AVTS, 9. Diana Miller, W.B. Saul; and 12. Cindy Bowser, Kennard-Dale.

SUMMARY

The event, held during the 50th year of FFA, had "A Golden Past, A Brighter Future" as its theme The contests were made possible through the cooperation of faculty and staff members in all departments of the College of Agriculture New this year was a contest in dairy showmanship.

The national FFA President, Robin C. Hovis of Helena, Ohio, addressed the general session the night of June 14. The State FFA President's report was presented at the same event

State FFA

(Continued from Page 30)

by Michael J. Beatty of R.D. 2, Grove City.

Educational demonstrations and tours of College of Agriculture facilities were featured the afternoon of June 14. New demonstrations this year featured energy conservation, tractor "trouble shooting," and wildlife conservation.

The 2000 attendees were welcomed to University Park at the opening general session the night of June 13 by Dr. James M. Beattie, Dean of the College of Agriculture. Each general session included music by the Pennsylvania State FFA Band, led by Dr. Ned C. Diehl, director of the Penn State Blue Band; and the State FFA Chorus, directed by Jack Shaffer of the Music Department of Central High School, Martinsburg.

Co-chairmen of State FFA Activities Week were Dr. William Williams of Penn State and Charles F. Lebo of the Pennsylvania Department of Education. Lebo presented the various contest awards the morning of June 15 at a final assembly scheduled for 9:30 in the University Auditorium.

The first three finishers in the FFA interview contest were, left to right, Verna James, Philadelphia; Renee McCardell, Oxford; and Randall Paull, Bermudian Springs.

Beef cook-off June 19

HARRISBURG – State Agriculture Secretary Kent K. Shelhamer has announced the third annual Pennsylvania Beef Cook-off to be held Monday, June 19, at 1 p.m. in the Human Development Building at the Penn State University Park Campus.

Shelhamer noted that "any beef dish, using chucks, rounds, rumps or fresh brisket cuts of beef in any form may be entered. However, the dish must contain a minimum of two pounds and not more than five pounds of beef."

According to the Agriculture Secretary, any person, 18 years or older and without professional food status is invited to enter. All recipe entrants must be present to prepare and cook their recipe. Prizes will be awarded to the top five contestants.

The event features beef recipes during Pennsylvania Beef Week, June 18-24, and is aimed at helping the public understand the various cuts of beef and their proper preparation.

Entry blanks may be obtained by contacting Mrs. Mary Wilson, 862 Webster Drive, State College, PA 16801.

The Pennsylvania Beef Cook-off is sponsored by the Pennsylvania Beef Council and the Cattlemen's Association in cooperation with the Pennsylvania Department of Agriculture.

The 1976 Pennsylvania winner, Mrs. Shirley DeSantis of Easton, Northampton County later won the national award.

AGRISPON™

TOTALLY SAFE **LOW COST**

USE OF AGRISPON

AGRISPON may be used for all types of crops: row crops, small grains, vegetables, fruits, pastures, meadows and orchards.

AGRISPON could be the greatest thing that has happened to pastures and hay crops in the 20th Century because: it is economical, easy to apply, natural, non-toxic and non-chemical. It balances the soil through microbial action and makes nutrients available in the right amounts - when needed. It increases the nitrogen supply in a natural way and results in healthier plants, healthier animals and humans.

JAMES A. McHALE

WHEN TO USE AGRISPON

NOW is the time to apply **AGRISPON** to supply adequate nitrogen requirements for top corn yields. However, **AGRISPON** may be applied on corn up to the time it reaches 3 feet in height.

WHY USE AGRISPON?

PUT THE PROFIT BACK IN FARMING!

Bryant Mackay, Clarksdale, Missouri, applied **AGRISPON** twice to his corn field. Documented yield: 154 bushels per acre; cost: $11.00 per acre.

Other corn fields had 180 lbs. nitrogen, 120 lbs. phosphate, 180 lbs. potash and a cost of $60.00 per acre fartilizer bill. Documented yield: 130 bushels per acre.

AGRISPON produced a higher yield at less cost.

FORMER PENNSYLVANIA SECRETARY OF AGRICULTURE has spent the last year personally observing test plots and field tests in many areas of United States.

He has talked to numerous farmers satisfied with results of the use of **AGRISPON.** Mr. McHale established 25 test plots on his own Mercer County farm in 1977.

He says:

"The results with **AGRISPON** were fantastic on both corn and soybeans. I got 8 bushels more shelled corn per acre with one application of **AGRISPON** at $6.50 per acre, than I did with $75.00 per acre of commercial fertilizer, 20 percent more soybeans with two applications of **AGRISPON** at $13.00 per acre, than I did with $40.00 per acre of commercial fertilizer.

"More important, both Penn State and Brookside laboratory soil tests taken in the spring of 1978 showed the **AGRISPON** treated soils to be in a higher state of fertility with more available nitrogen than those from chemically treated plots."

1977-78 **DOCUMENTATION OF RESULTS** in field trials, by researchers and by farmers are available.

Distributorships and Dealerships available - contact us for additional information as to cost and use of the product.

Resource Conservation Act to be developed

LANCASTER – Federal-State-local cooperation will be the key in quick implementation of the new Resources Conservation Act, according to a joint announcement of Walt Peechatka, Director of the Pennsylvania Conservation Commission, and Graham T. Munkittrick, State Conservationist, U.S. Soil Conservation Service.

The Resource Conservation Act is new federal legislation requiring evaluation of soil, water and related resources and their ability to meet present and future demands of the nation. The economic value of various soil and water conservation practices will be part of the study. This legislation offers districts, as subdivisions of state government, an opportunity to evaluate county resource needs and to make their program more responsive to these needs.

Based on these appraisals, a multiyear program will be developed for the best use of natural resources. Con servation districts, state agencies, and the public will have an opportunity to comment on the condition and the needs of these resources.

The Pennsylvania Association of Conservation Districts, at their quarterly session in State College, adopted a position encouraging conservation districts to take the leadership in obtaining citizen inputs.

In Lancaster County, SCS and the Conservation District will jointly sponsor public meetings, reports Aaron Stauffer, Chairman, Lancaster Conservation District, and Warren Archibald, SCS, District Conservationist.

The first local public meeting will be held during the coming Summer, reported Archibald. At this time, citizens will be invited

Aaron Stauffer

to comment on the condition and needs of the area soil and water resources. The public response will be consolidated and developed into a proposed program.

In the spring of 1979, local citizens will have an opportunity to review and comment on the program. The finalized proposal will be submitted to Congress for action in December 1979. Congress will use the appraisal to determine future soil and water conservation programs and funding.

"This program offers citizens a unique opportunity to particpate in the development of National policy and programs," added Aaron Stauffer. "It also will permit conservation districts to appraise local resources, future needs, and program effectiveness. It should help districts provide services to the residents of Lancaster County. Information will be released as soon as the local meetings are set," he added.

4-H horse club meets

LANCASTER – The June meeting of the Boots and Saddles 4-H Club was held on Friday, June 9 at the home of members Pam and Lori Sammons.

Reports were given on the 4-H Expo at Park City, and the June 4 gymkhana which benefited the children from the March of Dimes Society.

The next gymkhana will be held on June 25 at the Fellenbaums. Those members who wish to show in the County Round-up on July 15 must show their projects in Grooming and Showmanship at this gymkhana. Members were reminded to bring their Coggins test papers to this gymkhana. Also, those members who own ponies can get them measured at the gymkhana.

Demonstrations were presented by Eva Sherlaw and Susy Evans on braiding a horse. Pam Sammons demonstrated clipping while Lori Sammons explained bathing techniques on her horse.

The next meeting will be held on July 14 at 7:30 at the home of Michael Spahn.

CLEAN ALFALFA WITHOUT SPRAYING

with **FERTRELL BLUE LABLE** - a special blend with boron for hay and pasture. Only $112 a ton spread. It is long lasting and produces quality, quantity and nutrition.

Our various soil conditioners also contribute to healthy crops without spraying, and cost less than the spray. Hardpan disappears, roots and much larger and go into the broken subsoil – hence they survive drought. Try our proven program wherever you have a bare field for a bountiful surprise in 1979. It costs less for fertilizer, soil preparation, irrigation, insect and disease control and vet bills. Your profit is your income minus your expense. Our convinced customer list grows steadily. Study our free literature about the whole program with service. We'll gladly mail it. We also have non toxic spraying service.

Plant late vegetables to take along to Phila Tailgate Market. We'll need a lot of them

eliminate the danger of wild cherry poisoning is to eliminate the trees.

TO CONTROL PARASITES IN LIVESTOCK

The blood-sucking parasites of sheep, horses and cattle thrive and multiply in large numbers during hot weather. Each female worm produces up to 10,000 eggs daily during warm weather.

These eggs hatch very quickly and just about all of the larvae survive when the weather is wet and when there is enough grass to protect them from the sun. Within three weeks after eggs hatch, the larvae have reached the infective stage. When the animal eats grass contaminated by larvae, the life cycle is completed.

The latter part of June and July is a good time to give worm treatment to animals on good pasture. New worm medicines are safe, highly efficient and easy to administer. However, the choice of medication depends on the type of worms present in the animal. This can be determined by microscopic examination by a veterinarian. Sheep and young cattle can be wormed by feeding them medicated wormer pellets. There are several worm medicines that can be easily given to horses in feed.

After giving worm medicines, the animals should be moved to new pasture.

TO FEED SHRUBS AFTER FLOWERING PERIOD

Most people know that their plants do better if they're fertilized... but many ask when is the best time to feed shrubs.

One important thing to remember is that shrubs need feeding immediately following their flowering period.

For small shrubs, use one half a handful of a complete fertilizer such as a 5-10-5 or 5-10-10 or a similar analysis. The fertilizer should be placed on the surface of the soil around the plants and lightly raked in.

After you've applied the plant food to the soil, it should be soaked in with rain or a healthy watering. Larger plants, of course, may be given a larger amount of plant food.

Once a plant is firmly and fully established...and in good growing condition...then it may not need regular fertilizer applications.

Workshop set for canning

WEST CHESTER — The Chester County Cooperative Extension Service of Penn State University has scheduled demonstrations on the procedures for canning and freezing fruits and vegetables.

The same workshop will be offered at the following locations:

Tuesday, June 20, 1978, Elverson National Bank, Bucktown Branch, located on Route 23 just west of the intersection of Routes 100 and 23; Thursday, June 22, 1978, Chester Co. Federal Savings and Loan Community Room, High and Market Streets, West Chester.

The workshops will be held from 9:30-11:30 a.m. All interested persons are invited to attend; no pre-registration is needed. For further information contact the Extension office, 235 W. Market Street, West Chester, 215-696-3500.

Md. ag secretary calls beef imports an insult

ANNAPOLIS, Md. -- Maryland Secretary of Agriculture Young D. Hance says President Carter's decision to allow more imported beef into the country amounts to, "nothing more than a desperate attempt to fool consumers into thinking hamburger will be cheaper. He went on to say it was an insult to American agriculture.

Several months ago Hance had predicted that federal officials would resort to lifting beef import quotas in an effort to depress rebounding cattle prices.

"Now the President has made the move," Hance says, "by advancing the questionable argument that more impoted beef will act as a ceiling on rising beef prices and, therefore, result in cheaper hamburger at the meat counter.

"It won't, because the market for meat is at long last responding to the classic economic law of supply and demand. Beef producers, who had been losing money for over two years, cut their herds and, the surplus of beef has disappeared.

"Speaking as a farmer and, one who is familiar with the boom and bust cycle of the cattle business, I see the President's short sighted move as a slap in the face to American agriculture and ultimately will hurt the consumer because it uses the stick of more foreign imports.

"Agriculture, more than any sector of the American economy, makes a constant positive contribution to our nation's balance of payments and farmers are proud of that. Now that some farmers, namely cattlemen, are receiving a favorable price for their product, the Administration chooses to open the floodgates for imports. More imports mean more dollar outflow and will further aggrevate the weakening of the dollar. In this case a hundred million dollars or more.

"To penalize agriculture, our best foreign trade item, is a real insult.

"Looking specifically at beef as an international commodity," Hance continued, "we see a worldwide trend of rising food prices, particularly beef prices.

"The President, in what I believe to be, a grandstanding move to divert attention from economic truth by import quota games, has decided to try to lower the price of hamburger for Americans by lifting beef import quotas.

"Looking at the record we see for the latest reporting period that of the major nations in the world, only five had lower food price inflation trends than did the United States: Belgium, Germany, Japan, Holland and England; while ten other developed nations had food price increases higher than the United States.

Young D. Hance

"Let's look at the price of beef in the countries which experienced lower food price hikes. In Washington, D.C., right here in Maryland's backyard, housewives paid $4.81 per kilogram (2.2 pounds) for boneless steak in early May while housewives in Tokyo were paying $35.09; in Bonn, West Germany $12.43; in Brussels, Belgium $11.22; in Holland $10.77 and, in London, $8.53 for the same kilogram of beef cut.

"They may have statistically lower inflation rates for beef these days but at such prices they can't afford to eat beef very often the way Americans can.

"Japan, as we all know, has seen a dramatic strengthening of its money value. And yet, will the Japanese government lower its stiff meat import quotas and duties in an effort to bring down the $35 per kilogram price of steak? The answer is no.

"I issue a challenge to consumer groups and the news media, which at every turn reports any rise in food prices, to follow the price flow of this alleged bargain-beef that will be coming into the United States.

"I ask them to find out how much it costs per landed pound, that is when it is unloaded from ships in a U.S. port and then to follow it through the meat distribution trade channels to the retail meat counter.

"I predict that it won't cost the consumer less than American produced beef Stop gap thinking in Washington, more than once in recent years has upset the economics of our agriculture and this is what we will see with imported beef this year," Hance concluded.

Peanuts

Each American eats nearly nine pounds of peanuts a year — mainly in the form of peanut butter, salted peanuts and in confections

ANNOUNCING
QUEEN ROAD REFRIGERATION
IS NOW AN AUTHORIZED DISTRIBUTOR FOR

VM Diesel

"THE DIESEL WITH A DIFFERENCE"
Cuts your power costs because it's way ahead of its time on all points.

AVCO-VM diesel engines are world-proven money-savers They deliver maximum power efficiency immediately, under any sudden load or climate variation Their higher power to weight ratios mean NO REDUCTION IN HORSEPOWER to qualify for pollution standards

They're stingy on fuel, too Many users report fuel consumption CUT IN HALF — and more — compared with gasoline engines. In some installations, our diesels are delivering more than TWICE the hours of operation per gallon of fuel.

Faultless performance is the norm, rather than the exception A choice of 27 premium quality air-cooled Avco-VM's (5 to 670-hp) means there's one that's right for your application.

Modular, unitized construction means fewer specialized parts, lower weight per hp, lower maintenance costs, 70% parts interchangeability — and they'll fit the tightest space.

Pork producers hold barbecue

Norwood McGuigan, left, and Tony Dobrosky, turn smoking spits of juicy and brown boneless pork chops, served to over 700 pork lovers who turned out for the annual feast at Elicker's Grove near Thomasville.

Volunteers from the York County Pork Producers Association prepared 1800 pounds of boneless fresh ham for their annual fund-raising barbeque last Saturday. After quick freezing, the tender, lean pork had been sliced in three-quarter-inch rounds.

Shop around

(Continued from Page 1)

spokesman, while noting that, right now, there is a change in raw material prices, also made the point that these costs fluctuate on a yearly basis and that the retail prices have traditionally remained steady even with this upward and downward movement.

"Right now, the price changes are not at the point that they are going to affect anyone," he said. "There has to be a really big change for that to occur."

He did note that fertilizer is a "funny business" and that some companies' prices may rise and fall with the yearly fluctuations just to be extra competitive or to bring a needed cash flow into the business.

Other fertilizer company representatives remarked that they haven't noticed the change in prices. Most added that they buy their raw materials ahead of the need and that they are not buying on the present market.

So, from the looks of things, it may pay to shop around for fertilizer for the remainder of the season.

Heinz critical of mushroom policy

WASHINGTON, D.C. – Senator John Heinz (R-Pa) has labeled the Carter Administration's program to protect the domestic mushroom industry as a "dismal failure."

Heinz has been continually pressing the Administration to take action to aid the U.S. mushroom industry. Instead of giving import relief, President Carter has chosen to monitor exports from Taiwan and Korea in an effort to avoid disruptive impacts on the industry.

In a letter to Special Trade Representative, Robert Strauss, Heinz stressed, "I'm particularly concerned at your inability to make effective use of the policy tools at your command to control the situation. My office has periodically received assurances that our current policy is working and no stronger action is necessary."

Heinz cited the following statistics which "show clearly the failure of the promises of cooperation":

In the mine months ending March, 1978 imports of mushrooms from Taiwan increased 8.2 million pounds or 21 per cent over the comparable period ending March, 1977.

From January to June, 1977 Korea and Taiwan promised to limit their exports to the U.S. to 37.5 million pounds. Instead 43.5 million pounds were exported, 16 per cent more than promised.

From January to May, 1977 the Taiwan government promised to limit U.S. exports to 19 million pounds. Instead they shipped 21.3 million pounds, 21 per cent more than promised.

Imports of over 60 million pounds from Taiwan are estimated for the current crop year. That is an increase of 40 per cent over the 1976/1977 crop year.

In addition, mushrooms are imported from Taiwan, processed in Hong Kong, and shipped to the U.S. in a diversion process employed by the Taiwanese which causes further damage to the United States mushroom industry.

"I strongly urge that the Administration take immediate and positive steps to remedy the disruptive impact that imported mushrooms are having on the domestic industry," Heinz concluded.

Poultry conference June 22

LANCASTER – The 1978 Pennsylvania Poultry Conference and annual banquet will be held June 22 at the Host Farm, Lancaster. The conference will be split into three divisions with emphasis placed on broilers, eggs, and turkeys.

For all those who attend the conference, there will be featured speakers throughout the day. Dr. Elizabeth Whelan will cover "The panic over food safety" during the morning session, while John Pedersen will give a price outlook, during the late afternoon.

Other topics covered at various conferences throughout the day are on such topics as taste panels, promotion, leg problems, mechanical handling, egg shell nutrition, processing changes, pollution management, cholesterol, infectious bronchitis, egg marketing, and litter.

Also part of the conference, the annual banquet honoring the broiler, egg and turkey industryman of the year will start with a social hour that evening at 7 p m. with the dinner to follow at 8 p m

Ag trade expanding, Hjort says

KANSAS CITY, Mo. – A general imporvement in world economic conditions, coupled to efforts by many nations to improve their people's diets has resulted in a rapid expansion in world demand for agricultural products. This has translated into a growing demand for American-produced farm products and a rapid expansion in exports. So said Howard Hjort, USDA director of economics, recently while addressing a symposium here on World Trade. The USDA specialist said further that:

U.S. agricultural exports have increased faster than domestic consumption - lncreasing the proportion of total domestic production shipped overseas. While the world turns even more to the U.S. for its food supplies - the U.S. famre has becme more dependent upon foreign markets as a source of income.

In a world made more interdependent by rapid economic growth, the welfare of the U.S. farm economy has been irreverseibly linked to events in foreign markets, including production variability, economic growth, and trade policies.

The changing nature of world import demand for agricultural products has greatly altered the commodity composition of world agricultural trade and the market potential for some products.

The most significant change in the commodity composition of world agricultural imports over time has been the relative increase in importance of food and feed imports at the expense of raw agricultural materials.

The structural changes in U.S. agricultural exports paralleled these shifts in demand. Food exports have remained at about 50 per cent of the total value of U.S. agricultural exports. The principal factors underlying the change in commodity composition of U.S. exports have been (1) the rapid rise in feedgrains - from 13 per cent of total agricultural exports in 1960-64 to over 20 per cent currently - and (2) the rapid rise in soybean exports - from eight per cent of total exports in 1960-64 to 17 per cent currently. Growth in these two commodities has accounted for 46 per cent of the $17.6 billion growth in value of U.S. exports since 1960-64.

Currently, sales to developed countries account for about 60 per cent of all U.S. agricultural exports, while the developing countries account for about 30 per cent. Communist countries account for the remaining 10 per cent.

Japan, with nearly $4 billion worth of U.S. farm products, imports annually, is by far the largest single country market for U.S. farm exports. Agricultural exports to Japan have increased at an annual rate of about 15 per cent in the past 15 years. This country is our top market for soybeans, feedgrains, hides and skins. It is also a very important market for our wheat, cotton, fruits, nuts and vegetables and many other products.

West Germany follows as the second best market for U.S. farm products; it is only about half as large as the Japanese market.

Community countries, have become increasingly important outlets for our grains and oilseeds. This year the Soviet Union will buy about $1.8 billion worth of our food and fiber products; Eastern Europe, $1.2 billion; and the People's Republic of China, over $300 million. In the past these countries have accounted for much of the variability in U.S. exports, with sales ranging from over $3 billion in fiscal year 1977±8, compared with slightly over $400 million in 1972.

The large petroleum exports of Iran and, to a limited degree Mexico, have provided the means for the expansion in our exports to these countries and to ther OPEC members. Our exports to OPEC increased to $1.7 billion in 1977 from $440 million in 1972.

U.S. agricultural exports have increased 600 per cent during the past 20 years ($3.3 billion in 1951-55 to $23.33 billion in 1976-77), and almost half of theincrease has been since 1966-70.

The U.S. share of world agricultural exports has increased from 12.3 per cent in the early 1950's to 16.5 per cent in 1976-77. Consequently, during this period the U.S. agricultural exports increased faster than world agriclutural exports - increesing about 9.0 per cent per eyar, while world agricultural trade grew at about 7.0 per cent per year.

U.S. domsetic consumption increased at about 4.5 per cent per year during the same period. As a result an increasingly important share of many farm commodities is exported.

During the 1972-76 period over half of U.S. wheat production (59 per cent), soybean production (51 per cent), and rice production (51 per cent) was exported. Moer than a third of U.S. cotton and tobacco production (36 per cent each) was exported in 1972-76. Moer than a fifth of U.S. corn (21 per cent) and grain sorghum production (25 per cent) was exported in 1972-76 – primarily for use as animal feeds in developed countries.

Since 1975, production from about 100 million acres (almost one of each three acres harvested) was exportee, compared to one in four in 1961-64.

Farm product exports have benefitted both farm and nonfarm sectors by generating additional employment and income. With additional income earned from exports, U.S. farmers can purchase needed goods and services. For example, farmers' purchases of fuel, fertilizer, and otherinputs to produce facturing, trade, and transportation sectors. As a result the purchasing power is spread throughout the total economy. It is estimated that for each dollar of agricultural exports about two dollars of domestic economic activity is generated.

Agriculture's contribution to our balance of trade has increased substantially inr ecent years. Net exports of U.S. farm products increased from about $2 billion in the 5-year 1966-70 period to about $12 billion in 1976 and $11 billion in fiscal year 1977.

Currently net exports of agricultural commodities have been large enough to offset a large portion of deficits in nonfarm items. In 1976, for example, agricultural exports offset all but $3.23 billion of our trade deficit. This is a reversal from the early 1950's when agricultural trade was in a deficit position and nonagricultural trade brought about a positive trade balance. In those years, nonagricultural items posted a $5 billion positive trade balance while agriculture was running a deficit of about $1 billion Over the years steady increases in agricultural exports, along with growth of nonfarm imports, have turned that situation around

Pennsylvania dairy industry has undergone some noteworthy changes since 1957

UNIVERSITY PARK – he Pennsylvania dairy dustry, fifth largest in the tion, has undergone veral large-scale changes ring the past 20 years, it s reported recently by Dr. lair J. Smith, economist ith the College of riculture at The Pennlvania State University.

One very notable change is e increased sales of milk in ores, with equally sharp duction of sales by home livery, Dr. Smith said. ore sales exceeded home liveries for the first time between 1965 and 1967 he added.

On the other hand, sales through restaurants, schools, institutions, and vending machines have not changed much during the 20 years of the analysis from 1957 to 1977.

Dramatic change has also taken place in the type of container in which milk is sold. Sales in paper cartons surpassed glass bottles between 1961 and 1963 in Pennsylvania, while sales in plastic containers moved glass to last place between 1969 and 1971. Dr. Smith believes plastic containers will some day overtake paper as the leading container for milk.

Quarts of milk, once the symbol of the dairy industry, were outsold by half gallons by 1965. Then gallon containers took over the lead in sales from half gallons between 1975 and 1977. The quart is now the least sold among the four major sizes and is even outsold by the half-pint.

Changes in types of fluid milk sold are also significant, Smith indicated, but are not as dramatic as the increased sales in stores or the change in size and type of milk container. Whole milk, with less than four per cent butterfat, changed from 84 per cent of sales in 1957 to 70 per cent in 1977. Low fat milk sales were not reported in 1957 but now account for 16 per cent of total sales. Other products account for the 14 per cent balance of sales.

All types of dairy processing plants, except those for cheese, declined over the 20 years. Fluid milk plants dropped to less than one-third of their 1957 number while frozen product plants are now one-fourth the number found in 1957. The number of cheese plants remained unchanged.

At the farm, meanwhile, the number of milk cows decreased from 919,000 to 703,000. This was related to the decreasing number of commercial dairy farms from nearly 34,000 in 1957 to 13,500 in 1977.

Nonetheless, the average number of milk cows on commercial dairy farms more than doubled in the 20 years, from 22 in 1957 to 45 in 1977. Milk production rose gradually from an average of 6,387 pounds per cow in 1957 to an average of 11,083 pounds per animal in 1977.

The two economists commented on potential trends in the Pennsylvania dairy industry over the next 20 years. Much will depend, they said, on the nature of public policy with respect to feed grains, milk price supports, dairy imports, federal and state milk marketing order regulations, substitutes for dairy products, and the like.

Billy Graham's brother to speak at breakfast

WILLOW STREET – Mel Graham, younger brother of evangelist, Dr. Billy Graham, will be speaking at a Farmers-Businessmens Breakfast, Saturday, June 24, at 9:00 a.m. at Willow Valley Restaurant on Route 222, three miles south of Lancaster.

Graham is a farmer from Matthews, N.C. and has followed in his father's footsteps. He and Billy and their two sisters were raised on a 300 acre dairy farm, which has now been completely developed as part of Charlotte, N.C.

A dairy farmer until three years ago when he underwent brain surgery, he now grows hundreds of acres of hay.

The Rev. William A. Drury will chair the meeting. Bill Drury is founder and director of the Teen Haven ministries which is sponsoring the breakfast.

All farmers, laymen, businessmen are cordially invited to hear Mel Graham. For tickets and reservations call 717-299-2061.

June is dairy month

New Wayne Tail Curler Rockets

all the features you want in one pre-starter

New Wayne Tail Curler Rockets is a totally new formula. It contains 18% crude protein with added lysine and fiber for superior performance without a looseness problem.

Added fat, 5% of the total ration, improves palatability and performance. New flavor and aroma ingredients also help make this the most palatable pre-starter ever.

We've also added Wayne's exclusive Boost 'N Iron to help give pigs the extra nutritional boost they need.

A new bag with a special liner helps keep the feed mill-fresh until used.

All of these benefits combine to make new Tail Curler Rockets the most palatable, best-performing pre-starter you ever fed. Whether you wean at 3 weeks, 6 weeks or in between, it's the only pre-starter you need to get pigs to 30 lbs. in record time.

WAYNE FEEDS
WAYNE ANIMAL HEALTH AIDS

Working Partners

And try Wayne Oral Iron, the tasty mixture of reduced iron, vitamin C, cobalt, cultured milk, sugars and sphagnum moss your pigs will love.

Watch pigs' hemoglobin index respond after eating Wayne Oral Iron. They'll consume Oral Iron even while nursing the sow.

She doesn't own a cow but... her life is centered around milking

By SALLY BAIR
Staff Correspondent

BART – Joan Probst doesn't own a cow, but her whole life is organized around morning and evening milkings. Joan, who lives in Bart, helps her husband Harold, a supervisor for the Red Rose Dairy Herd Improvement Association. Her job is an important part of Lancaster County's dairy industry.

Joan's husband has been testing milk for 21 years, and Joan has been helping him on his circuit for one year less than the length of his career. She began assisting him before they were even engaged! Family members jokingly suggest that he wanted to see if she could do the job before he would ask her to marry him. She readily admits that one reason she was willing to help him with his testing chores is so they could be free on Saturday nights.

Times have changed, and both Joan and Harold work full circuits which leaves little time off. But one of the things they like best about the job is that they can work together. Much of their time at home is spent on bookwork, and they do arrange to have at least one milking off on Sunday at the same time.

The hours are rather varied, since the supervisor must be at the farm when the milker goes on the first cow. Her days, and her husband's, begin between 3:30 a.m. and 6:30 a.m., depending upon where they are testing. She says, "I don't mind getting up early. I can make it on six hours sleep." Their days end at different times, too, and there is always several hours of bookwork in the evenings.

There is a lot of paper work to be done during the day, as well, such as preparing the samples which are mailed to the testing lab at Penn State daily. She said they must have samples to the Bart post office by 4 p.m. Their monthly postage bill is about $60, and they have nothing but praise for the Bart postmaster.

"We get very good service and I give all the credit to the postmaster. She sees that the samples go promptly." Joan noted that efficient service is especially important for herds on the somatic cell program, because the samples must be fresh for optimum results.

Working with Harold as a supervisor came naturally for Joan since she met him when he came to her father's Ayrshire herd at Rock Acres Farm in New Providence to test. She says she has encountered no difficulties because she is a woman.

"Most of the farmers knew me, and knew I had a farming background," she says. Joan had been active in 4-H as a charter member of the Ayrshire, Jersey and Brown Swiss clubs. She once had grand champion at the Pennsylvania Farm Show, and was on Lancaster county's winning dairy judging team which went on to judge at both Waterloo and Chicago. She was high individual in the Milking Shorthorns class at the national contest in Chicago.

Despite having studied to be a teacher, Joan says she would rather milk than teach. "Cows are much more cooperative than children," she notes.

Joan and Harold once milked their own cows and did testing work as well, but that got to be more than they could handle. She says she would enjoy owning cows again, but described one big advantage her job has over the dairyman.

"Every farmer hopes that his 'Bessie' will milk 100 pounds of milk when the supervisor comes. Naturally, on that day Bessie is in heat and milks only 87 pounds, so the dairyman is disappointed." Joan shares that disappointment with the farmer, but says, "I can go to another herd where 'Bessie' might make 100 pounds. I enjoy seeing cows do well, and I like to take an interest in the cows." She added, "I can understand some of their problems."

"The nicest part of the job," she says, "is the people you work with. You get to know the families and the kids. Our fellows are very good in cooperating with us." She said many of the dairymen play on softball leagues in the Summer, but they often give her a copy of the schedule, so she can schedule around their games.

She said, "We don't get too many complaints about the program." Sometimes mistakes are made and brought to her attention, but she is glad for that, "That means they're studying the sheets."

"I feel an awful lot of the dairymen really use the information they get on DHIA. One is interested in one thing, another is interested in something else, but they really use them a lot - sometimes more than you realize."

There have been many changes in the dairy herd improvement program over the 20 years of her involvement. A big change, Joan noted, "We have no more acid eating our clothes!" She is referring to the days when the supervisors did all the processing themselves. Now, however, the samples are neatly placed in plastic bags and shipped immediately to Penn State which processes them and computes the information for the dairymen. There's still plenty of paper work for the supervisor to complete so the computers can do their work accurately. There was a major change in the reporting of information last year, and Joan says, "It is much more accurate."

The somatic cell program is an example of a recent innovation to help diarymen, which Joan feels is helpful especially for those milking in parlors or with a pipeline to help them spot individual cows with potential problems. "You must keep offering more and more. The more services you offer the better it is for you."

The herds themselves have changed, Joan notes.

"When I started, a 500 pound fat herd was something to be worked for. Now there are not many under 600 pounds, and last year we had two over 700 pounds." She attributes to better feeding.

"In every area, dairy are given more informat In any agri-business will make more money they help the farmer m more money, so they help any way they can." She s farmers are taking vantage of more testing feed programs, and o more balanced ratio "There is more breeding production, and with pro bulls. But you can't production if cows are fed well," she added.

Joan stated, "T dairyman is the key to whole thing. You must ha a good man beside the co A man must be really in terested in the animal."

The work hours of a DH supervisor don't leave mu time for outside activit Joan enjoys singing in t choir at Union Presbyter Church although getting practice is sometimes struggle. She also teach eleventh and twelth grade "and beyond" in Sund School, and describes h class as "a great bunch kids." She has exhibi

(Turn to Page 43)

Samples of milk must be carefully marked and noted by the supervisor.

As a supervisor in the Dairy Herd Improvement Association, Joan carefully takes a small sample of milk which will be tested and analysed and become part of the dairymen's total production record.

Joan takes milk samples out of the car to prepare them for mailing.

Joan plays with a favorite cat on the back porch of her home.

Farm Women Societies

Lancaster Co. Society 9

Lancaster County Farm Women Society 9 met June 8 with Helen Eshleman, Wrightsville Twenty members attended, and because of the weather, the meeting, originally planned for the outdoors, was held inside.

The July meeting of the group will be the annual family picnic. Everyone is asked to bring a covered dish and folding chairs

Lancaster Co. Society 15

The 40th anniversary of Lancaster County Farm Women Society 15 was celebrated with a covered dish luncheon on June 8 at the Black Rock Retreat. Special guests at the event included Societies 4 and 20, with county officers also attending.

Following the covered dish luncheon, the meeting was opened by president Dorothy Johnson. Theme for the day was Rose Day – Roses for Memories. Each person present was given a rose and a potted begonia. A potted rose bush was presented to Mrs. Ann Diller, county president.

The annual county Farm Women picnic will be held August 2 at the County Park. All who attend are to bring a covered dish.

It was announced that a savings bond had been given to Dawn Myer, the outstanding Solanco graduate in home economics.

Dorothy A. Parmer, Lancaster, presented a program of songs and costumes.

Lancaster Co. Society 25

Donegal Mills Plantation, Mount Joy, was the setting for the meeting of the Lancaster County Farm Women Society 25. Fifteen members attended the event held on June 6.

The business meeting was held in the mill. Dorothy Elmer, president, presided.

Plans were made for the state project, "Happiness for Others". It was announced that a donation will be made to the Dairy Princess project.

Slides of the history of the plantation were shown

In July, members will play miniature golf at Indian Springs. Some of the group are also planning to attend the Lancaster County Farm Women picnic to be held August 2 at the Lancaster County Park pavilion 3.

York Co. Society 1

On June 7, the York County Farm Women Society 1 met at the home of Mrs. Blanche Strausbaugh.

Fourteen members and three visitors were present

Members decided to donate $1 per person to the York County Farm Women to take the place of a county bake sale

The York County Farm Women Society will hold their annual picnic July 26, at the 4-H Center, Bair.

Entertainment was Mrs. Chas. Riegle who spoke on roses She lives in York and has close to 600 rose bushes at her home.

The next meeting of the group will be on July 5 at the summer home of Mrs. Mabel Meads, Long Level, near Wrightsville.

York Co. Society 21

The monthly meeting of York County Farm Women Society 21 was held May 24.

The program for the afternoon dealt with vegetable gardening and flowers. Several games relating to the subject were played, and plants brought from home were exchanged by members. The afternoon included a Sarah Coventry demonstration and members are planning to sell the jewelry.

Society 21 will give $30 for the bakeless bake sale sponsored by the County Council

The next meeting will be held June 28 and the hostenn for the day will be Mora Posey.

York Co. Society 31

York County Farm Women Society 31 met at the Schindler Restaurant for a Mother and Daughter banquet recently. During the festivities, birthday gifts were exchanged.

The group's next activity will be held on June 19. Then Society 31 will entertain Society 15. The meeting will be held at the Wellsville Fire Hall, beginning at 6:30 p.m.

Hershey gets NFL football

HERSHEY – The Hershey-Palmyra Sertoma Club will present a National Football League an N.F.L. scrimmage Saturday, July 29, 1:30 p.m. at the Hershey Stadium. The reorganized Washington Redskins vs. the divisional title winner, Baltimore Colts.

She doesn't own

(Continued from Page 42)

something at the Quarryville Fair every year since it started, and she at one time exhibited canned goods, but says these days her exhibit is more likely to be wild flowers picked from the abundance growing on their lovely wooded lot.

Any other free time she has she likes to devote to the activities of her three children, Harold, Jr., 17; Debora, 15; and Dawn, 10. Harold, who will graduate from Solanco High School this year, also helps out on the testing circuit when necessary, but he will be leaving for the Marines in August. Debora is a sophomore at Solanco High School and Dawn is in the fourth grade at Bart-Coleraine Elementary School. There are wrestling matches, soccer games, and band activities to attend.

Having been raised on a dairy farm, Joan finds her job as a dairy herd improvement supervisor the next best thing to living on a farm. It allows her to get to know many cows - together she and her husband visit 100 herds and test over 4500 cows monthly. To Joan, these are not just numbers on a sheet of paper. She knows them, studies their potential, and delights with the farmer when they do well.

Her interest is an asset to the job and is a small example of the devotion evident in Lancaster County's strong dairy industry.

Junior Cooking Edition

Strawberry season is in full swing now, and can you think of a better fruit to eat with milk? It seems like Junior cookers like both strawberries and milk for we still have recipes that include both ingredients.

For your cooking pleasure this week, we have glazed strawberry pie, cream puffs, old time ice cream, milk toast, cucumber canoes, pink cow, lady finger cookies.

Keep those favorite recipes coming to the Junior Cooking Edition. Send them to **Lancaster Farming,** Junior Cooking Edition, Box 366, Lititz, Pa. 17543. Be sure to include your name, address, phone number, and age. Try to make your recipe as complete as possible, making sure you list all the ingredients and tell all the directions.

GLAZED STRAWBERRY PIE

1⅓ cup granulated sugar
½ cup water
¼ cup clear jel
¾ cup water
1/8 teaspoon salt
1 tablespoon lemon juice
2 drops red food coloring
1 quart strawberries
whipped cream

Mix sugar and water (½ cup) and bring to boiling point. Mix clear jel and ¾ cup water and add to mixture. Cook until thick and clear. Remove from heat, add salt, lemon juice, and food coloring. Then add strawberries. Cool before putting into a nine inch baked pie shell. Chill. Top with whipped cream.

Bertha Burkholder
Ephrata, Pa.

xxx

CREAM PUFFS

1 cup milk
1 cup sifted flour
4 eggs
pinch of salt
½ cup butter
whipping cream

Put milk and butter in a double boiler, let boil, add flour. Cook for two minutes. Remove from heat. Add eggs, one at a time. Then add salt. Beat well. Drop in pans. Bake at 350°F. for 45 minutes. Cool, then fill with whipped cream.

Arlene Burkholder
Age 8
Ephrata, Pa.

xxx

OLD TIME ICE CREAM

4 eggs, separated
1 pint whipping cream
½ cup sugar or more
1½ teaspoon vanilla
fruit, if desired

Beat egg yolks until they are very light, then add sugar, continue beating. In another bowl, beat whipping cream. Next beat egg whites, blend all together. Place in freezing section of refrigerator and chill until firm. A cup of fruit may be added. In two to three hours, you will have generous servings for eight.

Maria Burkholder
Ephrata, Pa.

xxx

MILK TOAST

1 cup milk (scalded)
2 slices of bread, toasted and buttered
syrup

Scald the cup of milk. Toast and butter the two slices of bread. Dip the toast in the milk and serve on a plate. Pour on the syrup and eat.

xxx

CUCUMBER CANOES

1 cucumber
¼ cup cream cheese
2 tablespoons smooth peanut butter
2 tablespoons chopped peanuts

Peel the cucumber with a vegetable parer, always paring in the direction away from you. Scoop out the seeds and set aside, after cutting the cucumber in half, lengthwise. Add the peanut butter and cream cheese and blend well. Pat the cucumber halves dry with a paper towel and fill with the peanutty mixture. Chill before serving.

xxx

PINK COW

12 scoops vanilla ice cream
2 tablespoons crushed strawberries
2 tablespoons crushed pineapple
cold strawberry soda

In a tall glass, put vanilla ice cream and crushed strawberries. Add crushed pineapple. Fill the glass with cold strawberry soda.

Susan Dodrer
Age 7
Littlestown, Pa.

xxx

LADY FINGER COOKIES

4 cups brown sugar
2 cups butter
1 cup sweet milk
4 teaspoons cream of tarter
4 teaspoons baking soda
4 eggs
flour-enough to roll, about 8 cups

Cream together butter and sugar. Add eggs and beat well. Next add soda and cream of tarter. Add milk and flour alternately. Beat well. Roll and cut into shapes. Bake at 350°F for eight to ten minutes Decorate with icing.

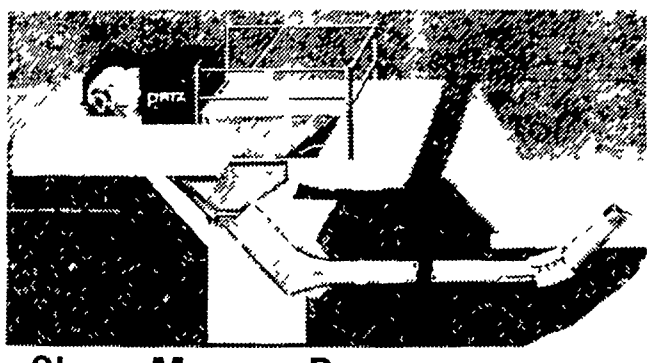
The old strongarm method of Manure Handling gives way to new muscle from PATZ — namely the Slurry Manure Pump and compressed-air Liquid Manure Mover These modern methods of manure movement provide simplicity, rugged construction, operational ease dependability, plus convenience



Slurry Manure Pump

Slurry or free flowing manure is pumped from a 180 gallon hopper under ground through 12 in PVC pipe to the manure holding area (If bedding is used only fine cut is recommended) Stroke is adjustable and driven by tough roller chain drive/reduction unit Plunger sleeve and one-way valves all can be removed for servicing

Liquid Manure Mover

Big 1700 (US) gallon below-ground pressure vessel collects slurry that is moved simply and easily by as little as 10-12 lbs of air pressure through 12 in PVC pipe to manure storage area Simplicity in design turning swing-away hatch cover one-way valve at bottom and flapper valve at the discharge end are the only moving parts

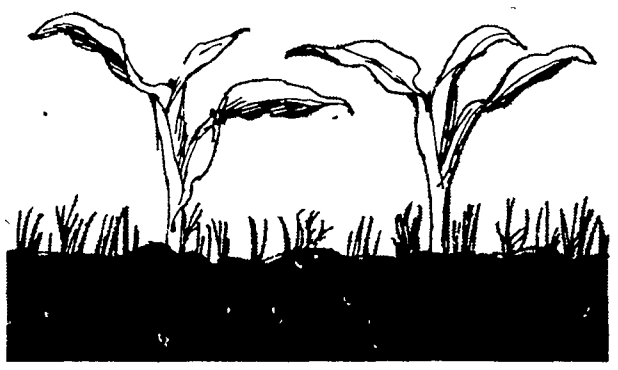
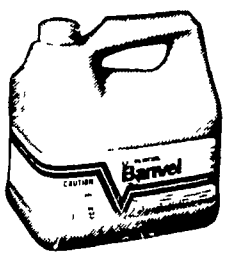
Banvel® + atrazine



herbicide tank-mix combination kills young, tough broadleafs, vines, grasses before they damage your corn.

Banvel + atrazine together do a broad-spectrum job on weeds resistant to 2 4 D and not controlled by atrazine alone including tough to-control foxtails Canada thistle cocklebur smartweed velvetleaf and others

Spray up to 3 weeks after planting when grasses are less than 1 1/2 inches tall Season long control usually results when Banvel + atrazine is applied according to label instructions



Order Banvel herbicide plus atrazine today as an important step toward total farm weed control

Note Before using any pesticide read the label

Community House Cheese Pie Supreme is sure to bring a smile to your face.

COMMUNITY HOUSE CHEESE PIE SUPREME

2 pounds cream cheese
1 cup granulated sugar
3 large eggs
1½ teaspoons vanilla
Juice of one lemon (add yellow color and salt to taste)

Topping:
14 ounces cream cheese
¼ cup sugar
¾ cup sour cream

Crust:
18 graham crackers
¼ cup sugar
½ cup butter

Mix crust ingredients well. Line two large (nine inch) pie pans. Combine first five ingredients and place over crust. Bake at 350 degrees F. about 30 minutes, then place topping over filling. Bake 10 more minutes at 350 degrees F. Be careful to watch – do not over bake.

Mrs. Howard Shaw
Dallastown, Pa.

JUNE is Dairy Month

Say 'cheese' with cheesecake

The crowning touch to any meal, the most important course of all, according to man and boy, is the dessert. No matter how delicious everything else that precedes it, everybody looks forward to the conclusion. And, what more elegant, rich dessert to please family and friends than cheesecake.

This week we have 10 varieties of cheesecake and pie for everyone to enjoy. They're all different, so try them all out and pick your favorite. And, while you're at it, have a delicious time sampling each one and deciding your choice.

CHEESECAKE

2 (8 ounce) packages cream cheese
3 eggs
½ cup sugar
1 teaspoon vanilla
Topping:
¾ cup sour cream
¼ cup sugar
1 teaspoon vanilla

Cream the cheese, add sugar and eggs, as well as vanilla. Put into nine-inch pie plate. Bake at 350 degrees F. for 35 minutes. Cool for 15 minutes. For topping, mix sour cream, sugar, and vanilla. Spread on top of cake. Bake for 15 minutes at 350 degrees F.

Sara Nice
Souderton, Pa.

xxx

CHEESECAKE

1 pound cottage cheese
1 pound cream cheese
1½ cups sugar
4 eggs
1 teaspoon vanilla
½ teaspoon lemon juice
¼ pound melted butter
1 tablespoon flour
1 tablespoon cornstarch
1 pint sour cream

Mix cottage cheese, cream cheese, and sugar in large bowl. Beat until very creamy then blend in eggs, vanilla, lemon juice, melted butter, flour, cornstarch, and sour cream. Beat until well blended. Bake in nine-inch spring form pan at 350 degrees F. for one hour. Then, turn heat off and open oven door, not touching the cheesecake. Let stand for three hours Chill for about five hours and then serve.

Mrs. Ray W. Seidel
Lenhartsville, Pa.

xxx

CHEESE CUSTARD

1 cup cottage cheese
½ cup sugar
1 cup sweet cream
5 eggs, separated
¼ cup melted butter
¼ teaspoon grated nutmeg

Beat egg whites Combine all the ingredients, adding the beaten egg whites last Put in a 10-inch pie crust and bake at 350 degrees F for 40 minutes or until done

Mrs. Ray Seidel
Lenhartsville, Pa.

xxx

CHEESE PIE (CUSTARD)

3 egg whites
1 pound cottage cheese
3 egg yolks
1¼ cups sugar
¼ teaspoon salt
3 tablespoons cornstarch
1 can evaporated milk
2 cups milk

Beat egg whites until stiff and set aside. In another bowl cream cottage cheese and egg yolks. Add sugar, salt, cornstarch, evaporated milk, and milk. Mix all together well. Add stiffly beaten egg whites last. Bake 10 minutes at 450 degrees F., then at 350 degrees F. for 30 minutes. Makes two two quart custards.

Sara Nice
Souderton, Pa.

Home on The Range

CHERRY CHEESE PIE

9-inch baked pie shell
1 can (1 pound 5 ounce) cherry pie filling
4 packages (3 oz. each) soft cream cheese
½ cup sugar
2 eggs
½ teaspoon vanilla extract

Preheat oven to 425 degrees F., Prepare pie shell. Spread half of cherry pie filling in bottom; set aside rest of filling. Bake shell for 15 minutes or until crust is golden. Remove from oven. Reduce oven temperature to 350 degrees F. Meanwhile, beat cheese with sugar, eggs, and vanilla until smooth with portable mixer or blender. Pour over hot cherry pie filling, bake 25 minutes at 350 degrees F. (Fillling will be slightly soft in the center.) Cool completely on wire rack. Put remaining cherry pie filling on top and serve.

xxx

CHEESE PIE

1 (8 ounce) package of cream cheese
2 cups milk
5 tablespoons sugar
1 tablespoon flour
3 eggs

Mix milk into cheese Beat eggs, etc Then fold together all ingredients Bake in one nine-inch unbaked pie shell for 30 to 35 minutes, then at 425 degrees F. for 10 minutes Bake at 350 degrees F until the pie is set Makes one pie.

Mrs. Timothy Snyder
Pitman, Pa.

xxx

RHUBARB CUSTARD

1 (8 ounce) package cream cheese
6 eggs
1 can evaporated milk plus fresh milk to equal six cups milk
2 cups sugar
1 teaspoon vanilla
3 cups chopped rhubarb

Cream together cream cheese, eggs, and sugar. Add other ingredients and bake in three nine-inch unbaked pie shells at 425 degrees F. for 10 minutes than turn oven to 350 degrees F. and bake until custard is set.

Mrs. Timothy Snyder
Pitman, Pa.

xxx

CHEESE BREAD

1 egg
1½ cups milk
3¾ cups biscuit mix
1½ teaspoons salt
1 cup cheddar cheese, finely shredded
1 tablespoon onion, minced
1 tablespoon poppy seed

Grease bottom of 9 by 5 by 3 inch loaf pan. Blend egg and milk well. Add remaining ingredients and mix well Beat vigorously for one minute. Pour batter into pan and sprinkle with poppy seeds. Bake 50 to 60 minutes at 350 degrees F. Cool on wire rack for five minutes. Remove from pan. Slice and serve warm.

CHERRY COTTAGE CHEESE CAKE

3 eggs, separated
½ cup sugar
1¾ cups cottage cheese
1 tablespoon rum
1 (15 ounce) can pitted cherries
2 cups whipping cream
6 tablespoons butter
⅔ cup semolina
1 teaspoon baking powder
Grated rind of one lemon

Separate the egg yolks from the whites. Cream the butter with the sugar until light and fluffy. Beat in the egg yolks and then the semolina. Push the cottage cheese through a strainer until smooth and add to the creamed mixture with the baking powder, rum, and lemon rind Drain the cherries, reserving the can juice. Stir the cherries into the cottage cheese mixture. Beat the egg whites until stiff, then fold into the mixture. Spoon into a greased 9 x 13 inch baking dish and bake in a moderately hot oven (400 degrees F) for 40 minutes. Whip the cream with four to five tablespoons of the reserved cherry juice until stiff Allow the cherry cake to cool very slightly before serving, topped with the cream. Serves six.

BOUT MAKING JAMS ND JELLIES IN YOUR MICROWAVE?

ne of the greatest joys of nmer is the abundant ply of fresh fruit. And one he best ways of capturing ie of the fresh, sweet ors for year round en- ment is by making jams jellies

If you are the proud owner of a microwave oven, you can make your jams and jellies in it without the danger of sticking and scorching that sometimes happens on the top of the range.

Do not expect a great time-saving because you will be working with fairly large quantities Also, jams and jellies, can boil over almost as readily in the microwave as in a saucepan, so make sure you allow "boiling room" of at least four cups extra space in your dish.

Your jam or jelly mixture will boil first on the top surface. You will need to stir your mixture several times until it boils throughout. If you use commercial pectins, this step is very important because a full boil is required for the pectin to properly set.

Fruits naturally contain pectin which make jams and jellies set up. I often use additional pectin to assure consistent results. When you do not add pectin, the mixture must cook long enough to evaporate the extra fruit juice. Also there should be a combination of riper fruit, to give good flavor, and less-ripe fruit to provide the pectin.

Either the powdered or liquid pectin can be used. Powdered pectin is added to the fruit and boiled so it will dissolve before the sugar is added. Liquid pectin is added with the sugar because it is already dissolved.

Strawberry-Rhubarb Jam

(Use this recipe as a guide for cooking times when powdered pectin is used.)

1-½ pints fresh strawberries
2 cups sliced rhubarb
1 package (1¾ oz.) powdered fruit pectin
4 cups sugar

Crush berries to make 2½ cups; combine with rhubarb in a 2-quart glass bowl. MICROWAVE (high), covered for five minutes or until fruit is softened. Stir in pectin. MICROWAVE (high), uncovered for 3½ minutes or until mixture boils, stirring once. Stir in sugar. MICROWAVE (high), uncovered, three to four minutes or until mixture boils hard for at least one minute. Pour into hot sterilized jars; seal. Makes five cups. Store in your freezer.

Peachy Apple Jam

(Jams can be thickened with flavored gelatins.)

3 medium-sized tart apples
5 to 6 fresh peaches, peeled
1 lemon
4½ cups sugar
1 package (3 oz.) apple-flavored gelatin

Quarter and core apples. Halve peaches and discard pits. Remove ends of lemon and discard. Cut lemon into slices, removing seeds. Finely chop or puree the fruit in a blender or food processor. Combine 4½ to five cups of fruit mixture with sugar in three-quart glass casserole. MICROWAVE (high), uncovered, 20 to 25 minutes or until mixture boils hard and fruit becomes transparent. Stir once or twice. Stir in gelatin. MICROWAVE (high), uncovered, 2½ to 3½ minutes or until mixture boils. Pour into hot sterilized jars; seal. Makes eight cups.

Apple-cot Preserves

(These preserves require longer cooking since there is no added pectin.)

5 medium apples, cored
2 tablespoons lemon juice
2 packages (6 oz. each) dried appricots
2 cups water
5 cups sugar
1 can (6 oz.) frozen orange juice concentrate, thawed.

Chop apples and combine with lemon juice in three-quart casserole. Cut apricots into quarters; add to apples. Stir in water. MICROWAVE (high), uncovered, 15 to 20 minutes or until fruits are softened, stirring every five minutes. Stir in orange juice and sugar. MICROWAVE (high), uncovered, 15 to 20 minutes or until desired thickness. Pour into sterilized jars; seal. Makes nine cups.

Usually, jam mixtures foam during boiling and it is necessary to skim off the foam because it interferes with a good seal. However, you will find very little foam on your microwaved jams, so you will be able to pour them immediately into hot glasses. You will also find that the fruit pieces will not float as much if you cool the jam a few minutes before you fill the jars.

Fiddlers contest set

BALTIMORE, Md. – The seventh season of Deer Creek Fiddlers Conventions begins on June 18 in Norrisville Flats, Maryland. At this 17th convention, bluegrass and old time string bands will compete beginning at 2 p.m. at the big oaken stage beside a stream.

Musician and audience gather around noon. To get there, one should follow the Jarrettsville Pike, Route 146, north out of Baltimore for about 20 miles; then turn left at Madonna onto Route 23 to travel west and northward for about 10 miles almost to Norrisville. Next one should turn right on Harkins Road, Route 136, for about one mile eastward, then turn left on Carea Road for 1 mile north, then right on Channell Road for 1 mile east. Next a small bridge is crossed and immediately one turns right down the country lane.

Deer Creek Fiddlers Conventions are family entertainment. Children are free when with their parents. Tickets are $5 at the gate, or $4 in advance from Dave Greene, 500 East 42nd St., Balto., Md., 21218.

Look Into The Advantages Of A Swine "Castle"

AGSTAR® THE QUALITY BUILDERS

WE WILL EXPAND YOUR HOG BUSINESS FOR LESS DOLLARS
LET US SHOW YOU HOW!

To see why our factory-built Sow, Pig, or Hog CASTLES can work so much better for you than other types — take a look inside

Here are just some of the features that add up to more comfortable sows and more pigs saved in our Sow CASTLE models fast growth and economical gains in our Pig CASTLE (nursery) and Hog CASTLE (finishing) models **Great ventilation and heating** Superior ventilation means all animals get fresh, temperature controlled air constantly Fan forced heating, and adjustable draft-free fresh air inlets at the roof peak keep animals confortable and thrifty in any weather

A building that's easier to manage. Features like rigid white fiberglass walls, slotted metal flooring, waterproof electrical fixtures — these make it fast and easy to pressure-spray and sanitize the entire building So it stands to reason that if sanitation is easier, there'll be less disease, less stress on swine (and you), less feed used per pound of gain, and more profit on every animal

Best of all — it's factory built. This means it's virtually an "instant" building When it's delivered to you it's complete with all equipment, plumbing, electrical fixtures You don't need to mess with contractors or workmen

Obviously, we can't give you in one ad the whole picture of why our Swine CASTLES are right for you But if you'll use the coupon, or call us, we'll send you our factual, illustrated literature that does it far better No obligation, of course

Ida's Notebook

Ida Risser

Gardening is growing fruits, flowers, or vegetables on a piece of ground, usually close to a house. I feel that the last phrase, "close to a house" is one of the keys to a successful garden. With the best of intentions, a garden is often neglected if it is too far away. An everyday or every-other-day visit to see what is happening is quite essential.

One needs to check for insect damage, invasion by worms, birds and four-legged creatures. Also there is the important job of harvesting the crop at the peak of perfection. I feel it is one reason that some people become disenchanted with gardening, not only don't they enjoy weeding but the finished product doesn't come up to their expectations of excellence.

Maybe gardening can rub off on others. At the present time, I'm amazed that our three children, who live away from home and hold down full-time jobs, are each working on a garden. It is interesting to hear at what time crops are harvested in the state of Oregon. Our son at State College has decided to have a small garden near his house, rather than a distant plot, in order that he can keep an eye on it. Our other son took a day off from work to start his garden after borrowing our rototiller as we don't use it. All my gardening is done with my trusty hoe. Even though it is his first garden and started rather late, I'm sure he will learn a lot from it.

I often say that our family "travels on its stomach." It seems that I'm always cooking a dessert on the stove for the next meal while I'm doing dishes from the present one. It's a perpetual job to keep food on hand – especially if you have a teenage son who seems to have a hollow leg which can't be filled.

IFYE delegate chosen

Susan Iseminger

WEST CHESTER -- Suzanne Iseminger, the daughter of Mr. and Mrs. George Iseminger, Malvern, has been chosen to be an International 4-H Youth Exchange delegate to Belgium. Sue will be departing June 18 and returning in late October of this year.

IFYE is a cultural exchange program. While in Belgium, Sue will be living and working with several different rural families to experience their way of life. Belgium will be reciprocating by sending several young people to the United States for a similar experience.

Sue was a member of the Bacton Hill and Tri-Community 4-H Clubs, a 4-H teen leader and a member of the County 4-H Council. She was a member of the Chester County 4-H vegetable judging team, the potato judging team, and the poultry judging team. Her poultry judging accomplishments led her to national competition where she placed ninth in production division.

In the summer of 1977, Sue worked with citizenship programs at the National 4-H Center in Washington, D.C. Sue was also chosen to attend the 1977 National 4-H Congress in Chicago, to work with the Press-Radio-TV Committees. When she returns, Sue will be available to present programs to clubs, organizations, church and civic groups November thru January: other dates will be subject to confirmation. Anyone who is interested in a program should make scheduling arrangements through the Chester County Cooperative Extension Service.

Berks Countians give $1030 to 4-H fund

LEESPORT, Pa. – Rod Sutliff, chairman of the Berks County 4-H Center Committee, and Leon Kirkhoff, chairman of the Berks County 4-H Development Council accepted funds recently for the Berks County 4-H Center.

A total of $1029.57 was donated by Mr. and Mrs. Dave Phillips, Leesport R1, for a memorial to their daughter Janine Phillips and $750.00 was donated by The Berks County Society Farm Women from proceeds they raised at their annual hoedown.

The money will be used to build a secretary stand and announcer booth in the vicinity of the previously constructed horse rings. So far this year, four shows have been scheduled for the rings to help collect revenue for the proposed 4-H Center. The first show is scheduled for July 8 and 9 by the Schuylkill Valley POA Club.

Clyde Myers, Berks County Extension Agent noted that the 4-H Fair will be held on the grounds on August 24. Any club or organization interested in helping the Berks County 4-H reach its goal of building the center of in using the facilities already completed, can contact the 4-H office at 378-1327.

Berks County holds dairy cooking contest

WYOMISSING – Creamy nion soup prepared by nnette Ferguson, Wer-ersville, was selected as the rand prize winner in the erks County dairy products ooking contest. The contest held annually as part of ctivities scheduled during airy Week. This week takes place at the Berkshire Mall, Wyomissing, on June 12 to 17.

Those recipes accepted for the contest could be entered in one of eight categories and had to contain at least one dairy product. The best six entries in each category were then prepared by the contestants and brought to the mall on June 12 for final judging. The qualities judged were: use of dairy products, flavor, originality, ease of preparation, and appearance.

First place winners for each category received a gift certificate for $10 and the grand prize winner received $25. The winning recipes follow:

CREAMY ONION SOUP

¼ pound butter
5 cups thinly sliced large onions
5 chicken bouillon cubes
3 cups milk
1½ cups light cream
3 cups water
1½ teaspoon salt
¼ teaspoon pepper

Saute onions in butter till golden. Dissolve bouillon cubes in water. Add milk, bring to boil, then add browned onions and simmer 10 minutes. Add salt and pepper, slowly stir in cream. Place melba rounds in bowls, pour soup on top. Sprinkle with cheese. Makes six servings.

Annette Ferguson
Wernersville, Pa.

The Magic Cow (Patty Dreisbach, Hamburg) and diary princess contestants hand out "Bossy the Cow" decals to children. The princess contestants are: (left to right) Bonnie Davis, Mary Ann Weyer, and Eileen Rohrbach. David Kopfer, passer-by, takes a decal.

DRIED BEEF CASSEROLE

8-10 boiled peeled potatoes (slice ½ of them into 2½ qt. casserole)

Sauce:

¼ pound dried beef
2 tablespoons flour
2 cups milk
1 cup cheese (any kind, grated)

Fry beef slightly in two tablespoons butter, add flour and mix well. Add milk and cheese. Cook until thickened as white sauce. Pour half of sauce over half of potatoes. Add rest of potatoes and rest of sauce. Mix two tablespoons bread crumbs and one tablespoon butter. Sprinkle on top and bake 30 minutes at 350°F. Serves six to eight.

Rosanne Smith
Kutztown, Pa.

xxx

GROFFS' MILK PUNCH

1 pint milk (2 cups)
1 cup vanilla ice cream
1 pint lime sherbet
1 cup lemon-lime soda

Mix ingredients in blender until frothy. Serves six (¾ cup).

Suzanne Groff
Quarryville, Pa.

PINEAPPLE CHEESE DELIGHT

Crust:

18 crushed graham crackers (9 double)
1 tablespoon granulated sugar
¼ pound butter

Filling:

2 (8 ounce) cream cheese
⅔ cup sugar
1 teaspoon vanilla
3 eggs
1 can crushed pineapple, drained (large or small can)

(Turn to Page 50)

Winners in the Berks County dairy products cooking contest receive their gift certificates from Mrs. Robert Dreisbach, chairman of the contest. Left to right, the individuals are: Mrs. Dreisbach, Roasanne Smith, Kutztown, first place casserole; Elaine Cammauf, Mohrsville, first place cakes; Mrs. Paul Youse, Oley, first place cheesecake; and Nedra Yoder, Shoemakersville, first place desserts.

Berks County

(Continued from Page 49)

Bake in crust at 375°F. for 30 minutes. Cool for about 20 minutes.

Topping:
½ pint sour cream
½ teaspoon vanilla
1 tablespoon sugar
Few drops lemon juice

Spread on top and bake at 450°F. for eight minutes.

This may be made in a 9 inch dish or a 9 inch x 4 inch dish. Serves 10 to 12.

Mrs. Paul Youse
Oley, Pa.

xxx

ORANGE PINEAPPLE PIE

2 (8 ounce) softened cream cheese
1¼ cups confectioners sugar
¼ cup fresh orange juice
Grated rind of 2 oranges
3 teaspoons lemon juice
1 small can crushed pineapple, drained
Orange food color (red and yellow mix)
½ pint heavy whipping cream
9 inch graham cracker crust
Toasted coconut and/or mandarin orange slices and/or marashino cherries.

Beat cream cheese, sugar, juice and rind until fluffy. Stir in lemon juice, pineapple and coloring; blend well. Whip cream until stiff; fold cheese mixture into whipped cream. Pile into prepared crust and chill. Top with coconut, mandarin oranges or cherries.

Joyce Miller
Hamburg, Pa.

xxx

SNAPPY CHEESE DIP

½ pound sharp cheese (cheddar)
¼ pound bleu cheese or roquefort
3 ounce cream cheese
Minced onion or chives
Heavy cream
Paprika

Mash or grate cheddar and bleu cheeses fine; blend with cream cheese and enough heavy cream to beat until fluffy. Mound on plate, sprinkle with paprika, and serve with assorted crackers

Also delicious served with fruit as a dessert

Annette Ferguson,
Wernersville, Pa.

xxx

STRAWBERRY BAVARIAN

3 packages strawberry flavored gelatin
1 cup hot water
1 cup ice water
2 packages (10 oz.) frozen strawberries
2 cups whipped cream
1 angel food cake (10 inch)

Dissolve gelatin in hot water. Add ice water. Chill until slightly coagulated. Beat until light and fluffy (with fork). Add drained berries (cut up). Save juice! Fold berries and whipped cream into gelatin mixture. Tear cake into bite size pieces. Alternate gelatin mixture and cake in angel food pan (10 inch tube, preferably one that separates). Chill overnight. Turn out on serving plate. Spread on glaze.

Glaze:
1 cup strawberry juice
1 tablespoon corn starch
3-4 drops red food coloring
1 teaspoon soft butter

Add corn starch to a little of the strawberry juice. Add the rest in the sauce pan. Cook until clear (three to five minutes). Remove from heat, add color and butter. Cool thoroughly. Drizzle over cake. Keep refrigerated. Serves 12 to 14. to 14.

Nedra Yoder,
Shoemakersville, Pa.

xxx

CHERRY PUDDING CAKE

⅓ cup butter, creamed
1½ cup sugar
2 eggs, well-beaten
2¼ cups flour
1½ teaspoon baking powder
½ teaspoon salt
1 cup milk
1 can sour pitted cherries, drained
½ cup chopped nuts

Cream butter, gradually add sugar, creaming together until fluffy Blend in beaten eggs. Sift flour, baking powder and salt. Stir into creamed mixture alternately with milk Blend in cherries and nuts Pour into well-greased and floured pan (8 inch x 12 inch) Bake in 350°F oven for 50 minutes Serve plain or with Hot Ch[illegible]

Hot cherry sauce:
½ cup sugar
2 tablespoons cornstarch
Pinch of salt
¾ cup cherry juice
1 cup water
¼ teaspoon almond extract

In top of double boiler mix sugar, cornstarch, and salt; add cherry juice, water and almond extract, stirring until smooth and thick.

Elaine Cammauf,
Mohrsville, Pa.

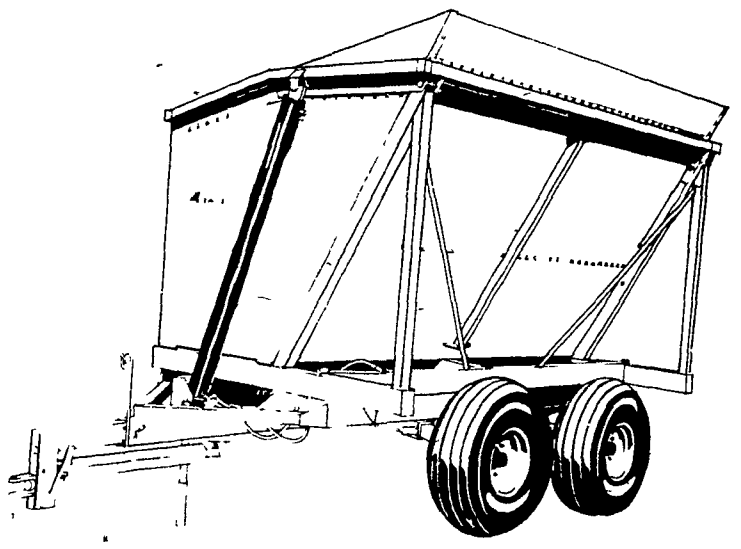
SAVE TIME AND MONEY MOVING CROPS



Whatever your tough hauling job may be, save time, labor and equipment costs with an Avco New Idea Hydaulic Dump Box.

Choose from two styles and three box sizes for rapid transfer and easy handling of material. New Idea offers three types of running gears: single, tandem or 4-wheel auto-steer. Ideal for seed corn, sweet corn, corn silage, haylage, shelled corn, small grains, sugar beets or dry chop materials. One all-purpose dump box will reduce your material transfer time and improve transport vehicle and driver efficiency.

YOU GET MORE HAY AND BETTER QUALITY HAY WITH THE MODEL 299 MOW/DITIONER

It does three jobs for you in a single pass — cuts a full 9 feet 3 inches, conditions and swaths or windrows — under just about any field condition.

The "Quick-Response" header flotation means less damage to guards and sickle on rough fields, and gives you more hay by maintaining a uniform stubble height.

Not only are you saving time, you're making higher quality hay with minimum damage to the valuable, nutrient-loaded leaves.

The "Spiral Press" conditioning rolls run lug-on-lug to intermittently flatten stiff plant stems and is gently to tender leaves and short stems.

Maintenance is quick and simple, so you can spend more time in the field.

Put all of these things together, and you'll see why Mow/Ditioners are making sense to more and more farmers.

Rugged cutterbar gives you long life. The cutterbar is formed from one piece 3/8-inch steel and welded to the deck sheet to form a box section for maximum strength.

Adjustable windrow shields match drying and pickup width requirements. Convenient handles adjust either shield independently. A quick-adjust swath deflector slows and fluffs material for better air circulation and fast drying.

High-flotation tires distribute the weight evenly and because they are located up close to the machine center of gravity, they provide excellent balance and weight distribution to minimize sidedraft.

"Quick-Response" header flotation means uniform stubble height and minimum guard and sickle damage in each of six cutting positions. A unique pivot arrangement on the main frame, combined with the up-close position of the low profile, high flotation tires, quickly raises the cutterbar over obstacles. This design simply scissors the tongue and main assembly with the help of two adjustable springs.

Four-bar pickup reel lifts downed crop for a quick, clean cut, then sweeps it uniformly, butt first, into the conditioning rolls.

Wobble box knife drive gives fast cutting action for field travel — up to 8 mph.

Disc-type slip clutch provides complete drive line protection against shock and overloading.

Overrunning clutch protects both the gear box and the tractor from sudden deceleration.

My Thoughts ...

And welcome to them

By JOANNE SPAHR
Assistant Editor

Farm fathers give "lazies" like me a pain in the neck.

Oh, it's not that the ag dad paddles his children often or even punishes them very much No, instead of that, the farm father has an annoying habit of "good exampling" his children to death, a tactic in the war between disciplinarian and child which is hard to fight.

For instance, after spending an entire day (11 a.m. to 11 p.m.) -- watching soap operas, then game shows, then the news, and, finally, evening television, it is extremely hard for even a lazy 12-year-old to face a father who comes in at 11 15 p.m after having pulled plants, planted tobacco, milked 30 cows, washed the milking equipment, fed the livestock, worked on broken machinery, and, finally, at 11:30 p m., mowed the yard with the aid of a spotlight on the front of his mower

That particular situation, which is extremely embarrassing to "lazy 12-year-old" becomes even more sticky when it is pointed out that it was "lazy's" responsibility to do the mowing.

Then, there are the times when every not-overly-ambitious farm female tries the trick of lying in the sun in order to get a tan Of course, "good example", himself, has to ruin "not overly's" peace of mind by whirring past, combining the nearby wheat field "Good example" is, of course, perspiring a river and being subjected to all sorts of chaff flying over him in the blazing sun

Again, that situation is enough to shame "not overly" into gathering up her towel, sun tan lotion, sun screen and hurrying to become a little more overly

Ah, yes, farm fathers do have a way of "good exampling" their black sheep progency into action And, it's that good exampling which has produced generation upon generation of good examples to keep the integrity of farm families alive.

Happy Father's Day, all you good example out there!

Sure Stopper

A widow recently married to a widower was talking to a friend "I suppose your husband does a lot of talking about his first wife?" "Not any more," the newlywed said "How'd you stop him?" was the query "I just start talking about my next husband"

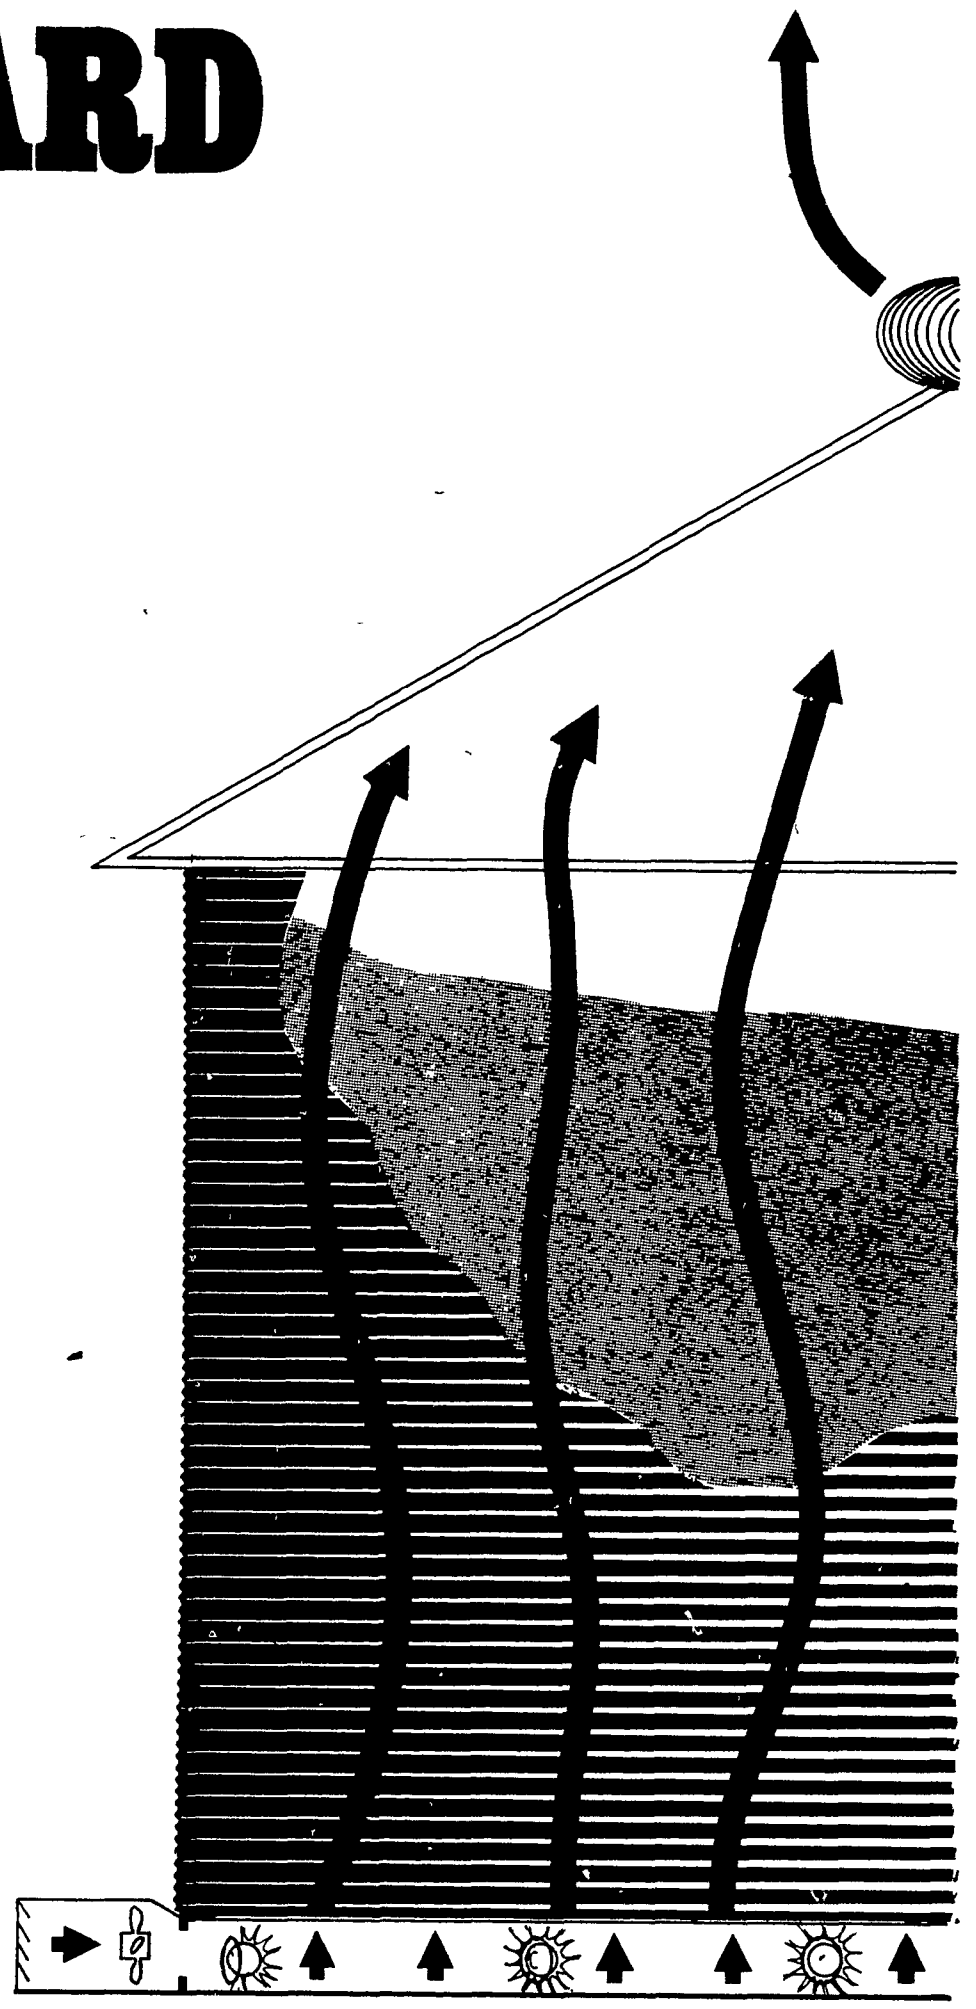
YOU'VE HEARD THE TALK.

There's a better way to dry grain. It's called CHILLCURING™ because it means drying without heat. Here's what the talk is all about.



THE GRAIN

Every kernel of grain is alive when it comes out of the field. It is a seed, able to grow because it has the ability to take on moisture. Likewise, it can be kept in a state of preservation by removing the moisture already in it.

But by heating the grain to dry it, the seed life is destroyed.

By *removing* heat and moisture from the grain, it becomes dormant, and stays alive. Then it can ripen to full weight, losing only water while keeping valuable protein, starches and sugar.

THE SYSTEM

It's simple. Grain goes from the field right to the bin. With the unique AIRFRAME™ and AIRFLOOR™ the grain rests on a solid bed that allows maximum ventilation.

Clean dry air is the best curing medium for the grain. GRAINLAMPS™ provide electric sunshine, cleaning and drying the air beneath the floor, before it passes through the grain.

Fans force air under the floor. Rising through the grain, this dry outside air carries away moisture and heat.

At the peak of the bin a jumbo 40" turbine, the WHIRLCOOLER™, puts nature to work for you. Wind and rising air keeps it turning, venting the system naturally.

A special HARVESTAT™ Control System monitors the curing process. A simple setting controls the GRAINLAMPS™ to make best use of free, natural air.

THE FACTS

Shrinkage factors vary from 1.25% to 1.75% per point of moisture removed. Drying charges have been from 1¢ to 2¢ per point of moisture removed. This cost will only go up.

In this comparison, grain moisture is 27%.

Commercial Gas-drying for storage. 13,000 bu. corn dried to 13%				**HARVESTALL® GRAIN CHILLCURING™** 13,000 bu. corn cured to 15½%			
Shrinkage — 1890%				Shrinkage — 0690%			
Drying — 21/bu				Drying — 03/bu			
13,000 x	1890	=	2457 bu. shrink	13,000 x	0690	=	897 bu shrink
10,543 x 2 50		=	26,357 50	12,103 x 2 50		=	30,257 50
13,000 x	21	=	2,730 00	13,000 x	03	=	390 00
			$ 23,627 50				$ 29,867 50

GRAIN CHILLCURING™:	29,867.50
Gas-drying	23,627.50
Extra income from your own HARVESTALL® SYSTEM:	**$ 6,240.00**

Harvestall's GRAIN CHILLCURING™ process removes only water, not valuable protein, starch and sugar. So shrinkage is only .06% compared with 1.35% using heat. You keep perfect quality grain at 15.5% moisture.

CHILLCURING™ is right for grain. And right for you. The CHILLCURING™ System pays for itself in about three years. That's what all the talk is about.

HARVESTALL

Working with tobacco crop makes her happy

By JOANNE SPAHR

WASHINGTON BORO – Larry Fry, Washington Boro R1, has a built-in barometer telling him when it's time to plant tobacco – his wife's whole disposition perks up.

"My husband says to people, 'Did you notice how happy my wife is getting now that we're going to start planting'," laughs Georgia Fry, "And, you know, it's true. I really do enjoy working in the tobacco. It makes me feel needed – like I'm contributing to the farm."

And, she really does her part. She and her husband farmed over 40 acres of this particular cash crop last year and the year before. This year, however, they are cutting down to 25 acres.

Up until a month ago, when they hired a full-time employee, the extensive manual labor involved in raising tobacco fell almost entirely on their shoulders. And, with Larry supplementing the family income by doing excavating on the side, Georgia found, and still finds, herself in the position of carrying a good sized load of the work.

"But, I love it!" she states. "You might think I'm telling you a story, but I like being in the outdoors and working in the tobacco as much as some other farm wives like hobbies and social events. In fact, I like it so much that it's no real chore for me."

Farming 47 acres, like they have done in the past, and even farming 25 acres, is a tremendous task for two people with only part-time help. But, Larry and Georgia do it for a reason.

"Tobacco is what got us started," noted Georgia. "You can get the most money for the least investment. We eventually want to own a farm of our own, and to get a start, we went with tobacco." At present they live on a farm owned by Georgia's mother and rent another one for a total of 130 acres.

Linda points out that farming as many acres of tobacco as she and her husband do is not feasible for a person who also raises livestock.

"You just can't do it," she says. "Tobacco and livestock both take too much time. But, we can afford to spend the time on tobacco because we don't have the livestock." They do raise 40 acres of wheat and 40 acres of corn, also used as cash crops.

Right now (June through July) is probably one of the busier times of the year for the Frys. Linda, who prepared the beds for seeding back in April, and who keeps them watered everyday (unless it rains) for as much as three and four hours, starts pulling plants at 7 a.m.

Now that the Frys have a full-time employee, he also helps out with this chore. Except for going into the house to make meals and take care of her youngest child Rebecca, age 2½, Georgia will continue pulling plants until dark, at which time Larry is usually home, and they begin planting. Two part-time helpers also come to help pull plants at 6 p.m.

"Right now Larry is excavating, so we plant in the evenings in the dark when he is home," she explains. After pulling plants all day, the Frys will sometimes plant until midnight.

"Right now it's rushed because you don't have a lot of time to get the plants into the ground. But, once that's done, we usually only work until dark," Georgia explains.

Even though there are many days with lost hours of sleep until all the acreage is planted, Georgia notes that they try to make up their sleep when it rains or on days when they don't plant.

"It's also kind of pushed over cutting time," she notes. "In fact, I'd say all last year, with 47 acres, was pretty rushed. Everything ran together." With that total acreage, they had to hoe harrow their first acres of tobacco while still planting their last, and so on through the season. The first acres were always more advanced than the last and, therefore, required different processes done to them.

This year, hopes Georgia, the situation will be different.

She notes that she does helps hoe harrow, top, cut, and strip tobacco as well as pull and plant.

"As soon as they start cutting, I'm out there all the time," she states. Not afraid of a little hard work, Georgia spears, cuts, and helps hang the fully grown tobacco. She doesn't like to get up on the rails, however. Instead, she prefers to stay on the wagon.

"To me, planting and pulling is not hard work. It's

Bacteria in milk may have health benefits

ROSEMONT, Ill. – People around the world have long enjoyed cultured and culture-containing dairy products.

Yogurt, which was probably discovered in Turkey, is still eaten extensively throughout the Middle East. Africa's Masai tribe thrives on a fermented milk which forms the mainstay of their diet. And frozen yogurt and other cultured dairy foods are enjoying a booming popularity in this country.

In cultured and culture-containing dairy products, such as yogurt, sour cream and buttermilk, it's the beneficial bacteria which impart the tangy flavor and smooth texture. Now there is a milk with a bacteria, Lactobacillus acidophilus, added to it, which may have important health benefits.

Shortly after the turn of the century, a scientist named Metchnikoff theorized that Russian peasants had a long life span because they consumed milk containing Lactobacillus acidophilus on a regular basis. But bacteria were added to milk before processing, and lactic acid was produced which gave it a strong, tart flavor. The milk did not gain such popularity in America.

These taste problems have since been overcome. Marvin Speck, Ph.D., and his colleagues at North Carolina State University recently developed a method of adding a culture of the bacteria to milk which has already been pasteurized and homogenized, thus keeping its flavor unchanged.

Research data have suggested that the strain of Lactobacillus acidophilus used establishes itself in the gastrointestinal tract. Scientists are wondering whether it and other bacteria settling in the tract might not have various health benefits.

For example, there are testimonials stating milk with Lactobacillus acidophilus reduces flatulence for some people. Medical workers have posed the possibility that this milk might restore "proper" balance of bacteria in the gastrointestinal tract and ward off disease-causing organisms.

There is still no conclusive scientific evidence that milk with this bacteria provides health benefits other than those derived from milk's established nutrients. But, because of the many beneficial possibilities, National Dairy Council (NDC) is currently sponsoring a number of research projects in this area.

Many lower bowel diseases and disorders have been associated with changes in the gut's live organisms. So, if any imbalances in the intestine's microflora brought on by environmental and/or dietary stresses could be restored, corrected or prevented, health benefits might be realized.

What must first be learned is how the bacteria in the gastrointestinal tract work. Which bacteria, and how many, live in what locations of the stomach and intestine? If bacteria are consumed in the diet, do they survive in the gut? And, if beneficial bacteria are implanted in a given location, will they impede the attacks of disease-causing organisms?

Dwayne Savage, Ph.D., University of Illinois, is trying to find answers to these questions in an NDC-sponsored research project. If he discovers that various lactobacilli can attach themselves to the lining of the gut, thus preventing harmful bacteria from occupying the same space, it would lend further credence to the claimed benefits of Lactobacillus acidophilus.

Ongoing studies have uncovered evidence that certain bacteria interacting with a Western style diet (high in fat, cholesterol and certain types of animal products) may be related to the development of colon cancer.

Authorities think diet may lessen the risk of colon cancer by changing the composition and biological activity of these intestinal bacteria. Animal studies have shown that by altering diet and thereby changing the intestinal organism makeup, the occurrence of colon cancer can be reduced.

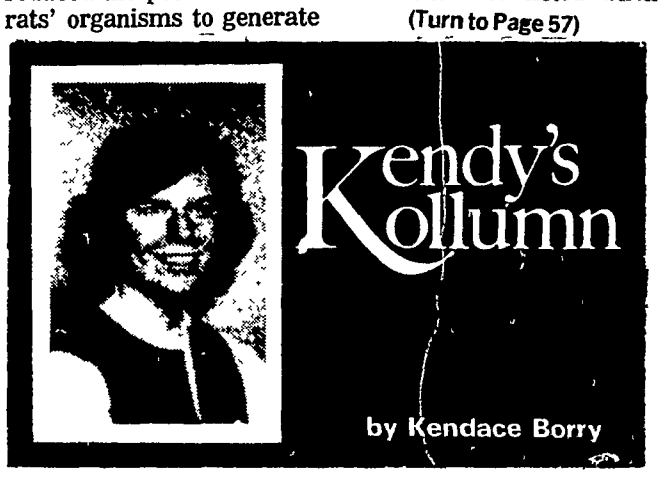
Dietary supplements having the greatest potential to change the makeup and metabolic activity of live organisms in the gut include dairy products containing a strain of Lactobacillus acidophilus, which establishes itself in the gut.

In another NDC sponsored project Sherwood L. Gorbach, M.D., Tufts - New England Medical Center, Boston, Mass. is testing this hypothesis by feeding humans and rats Lactobacillus acidophilus.

Dr. Gorbach's preliminary findings showed dietary supplements of Lactobacillus acidophilus reduced the potential of the rats' organisms to generate carcinogens (substances of agents producing or inciting cancer). He is now undertaking animal studies to see if Lactobacillus acidophilus can actually lower the risk of developing colon cancer in the presence of a known carcinogenic compound.

Initial results of human studies were comparable. As with the rats, a reduction in activity level of key enzymes associated with carcinogen formation was noted when

(Turn to Page 57)



This weekend we celebrate Father's Day and I envy all of you people out there You see, my father is no longer with us.

Daddy died a little over five years ago, and left a void on the farm that will never be filled. He loved farming and the homeplace was his pride and joy. A civil engineer by trade, he farmed his fifty acres for the thrill of watching the corn grow There was always unmistakable delight when he'd call the sheep and they would hasten to be at his side He was the master of his land.

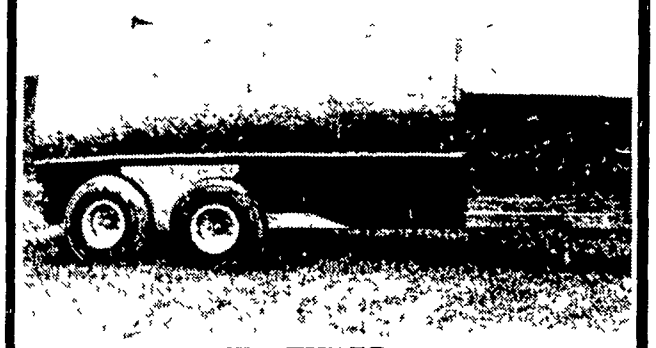
He taught me a deep respect for animals and a true love of the soil At times, I would try his patience to the nth degree, as he tried to hammer home lessons I was to learn He had high standards and expected his family to uphold them

But all my life, some of my fondest memories will be of helping him make fence, of riding in the old truck as he went for supplies, or of just following in his shadow as he would wander over the farm, checking that all was as it should be

There was always time for him to listen to my problems, and he gave sound advice He was proud when a Borry succeeded and made sure he was there to pick up the pieces when one didn't He ruled his home and kept the world in its proper perspective

No, my father no longer walks through the fields or calls the sheep home But the heritage he has installed in the Borry clan will live forever

FONTANA LIQUID MANURE SPREADERS



FEATURES:

- Axles on Bronze Bushings.
- 21 inch Discharge Fan.
- Hydraulic or PTO.
- 14 inch Chopper Type Auger.
- 3/16 inch Wall Thickness.
- Unitized Trailer - All weight pulled from axles.
- Longer Tongue, Better Turning Radius.
- Sure Seal Valve.

SIZES AVAILABLE 1,500 - 2,600 - 3,300 GAL.

DEALER INQUIRIES INVITED

For Dairy & Poultry Farmers - the new MARTIN V-MODEL semi-liquid spreader (patent pending).

"NEW" "NEW"

The new Martin Spreader is designed to handle manure from free stall barns, semi-liquid storage, barn cleaners and front end loaders Available in three standard sizes - plus - customer built to meet special needs Custom-built includes length, width, capacity and top opening to meet your requirements All sizes are built to last.

THE FOLLOWING FEATURES ARE STANDARD EQUIPMENT ON MARTIN'S V1500 gal , V2100 gal , V2250 gal , V3300 gal TANK SPREADERS

- ★ Heavy duty internal chopper type auger
- ★ Includes Hydraulic cylinder and all hoses
- ★ Includes PTO shaft, jack and ladder
- ★ Spreaders built and designed to handle manure from free stall barn without adding any liquid
- ★ Rear fan built to handle spread of 45 to 60 feet liquid or thick manure
- ★ Manure tank can be filled with barn cleaner — Scrape off Ramp — Front End Loader or Pump
- ★ Large 12' opening from tank to discharge fan
- ★ Special V-Shape design facilitates smoother flow of manure removal
- ★ Braking System Optional, 4-wheel Hydraulic Brakes controlled from tractor

Call us today to see the new MARTIN V MODEL SPREADER and ask about other Martin products like liquid manure equipment full line of free stalls gates and fences

1776 cattle drive re-enacted

WOODSTOWN, N.J. – A token re-enactment of the "Great Cow Chase of 1976" was held June 10 at Cowtown in Sharptown, N.J.

Last year a commemorative cattle drive and cook out was held for those who helped Stoney Harris with his 1976 Bi-centennial cattle drive to Valley Forge. Again, this year at the request of those who participated on the previous drives, Stoney held another one.

Twenty head of long horned cattle were driven through the main streets of Sharptown, N.J. The entourage was complete with drovers and chuck wagon.

The original cattle drive was made by Anthony Wayne in 1776 to relieve Washington's starving army at Valley Forge, and some say it may have been the turning point of the revolution.

Stoney's cattle drive, however, was just for a good time and a reminder of the role the cattle business has played in the past in the making of this country.

Longhorned cattle took to the streets of Sharptown, N.J., as part of a commemorative cattle drive and cook-out. The drive was a re-enactment of the original drive made by Anthony Wayne during the American Revolution.

Working with

(Continued from Page 54)

long hours, but it's not hard. But, cutting and hanging is hard work. Yet, I don't think it hurts me in any way."

The only part of the tobacco process in which she doesn't help on a full-time basis is stripping.

"For the rest of the season I think I either have to be out there all the time or not at all, because they need to be able to depend on me," she explains. "I also think with me helping out there it's a tremendous saving for us."

She also helps for another reason.

"I like being involved in what we're doing. We are working toward the same goal of owning a farm some day. I really do think that if a man doesn't have a wife who gets involved in farming with him it's harder, and it's a hard adjustment for her."

It is a good thing for both herself and her husband that Georgia has this attitude. As she puts it, "If I didn't like tobacco, it wouldn't go as well for us, since Larry helps out the family by doing other work as well."

Linda is quick to point out, however, that Larry is the head of the family and the boss of the farming operation.

"That's the way I want it," she says "I help to keep things running smooth when he's not here, and I do a lot of work, but he says what goes. I like being independent and working for myself, but I'm not 'liberated' the way Women's Libbers are."

She might not be liberated to a true Women's Libber, but she is content with her life the way it is. She gets to work outdoors, which she loves, and she also gets to be feminine holding down her roles of wife and mother, as well.

"I like to cook, and I have my own garden," she says with a smile. Although she says her garden "keeps getting littler and littler," she does have onions, tomatoes, corn, and red beets in it, among other things.

"I couldn't do without tomatoes, onions, and sweet corn," she says with a grin. She also makes jellies, and cans peaches, cherries and other fruits. On top of that she does the bookkeeping for the farm and raises two little girls – Jolyn, age six, and Rebecca.

"But, I don't want to sound like I'm something special," she says point-blank. "I think a farm woman who works away and does other things is just as busy as I am. I just like what I'm doing, so I do it."

That's the secret to success for this active farm wife who is now in her glory helping out in the tobacco fields.

Bacteria

(Continued from Page 55)

usual diet was supemented with Lacbacillus acidophilus. ffect seemed to persist for e weeks after the bacteria ere removed from the diet.

Dr. Speck and his North arolina research team are vestigating other possible ealth benefits from inking milk containing this cteria.

A need exists to prevent or educe intestinal infections. shown to be effective, milk ith Lactobacillus cidophilus would be an specially attractive adition to the diets of infants nd the aged, who may be nore susceptible to the nfections. It's also possible hat regular intakes of milk ith Lactobacillus cidophilus could help revent intestinal infections n the rest of the population.

Dr. Speck is providing his strain of Lactobacillus acidophilus to other researchers interested in its potential health benefits. They include Albert D. Newcomer, M.D., of the Myo Clinic, Rochester, Minn. NDC is sponsoring his study of the treatment of various gastrointestinal disorders with milk containing this bacteria.

It is known that patients taking antibiotics may develop a bacterial imbalance in their gastrointestinal tracts. Lactobacillus acidophilus in milk may help restore proper, natural balance. It may also help patients suffering from an irritable bowel syndrome and inflammatory bowel disease.

Testimonials also indicate people who are truly milk intolerant (unable to properly digest the lactose in an eight-ounce glass of milk) can consume milk containing Lactobacillus acidophilus without discomfort. Dr. Newcomer's work is necessary to give this claim a scientific basis.

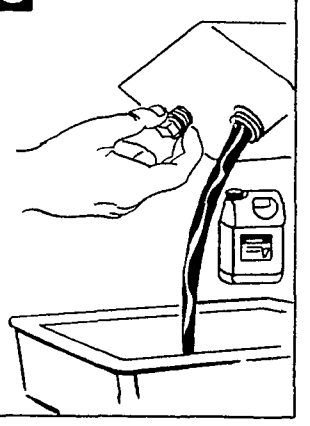
Other bacteria are, and will eventually be, studied to determine their contributions to health.

George V. Mann, Sc.D., M.D., of the Vanderbilt University of Medicine, Nashville, Tenn., is trying to isolate the factor in sour milk which can lower blood cholesterol levels. He observed that Africa's Masai tribe consumes a large quantity of sour milk as the mainstay of its diet, and that the tribe's blood cholesterol level is very low.

Dr. Mann found that the more sour milk the tribesmen consumed, the lower their cholesterol levels. This effect was also observed in America when he fed sour milk to volunteers in his Nashville laboratory. He has now hypothesized that there is a cholesterol-lowering factor in sour milk and yogurt.

Auto Service Tips

Changing motor oil in your car can save you money One oil manufacturer now provides new oil in a gallon-sized, reusable plastic jug All you need is a funnel and a pan Drain spent oil into the pan, pour in fresh oil, use the plastic jug to dispose of old oil — return it to dealer for disposal or place with regular garbage pick-up



On being a farm wife

—*And other hazards*

By JOYCE BUPP

Several months ago, our family was visited for a day by a big-city newspaperman researching the life of farm families.

After touring the livestock facilities and talking with us at length, he came to a conclusion about farmers that absolutely astounded him.

He admittedly could not understand how a person could work 16 hours a day, month after month, year after year, and love it.

Even more difficult for him to grasp was the idea that on his brief and scattered vacation, a farmer would actually be eager to visit other farmers to compare notes, eyeball new machinery and new methods of crop growing, or attend conventions and seminars on agriculture.

And the fact that our hobbies, like cattle showing and gardening, for instance, so closely paralleled our vocation, almost strained his belief beyond repair.

"Why, you're a workaholic," he finally exploded to my farmer, with a mixture of accusation and disbelief in his voice. (And, did I detect a touch of derision as well?)

Yep — that's exactly the description of every happy and successful farmer that I know.

He's a man who'll stay up to midnight watching a storm tear out his newly planted corn and the topsoil around it, then get up at six to begin preparing to plant it again.

He's a man who can give you 83 reasons why a Summer suit on sale at $79.95 is "an overpriced ripoff" while spending two hours trying to convince you that a left-over last year's model new combine, on sale at $24,995, is the "buyer's steal of the year."

He's a man who uses hands of brute strength and muscle to wrestle a stuck calf from an agonizing cow and then tenderly cuddles his own newborn child or grandchild.

On this Father's Day weekend, may God bless farm fathers everywhere — my favorite workaholics

Plant lovers' corner

Secrets of successful peonies spelled out

UNIVERSITY PARK – Peonies are among the most dependable flowers in the spring perennial garden, flowering year after year with only a little care. If your peonies are not flowering well this year, the following are some possible causes offered by Penn State University specialists.

First of all, the peonies may be planted too deep. The "eyes," or buds on the crown, should be no deeper than two inches beneath the soil surface.

Or, they may have been recently transplanted. It often takes peonies two or three years following transplanting to recover enough to flower.

If buds develop to the size of a quarter or larger, then fail to open, the problem may be bud and flower blight. Control for this disease comes earlier in the season and you can get this information from your county agricultural agent.

Peonies planted near trees or shrubs which shade the plants and compete for moisture and nutrients may not flower well. Select a sunny, well-drained location for planting peonies. Plants may be undernourished or too dry. Apply 5-10-5 fertilizer in early Spring at one pound to 30 square feet of garden area. Water peonies well in dry periods, especially while buds are developing.

Rose diseases described

UNIVERSITY PARK – It's unfortunate, but true! The number one plant in the popularity contest for use in the home garden is the rose. And the plant with more disease problems than almost any other garden plant is the same, say Penn State specialists.

Two common and troublesome diseases are black spot and powdery mildew. Black spot causes, as the name implies, spots on the leaves that eventually result in loss of leaves. By late Summer, all bottom leaves will be dead and gone. Your rose may look like a little green umbrella.

Powdery mildew doesn't result in much defoliation, but it coats the leaves and flower buds with a powdery fungus growth. Leaves curl, buds fail to open and plants suffer. Several chemicals prevent one disease or the other. And, many garden mixtures have one of each type of chemical in the package. But only two – phaltan and benomyl – give good control of both black spot and powdery mildew. Apply sprays regularly, say the experts. Once a week is a good schedule. The plants will keep their leaves and produce flowers all Summer. There are many other diseases, as well as insects, that attack the garden rose. These are described and control recommendations are given in a leaflet on "Roses for the Home." Write or call your county Extension Service for more information.

Roughage needed for high fat test

DECATUR, Ind. – Fresh grass supplies that help boost milk production may have an opposite effect on the butterfat test if dairymen don't exercise care in keeping feed rations properly balanced with roughages.

"To maintain a normal butterfat test, dairymen should maintain 15 to 18 per cent crude fiber on a dry matter basis in the total ration at all times," says Dr. Rodney Dennis, a Master Mix dairy research specialist.

"A lack of fiber," Dr. Dennis says, "is very likely to occur in the Spring when dairy herds are turned on fresh green grass. This early plant growth is low in fiber." Consequently, he warns not enough fiber is supplied to maintain the butterfat test, especially when pasture is the only roughage source.

Dr. Dennis explains that the rumen converts roughages or fibrous materials to volatile fatty acids. One of these, acetic acid, is the primary precursor of milk fat. Grain, on the other hand, supplies mainly propionic acid, which is an energy source, not a milk fat source.

"A balance of the two acids is needed to maintain a normal butterfat test," he says.

The Master Mix dairy specialist says that total roughage or forage consumption is usually figured on a dry basis at 1.8 per cent of body weight.

"If consumption falls below one per cent of body weight, the fiber percentage in the total ration usually falls below 15 per cent, resulting in a fat depression.

"Likewise, feeding grain at more than 60 per cent of the total dry ration matter restricts roughage intake and usually depresses butterfat test."

Dr. Dennis adds that fiber form also affects the butterfat test. Finely ground roughage (3/8 of an inch or finer) speeds the rate of passage resulting in poor roughage utilization. The rumen produces less acetic acid and a fat depression can occur.

Dairymen are advised to feed a minimum of five pounds of long hay per cow per day. "Four to five pounds of Master Mix Sweet Bulk 'N Flakes will add additional roughage to the ration that will help prevent butterfat depressions," he says.

He adds that buffered dairy feeds, which buffer the rumen, also can be used to combat butterfat depression.

The great violinist Nicolo Paganini occasionally played with frayed strings, hoping they would break so he could triumphantly overcome this handicap.

The smallest mammal is the pygmy shrew, which is only 1½ inches long without its tail, and weighs only one-eighteenth of an ounce

Iris to be divided in early Summer

FLEMINGTON, N.J. – Late June and early July is the time to move and divide iris.

Clumps need dividing about every three or four years or they will become overgrown and unproductive.

One should trim off the leaves to about one-third their height. Then one lifts the clump, washes off excess soil, and cuts the original clump into several smaller ones.

Each should have at least one fan of leaves. Divisions having several fans of leaves will usually bloom the following year.

Iris grows best in full sunlight. The Japanese and Siberian irises will tolerate shade and can be grown in moist soil.

A person should plant the rhizome, or fleshy stem parallel with the soil surface. In heavy soil the top of the rhizome should be slightly above the ground. In light soil it may be an inch or two below the surface.

Established iris that are growing well do not need fertilizer. Weaker clumps may be fed a 5-10-5 or 5-10-10 fertilizer at one-half cup for six small plants.

One can scratch this lightly into the soil around the iris and then water thoroughly.

Dauphin County DHIA Monthly Report

May 1978

John Roy Book's 4½ year old Jeane topped the list of the Dauphin County DHIA this month with a score of 786 pounds of fat. Her milk production was 18,298 lbs.

Top producer in the pounds of milk category went to Number 66 at Elwillow Farms, with 20,806 pounds. The 2½ year old cow had 684 pounds of fat.

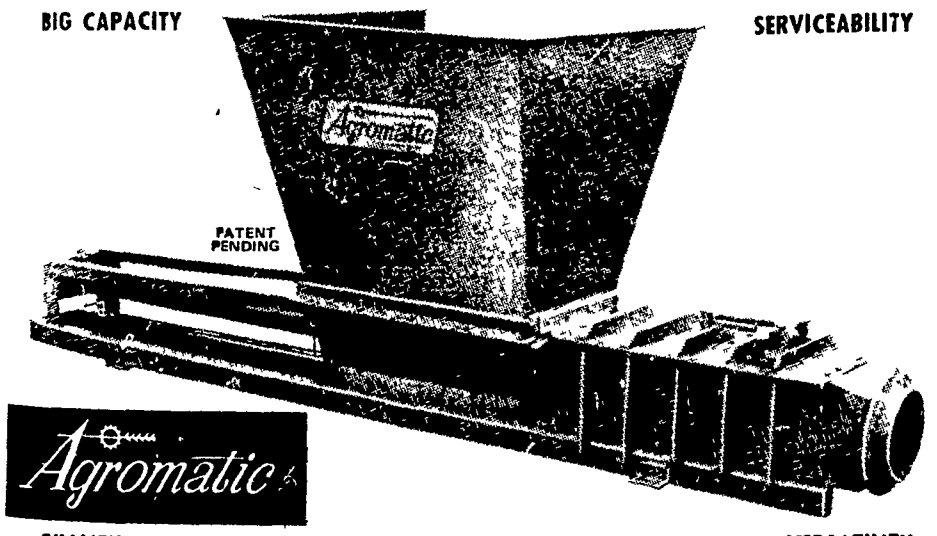
Agromatic

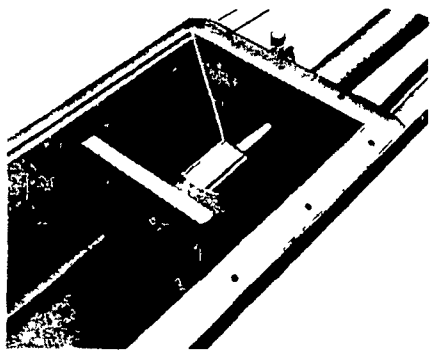
AN OLD NAME WITH A NEW MEANING FOR YOU

- MANURE PUMP
- SILO UNLOADERS
- FEED CONVEYORS
- TRAVEL FEEDERS
- BARN EQUIPMENT
- WATER BOWLS
- HOOF TRIMMING STALL
- COW MATS

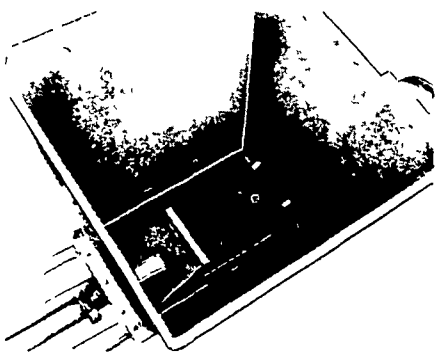
BIG CAPACITY — SERVICEABILITY



QUALITY — THE MODERN HYDRAULIC MANURE PUMP — VERSATILITY



HOPPER is 8 gauge steel and 42" square. Optional longer hopper is standard. The base of the hopper assures proper plunger alignment as it enters the chamber.



The large 12" X 12" plunger is designed to move large amounts of manure at six (6) strokes per minute. Angle iron guide assures perfect head alignment

12" SQUARE CHAMBER

- A square chamber allows for best gate design. To open completely, with minimum resistance, a round chamber doesn't allow the gate to open completely.

HEAD SHAPE

- The head shears off long straw or hay in the manure.
- No bushings or oil seals common to round plungers.
- Sloped back lead creates agitation with each stroke, eliminating bridging.

PVC PIPE

- 10" PVC Pipe, not 12"; by going from a 12" square chamber to a 10" round, assures even pressure on manure to eliminate the chances for sediment to accumulate.

SERVICE

- By installing the pump in an accessible pit, all parts are easily inspected. There are no costly seals or bushings to be replaced regularly.

Barn and Feed Lot Equipment

Touring the Berks County Dairy Expo held at the Berkshire Mall were, from left to right, Faryhl Treichler, master of the Pomona Grange; Kent Shelhamer, Pa. Secretary of Agriculture; Donald Duncan, president of the Berks County Dairy Farmers Association; and Sandy Miller, Pa. Dairy Princess.

Shelhamer visits Berks County Dairy Expo

READING – As part of their continuing celebration of dairy month, the Berks County Dairy Farmers Association had Secretary of Agriculture Kent Shelhamer as their guest at their agricultural Expo being held this past week at the Berkshire, Mall, Reading.

Shelhamer toured the many exhibits displayed in the mall area which were created by different farm related organizations. Milk product displays, farm crafts, and tractors all were viewed and inspected as part of the presentation which was open to the public all week.

On hand to show the displays to the Secretary were Pa. Dairy Princess, Sandy Miller, a Berks County farm girl, and President of the Berks County Farmers Association, Donald Duncan, along with about twenty area farmers who gathered for the tour and informal dinner afterwards.

Farmers present during the evening used the opportunity to question and ask for Shelhamer's comments on several issues that concerned them. Not only were dairy farmers present, but the group represented almost every type of farmer located in the county.

Concerning the recent announcement that there would be beef imported into the U.S., Shelhamer noted that he thought that farmers should "get on your Congressmen's backs", and put pressure on them about the situation.

He also commented on conservation organizations and was afraid that they might be being used by the Department of Environmental Resources, which he said would "steer the conservation people the way they want them to go". He added that such groups have to be very careful about their involvement.

Other topics of conservation included OSHA, the work done by government employees, the farm equipment expo planned for next year, and export products from Pennsylvania.

And in honor of dairy month, the Secretary's dinner was topped off by a tall glass of milk.

The Tractor Specialist sells more "up-time"

case

When the land is ready a farmer's tractor had better be ready to go That's why a Case dealer franchise just makes good common sense

As a Case dealer you're a tractor specialist Everything you do — selling servicing parts — has one target the best in farm power You and your tractors are backed by an industry first a sound marketing program Assured Availability It tells your customers that if for any reason during warranty the tractor they bought from you isn't ready to go they'll have a free replacement And Case backs you up!

Case backs you up with other strong marketing help including the Demo/Rental and Commitment to Quality programs

If the franchise is open in your territory you may also be eligible to sell and service light construction power For information on the full potential of a Case franchise in your area write or call

NOW...FINANCE CHARGES WAIVED ON USED TRACTORS & IMPLEMENTS

Trade now for one of our ready-to-go used tractors. Get several months of use...with no finance charges imposed until September 1, 1978. John Deere Financing can help with your purchase and keep more of your money available for other uses this season.

What's more, new John Deere implements and used implements of any make can also be financed as part of your purchase.

Stop in or call us. Be sure to see the fine selection of tractors we have in stock. This offer is for a limited time only!

FARM FAMILY WANTED
Sara-Lou Farms needs a small farm family NOW, preferably raised on a farm, with lots of farm operating experience. This family will live in a charming two story restored home with two full modern baths and three bedrooms (suitable only for a family with no more than two children). A middle-aged couple with no children would also be very acceptable It is necessary that both the husband and wife enjoy farm life. The farmer will be a full time employee taking care of a large organic vegetable garden on a medium size homestead and help to raise grains and hay for our animals. The husband and wife will both assist in the care of the goats, rabbits, poultry and swine. The farmer should be mechanically inclined No smoking is ever allowed. We are offering a healthy living situation, a good salary, and long term secruity for those eager to learn the organic way! Sara-Lou Farms is a small natural organic farming and dairy goat operation where exciting things are happening in a healthy environment. For interview, please mail all replies to:

BOYD A. RESSEGUIE - R.E. BROKER
PH: TULLY 315-696-8446

VERY UNIQUE, THIS IS WHAT YOU WERE LOOKING FOR

You enter this 23 acre property from a hard road into a wide entrance of the lane Land on both sides of lane About 50 ft in the lane you see the buildings On the left you see a stream, pasture, white board fence, garden and the barn, sitting with a tree background. On the right you see a grown up pasture area, the large home, a moss roofed spring house with plants hanging from the over head and the spring water flowing from its four sides, a very large lawn area with mature trees and if you take a stroll beyond the lawn you come onto another stream Walk up into the woods and you will see an old railroad bed covered with growth for the railroad never was Sit on the full length porch and enjoy the privacy and peaceful slumber The house you enter over brick sidewalks from the land side or lawn side You can enter the den, finished with old barn siding, having a walk-in fireplace, curved stairway and a small door to private cellar. Into the extra large 30 foot family room with open beam ceiling and old pine boards between the beams The floor still has part of the old pine boards From here you can enter the large eat-in kitchen or the dining room with the old log wall exposed Also a picture window looking out over the porch onto the large lawn And, yes, there is the moss roofed spring house where you can pot your plants on a rainy day Then into the parlor room Oh, yes, we nearly forgot the laundry, mud room and powder room Now let's go the the stairs between the kitchen and dining room We come up to a large sitting room To the right is a bedroom and also another bedroom with a private bath and a private stairs down to the den To the left of the main stairs is another bedroom and off to the sitting room another bath and another bedroom and private stairs down to the parlor What is in the basement? Go down from the mud room and there is a large old walk-in fireplace This used to be the walk out cooking kitchen Go out the back door and there is that quiet cozy spring house Needless to say this home has history back to 1740, but it shines in the love the owners put into re-doing the home The beams look fresh and the home is as you would expect, very clean Yes there is something wrong The owners wish they could move all this to their new location, but this impossibility becomes your gain

It is hard to leave this but we must think of the husband A large bank barn with a feed lot He can raise beef and or have horses There even is room for a ring if you wish, but here he can have either or both In case you're interested, it's only 15 minutes away from Penn National, 4 miles to either Indiantown Military Reservation, new proposed national cemetery, Appalachian Trail, horseshoe trail and Swatara State Park and Dam And just ¼ mile from the borough of Jonestown Also forgot you're only a mile or two to Route 22, 78 and 81, and only 30 minutes from Harrisburg or Hershey

- 150 acre truck farm, Hegins $225,000.
- 160 acre hog and beef, Port Royal $250,000.
- 170 acre dairy farm, Port Royal $310,000.
- 22 acre farmette, Mifflintown $115,000.
- 33 acre farmette, Elizabethville $64,900
- 10 acre mountain top along hard road, West Penn Twp $17,900.
- 10 acre hill side field, Clay Twp $35,000.

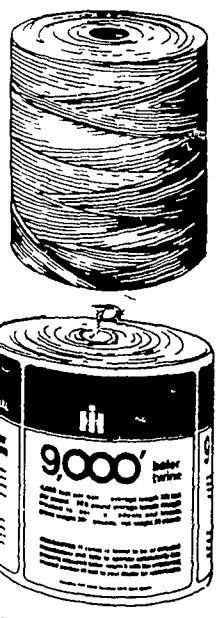
BUY YOUR TWINE AT THE IH SIGN



It pays to buy top quality in any product. In twine, top quality means fewer broken bales, freedom from snarled knotters, less lost time. You can be sure of these benefits with International plastic or sisal twine. Settle for a cheaper twine and you may be settling for less tensile strength, shorter footage, and more headaches.

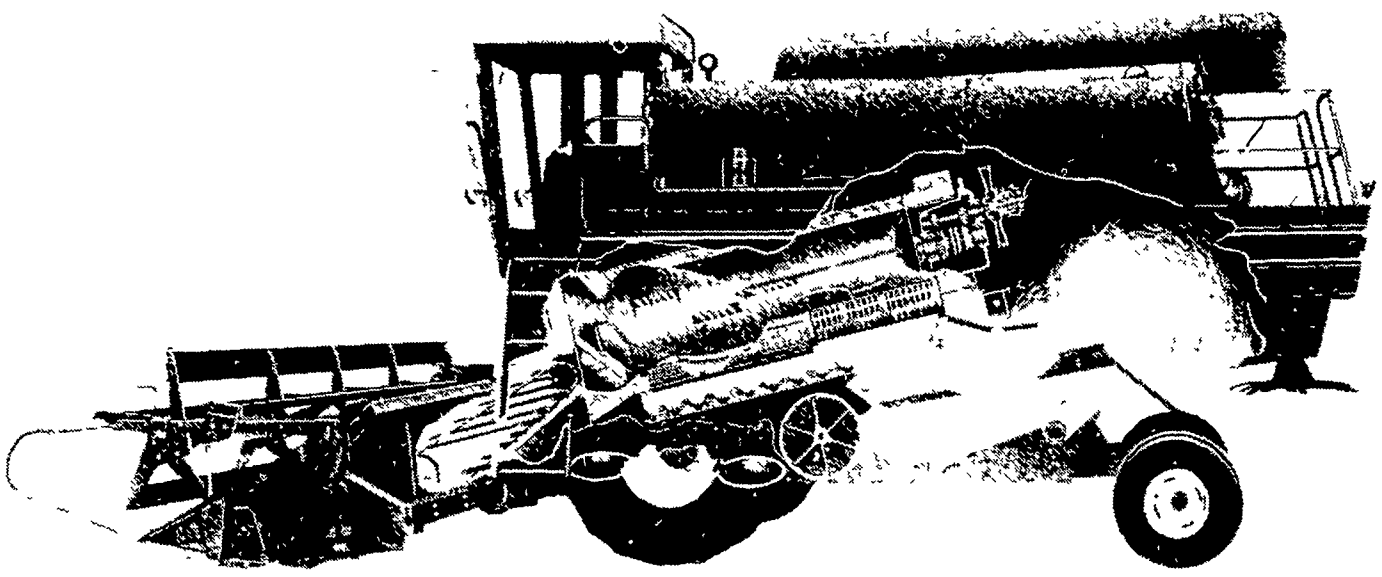
YOU CAN COMBINE THOUSANDS OF DOLLARS MORE CROP

GO IH BIG RED



IH AXIAL-FLOW

Farmers who've compared an IH Axial-Flow in the same field with their own combine report the increase in grain saved averages five percent.

How Axial-Flow Increased Returns $6,937 On 500 Acres Of Corn

Normal Total Yield (125 bu./A)	62,000 Bu
Axial-Flow 5% Increase	3,125 Bu
Price of Corn	$2.22 per Bu
Increase Returns (3,125 Bu. × $2.22)	**$6,937**

- Greatly reduce Field losses - You'll harvest more from every acre.
- Give you higher quality grain - with far less crackage and dockage.
- Let you move faster when you need to - and still miss less grain.
- Combine better even at higher moisture levels.
- Sets a new standard for ruggedness and simplicity - no straw walkers or grain return pan.
- Simpler new design also means less down time and easier maintenance.
- And you'll work in the quiet comfort of a completely new control center.

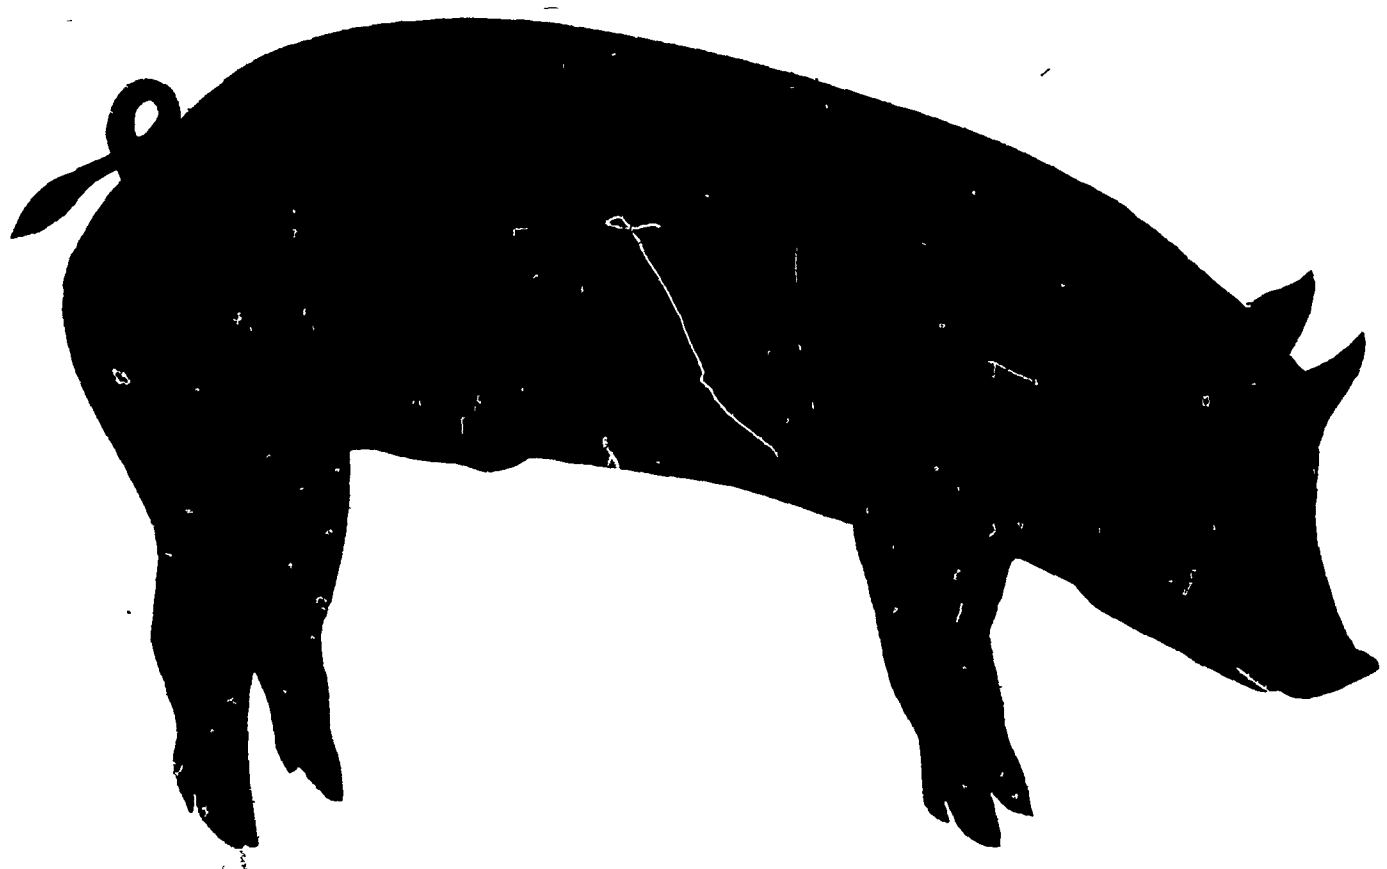
PROTEIN



WHO NEEDS IT?

It may surprise you to know that a pig doesn't even require protein.

What he does need are Amino Acids - those funny little "building blocks" that are referred to as "protein".

FIND OUT TODAY

how you can produce more pounds of high quality pork - with fewer dollars.

York County DHIA Monthly Report

Smysers Richlawn Farms, York, had the high daily butterfat average last month in the York County DHIA program. Their herd of 65 Holsteins averaged 60.6 pounds of milk and 2.31 pounds of butterfat. Second high was Sinking Spring Farm, Inc., York, with 64 Holsteins averaging 56.0 pounds of milk and 2.18 pounds of butterfat.

The high cow was Susie, a 4-year old Holstein owned by Thomas A. Boyer, York. She produced 22,617 pounds of milk and 807 pounds of butterfat in 305 days. Another 4-year old Holstein, Reta, in the Robert R. Stewart herd, Delta, produced the second high lactation. Her record was 16,630 pounds of milk and 787 pounds of butterfat in 305 days.

Crabgrass -- it can be controlled

NEWARK, Del. – Crabgrass – that annual invader of home lawns – may be getting ready to take over any lawn this Summer, so one should be on the lookout for it.

This grassy pest is found in all lawns to a certain extent, but it's most serious in one already weakened and thinned because of poor care or unfavorable growing conditions, points out University of Delaware Extension garden specialist Dave Tatnall.

Crabgrass grows most vigorously during the hot, humid weeks of Summer, the time when regular lawn grasses grow slowly. In early Fall, it matures, sets seed, and dies – often leaving unsightly dead areas in a lawn.

Though this weed grass can be a tough foe to defeat, Tatnall has a few tips which may help one cope with it.

First of all, one should set his mower to cut at a height of two and one-half to three inches. Mowing "high" keeps one's lawn more drought resistant and discourages crabgrass growth.

One should keep watering to a minimum, too. If a person must water his lawn during dry spells, he should give it a thorough soaking (to a four-to-five-inch depth). One shouldn't do this more often than every seven to ten days, Shallow-rooted crabgrass thrives on frequent light waterings.

One should be ready to control insect, disease, and weed pests that might otherwise kill out areas of turf. Crabgrass is quick to fill in gaps in a lawn when other desirable grasses have been thinned out by some pest attack.

Where dead areas do occur – especially by early Summer – it's a good idea for a person to scratch up the soil and sow quick-germinating annual ryegrass. This will help maintain the appearance of the lawn and discourage crabgrass at the same time.

As crabgrass begins to die in September, one can restore infested areas by thatching (or thoroughly raking). The he should apply a lawn fertilizer to thicken and strengthen the turf, and reseed with recommended grass.

For added insurance, one shouldn't forget to apply a preemergence crabgrass control early next Spring (around April 1-20).

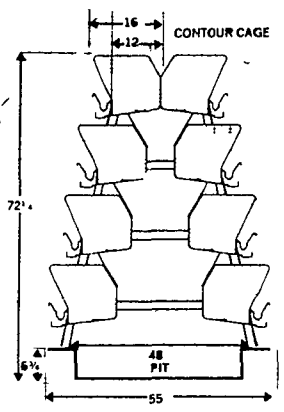
With a little extra attention to one's lawn this Summer, he'll be able to uproot this pesky grass and force it to seek greener pastures somewhere else.

THE SYSTEM

DIAMOND AUTOMATION OFFERS SEVEN NEW CAGE SYSTEMS

ATTENTION POULTRYMEN!

CHECK THESE DIMENSIONS →



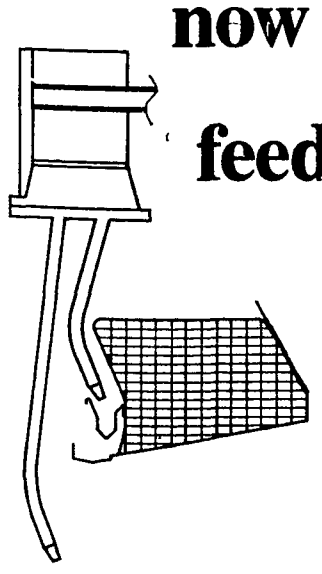
4 HIGH REVERSE CAGE IS THE MOST ADVANCED, COMPACT AND EFFICIENT SYSTEM FOR NEW AND CONVERTED HOUSES.

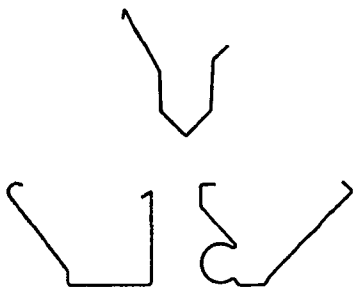
EGG MAKER SERIES —
4-HIGH LAYER REVERSE CAGE

For producers who prefer higher bird density with the reverse cage concept, Diamond Automation has developed this new 4 tier modified stair step system. It features a big reverse cage with Contour front. Any of the four Diamond feeding systems can be used. No chute scrapers are used on the manure drying boards.

NO OTHER COMPANY OFFERS YOU SO MUCH

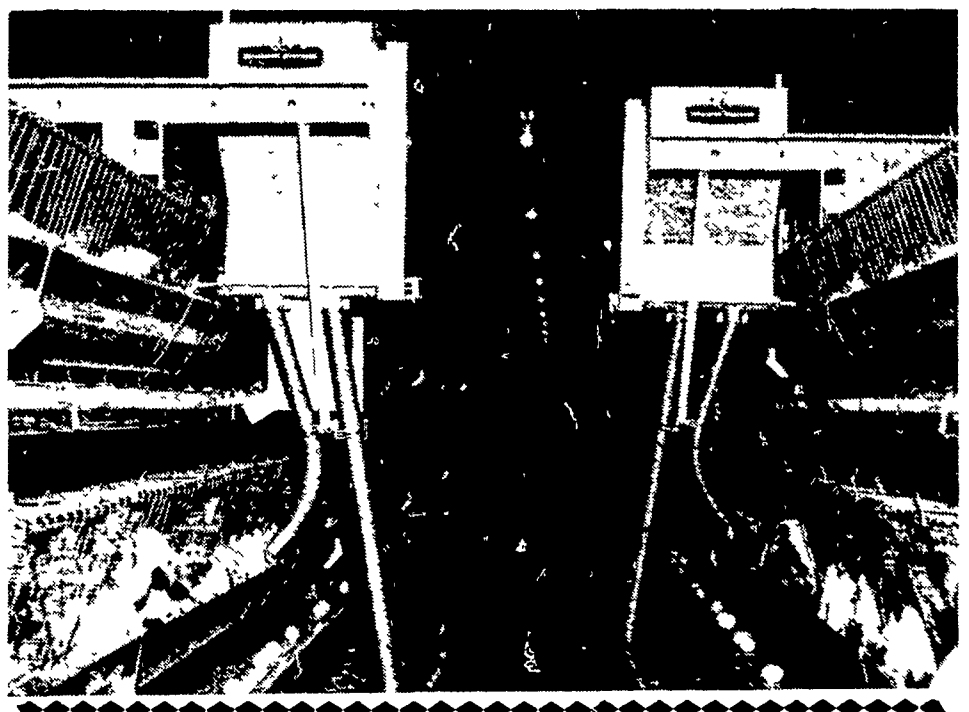
Producers can now choose from *four* feeding systems





The Feedsaver® System is the first truly controlled feeding system. Battery powered hoppers travel down the cage row at timed intervals and deposit a predetermined amount of feed in the deep "V" troughs All birds get the same fresh feed There's no high-grading. A feed sensor automatically compensates for differences in bird's feeding habits. The Feedsaver® System cuts feed and electric energy costs For some, the feed savings are substantial.

Two new types of Diamond chain feeders are also available . . . the flat chain and the link chain . . . in addition to the Keenco F-80 chain feeder All are compatible with the new cage systems and deliver a balanced ration to the birds Trough design reduces feed waste from billing-out



Let the Diamond Feedsaver Cage System Work for you.

Details determine measure of profit

NEWARK, Del. – Occasionally big profits from farming are just pure luck. But in most instances profits – which are what a businessman gets for his skill in management – are the result of carefully overseeing all the little details that result in a high level of production efficiency, low unit cost, above average prices, and superior husbandry. This is why, as one drives along the road, he can see side by side very successful farms and ones which struggle to keep the sheriff away from the door.

The difference in the farms is more likely to be related to the management ability of the operators than to the physical differences in the farms themselves, explains University of Delaware Extension farm management specialist W. T. McAllister. As one reads through the following list of management practices, he should check to see how well he scores.

First of all, does one take advantage of 2 per cent, 10-day discounts when offered? One can figure it up for himself – 2 per cent for 10 days is 72 per cent at yearly rates. And a person shouldn't overlook 30, 60 and 90 day discounts. They add up, too.

Does one test or guess? Soil tests and seed germination tests in field crop production, should be used, plus milk tests and carcass yield tests in selecting animal breeding stock.

What about timing? Some people are always just a little late in getting critical jobs done – ordering supplies, planting, irrigating, spraying, animal breeding, record keeping, and paying bills.

Are there always labor problems? Most employers have problems with labor from time to time, but some always seem to have problems. Most farm labor troubles stem from the quality of labor hired, the level of pay, the kind of work and the farm operator's skill at supervising and managing his hired working force.

Is one really getting top yields or just wishing for them? The real pay-off comes from that portion which is above the average of neighbors. If a person is just average he makes only a small wage and a small return on his investment.

Finally, is the size of the business large enough to earn the level of income you need? Don't measure size in terms of acres or tractors but in terms of gross and net income. One should set income goals and organ farm resources to get t income or find ways supplementing it with farm employment.

Motorola announces pulling scholarship

SCHAUMBURG, Ill. – The newest supporter of tractor pulling is the Motorola Communications and Electronics Division of Motorola, Inc., Schaumburg, Ill. Kenneth Hessler, vice president and operations manager of Motorola Communications and Electronics recently announced the involvement of Motorola Communications with the National Tractor Pullers Association (NTPA). Motorola will be supplying a complete communications system for all 1978 NTPA sanctioned events.

Although Motorola's involvement does not include direct payments to the pullers, the communications equipment will result in improvement of the events. Motorola will be supplying 12 Series MX 300 "Handi-Talkies," two-way high frequency FM radio, four "on-track" communications between key personnel.

Additionally, Motorola will be furnishing a pair of "converta-com" mobile units for the NTPA trucks, which will improve on-the-road to track communications.

Motorola is a multi-national corporation with total sales of over $1.5 billion in 1977.

Ag exports stabilize U.S. dollar abroad

UNIVERSITY PARK – he U.S. farmer is on the ternational "front line" hen it comes to stabilizing e American dollar abroad, ys Robert H. Rumler, ecutive chairman of the olstein-Friesian Associat- n of America.

Rumler, 1978 recipient of Penn State University's Distinguished Alumnus Award, was speaker at a seminar, "The Role of Agriculture in International Trade," on the Penn State main campus.

"Exporting agricultural and industrial goods must be a national priority," he said.

Robert H. Rumler, second from left, executive chairman of the Holstein-Friesian Association of America and 1978 Distinguished Alumnus of Penn State University, visits with College of Agriculture officials. From left: Dr. Howard W. Thoele, associate dean; Rumler; Dr. B. R. Baumgardt, head of the Department of Dairy and Animal Science; and Dr. James M. Beattie, dean.

"It is needed to dampen the rate of inflation at home and to earn currency to import the products needed in the United States."

Rumler emphasized that the U.S. will have a balance of trade deficit this year primarily because of import oil payments. However, agriculture will maintain a positive balance of payments with $25 billion in exports.

"These exports serve in the national interest of our farmers," the distinguished alumnus pointed out. "It undoubtedly helps farmers to become more efficient, helping to lower food and farm product prices. Agricultural trade also assists in creating thousands of additional jobs on and off the farm."

The Western European countries are our largest agricultural market at the present time. But Japan is

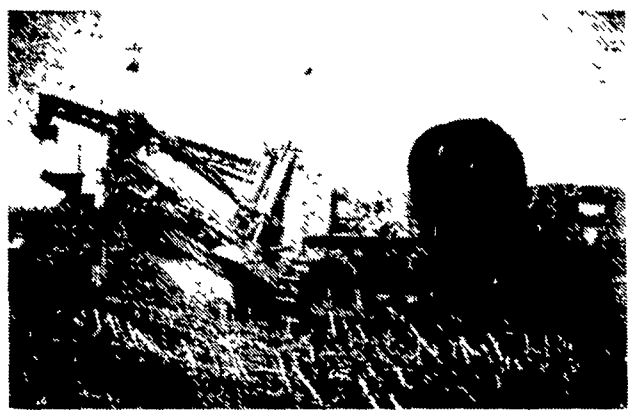
Farm Drainage Pays High Returns

Investment	Typical Annual Return
Land Drainage	21-46%
Farm Buildings	3-23%
Farm Land	11%
Stocks	7.4%
Bonds	6.1%

Even with the conservative figures shown above, it's obvious that land drainage should top farmer's lists of investment priorities.



✓-CHECK THESE BENEFITS ...

- Better soil aeration
- Better soil moisture conditions.
- Longer growing seasons.
- An increased supply of nitrogen to the plant
- Soils warm up more quickly.
- Certain toxic substances and disease organisms are removed.
- Soil erosion can be reduced
- Deeper root development enables plants to better withstand summer droughts
- Valuable livestock water supplies are obtained.
- Increased crop yields and improved crop quality

Grape phylloxera key wine grape pest in Pa.

UNIVERSITY PARK – Commercial and backyard growers of wine grapes should be on the lookout for the grape phylloxera, an insect often causing severe leaf injury to vines, says Dr. Gerald L. Jubb, research entomologist with the agricultural experiment station at Penn State University.

"This insect's rise to pest status parallels the development of the wine grape industry in the Commonwealth and the planting of varieties susceptible to leaf injury," declared Dr. Jubb in the Spring issue of "Science in Agriculture," the quarterly magazine of the experiment station.

Phylloxera form galls, he said, often as large as a garden pea, on the undersides of leaves. Inside the gall are one or several adult female phylloxera, as many as 500 eggs, and the hatching young. The root-feeding form of grape phylloxera is not a serious problem in Pennsylvania, he pointed out.

The leaf-feeding phylloxera is present in all major grape growing areas of Pennsylvania including Adams, Bucks, Erie, Franklin, Lancaster and York counties. In addition, this insect can attack grapes in backyard gardens anywhere in the state. Research by Dr. Jubb and associates is sponsored in part by the Pennsylvania Department of Agriculture. Experiments are directed at susceptibility of varieties, general biology of the pest, and methods of control.

This insect can be controlled by using endosulfan at recommended rates just before or after bloom, and again 10 to 14 days later, depending on severity of the infestation. Dr. Jubb cautions that endosulfan can injure plants of the wine varieties Baco Noir Chancellor, Colobel, and Cascade.

Phylloxera leaf galls can become quite numerous, Dr. Jubb said. Gall counts on susceptible wine grape varieties may range from 140 to 210 galls per leaf with 30 to 80 per cent of the foliage damaged. Heavily damaged leaves will die and fall from the vine. Damage may also be found on shoots and tendrils of susceptible varieties.

Defoliation can occur, the Penn State specialist claimed, if leaf infestations begin during grape bloom and continue building-up during the Summer. Such defoliation can retard normal fruit ripening and can reduce normal shoot growth, he added. Fortunately, moderate infestations of grape phylloxera have not been found to reduce vine yield or fruit quality.

In studies from 1971 through 1975 in Erie County, the wine grape varieties found to be most susceptible to phylloxera leaf damage were Seyval, Aurore, Rayon D'Or, Cascade, Villard Blanc, and Chancellor. Moderate damage was noted on the varieties Delaware, Vignoles, Leon Millot, Vidal 256, Baco Noir, Chelois, and Dutchess.

Least damage was found on Niagara, Florental, Catawba, Marechal Foch, and Steuben. In addition, low susceptibility was observed for the European varieties Cabernet Sauvignon, Chardonnay, and Johannisberger Riesling.

Unfortunately, several of the most susceptible varieties are also among the most promising for wine production in Pennsylvania, it was pointed out. Included in this group are Chancellor, Chelois, and Vidal.

The Spring issue of "Science in Agriculture," featuring the story on grape phylloxera, is available free of charge at county offices of the Cooperative Extension Service or from the Mailing Room, 112 Agricultural Administration Building, University Park, Pa. 16802. To get on the mailing list for "Science in Agriculture," write to Director, Agricultural Experiment Station, 229 Ag. Administration Building, University Park, Pa. 16802.

Several natural enemies of the leaf form of grape phylloxera have been observed in the Penn State studies. These predators include green lace-wings, thrips, mites, minute pirate bugs – and a predatory fly. Further studies will evaluate the potential of using these natural "biological control agents."

NPPC still upset over turkey ham

DES MOINES, Iowa – On June 2, USDA published a proposal in the Federal Register that – if approved – will allow the continued sale of a poultry product known as turkey ham.

The reaction to this proposal by pork industry leaders is little short of amazement.

"It's incredible how USDA officials, with their current interest in consumer protection, nutritional labeling and food information accuracy can justify calling a poultry product something that it absolutely isn't," says Marvin Garner of the National Pork Producers Council.

"In addition, this action is a direct effort to change the wording of their own USDA Labeling Regulations that they have permitted to be exploited and circumvented for the last few years with this imitation product," adds Garner.

"In fact, the day before this proposal was filed in the Federal Register, I listened to Assistant Secretary Carol Tucker Foreman inform several hundred consumer organization and food marketing people that she could not condone an imitation product being marketed to the public with any more than an imitation name. In her reference she said that if a product could be formulated in a laboratory that looked like steak, tasted like steak and was as nutritious as steak, she still would not want it to be labled as a steak. Yet, she is now going to let something be called ham that has not one iota of pork in it," continues the NPPC executive vice president.

"And this is after she's reviewed three studies that show consumers think when a label says 'ham' they're getting pork."

The studies referred to are two totally independent consumer surveys done by USDA and one commissioned by the National Pork Producers Council and the American Meat Institute.

Both NPPC and AMI contend that the turkey ham product is being allowed to benefit from the widespread consumer acceptance of traditional ham products.

Comments concerning this proposal must be submitted to USDA by August 31. And Garner says that NPPC will register a strong protest.

He also urges pork producers to send their comments to: Hearing Clerk, Room 1077, South Agriculture Building, USDA, Washington, D.C. 20250.

Md. Porkecue contest set

ANNAPOLIS, Md. – The call is out to Maryland's pork barbecuing wizards; now is the time for one to submit his favorite recipe and enter it in the annual "Maryland Porkecue" cookoff set for September 1 at the State Fair.

This year the contest will be held among the 10 finalists in the brand new livestock exhibition hall on the Timonium Fairgrounds.

Deadline for entries is July 29. The contest, featuring prizes up to $100 in cash, is open to any resident of Maryland. Entries, listing the recipe, one's name and address should be submitted in writing to: Leo Kahl, 3821 Perry Hall Rd., Perry Hall, Md. 21128.

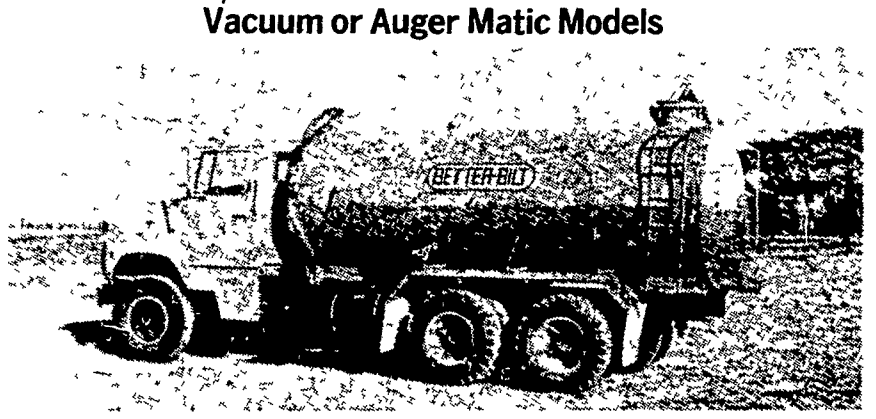
The Porkecue is an annual event soaring in popularity which is sponsored by the Maryland Pork Producers Association with assistance from the Maryland Department of Agriculture's Division of Marketing. It is designed to demonstrate the versatility of today's leaner pork.

Contestants selected as finalists will be provided with fair passes and the use of a brand new electric barbecue for the cookoff. The two basic requirements would-be contestants should bear in mind is that their recipe must include pork and take no longer than one hour cooking time.

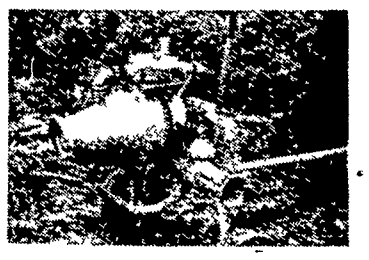
Judges in the contest will be media personalities and food experts.

"BETTER-BUILT" LIQUID MANURE HANDLING EQUIPMENT

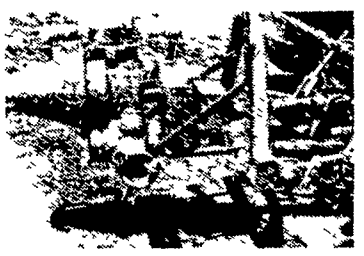
TRUCK MOUNTED LIQUID MANURE SPREADER
Vacuum or Auger Matic Models



TWO WHEEL TRAILER MODEL

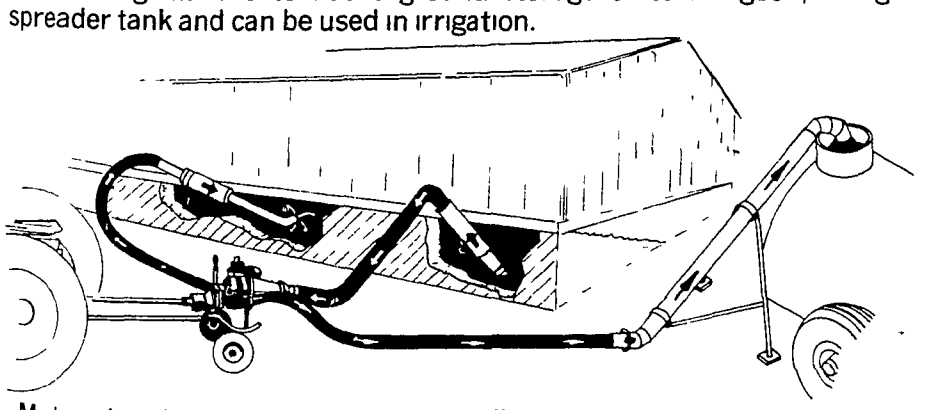


TWO MODELS 800 GPM OR 1200 GPM 3-POINT HITCH MODEL



HIGH PRESSURE PUMP

The "Better-Bilt" High Pressure Pump is designed for: pit agitation, transferring manure to above ground storage or to a lagoon, filling spreader tank and can be used in irrigation.



Material is drawn through a regular 6" suction hose into the pump. The material passes through a cutter block breaking up chunks of solids and cutting other foreign material prior to its entering the impeller The impeller produces a tremendous amount of pressure discharging through a 4 inch pressure hose to a directional pit agitator at the rate of 800 or 1,200 G.P.M. (depending on pump size) at 70 plus pounds of pressure to blast those solids into suspension

Optional two way valve system attachment will allow you to either direct the manure back into the pit for agitation or direct it to a loading stand for the filling of a spreader, transfer to another storage area or to irrigation piping without interruption.

OBERHOLTZER'S CUSTOM MADE VENTILATORS

18", 24", and 30" Vents

- Provides Adequate Ventilation for Curing and Drying Crops
- Prevents Moisture and Heat Damage in Crop or Material Storage.
- Prevention of Spoilage or Damage Can Pay for Costs of Units in a Short Time.
- Used for Industrial Ventilation of Excess Heat — Fumes — Dust.
- Gravity Ventilation is very satisfactory, however, a fan can be mounted in base if forced ventilation is desired.
- By Exhausting Air Through Roof Vents, Entire Window Areas become Fresh Air Intakes.
- Roof Vents Eliminate Moisture which ordinarily Filters Out Through Walls, Causing Warping — Rotting — Paint Peeling
- If these Units are Installed on the Ridge, and Windows are Opened to the Leeward Side of the Building, a Good Winter Ventilation is obtained, Eliminating Cross Drafts.
- These Gravity Units Provide a Gentle, Steady Air Movement Continually without a Forced Draft. Especially advantageous where Animals are Housed.

Onduline® CORRUGATED ASPHALT SHEETING
GUARANTEED 25 YEARS

USE THE ASPHALT ROOFING/SIDING THAT:

- Insulates like cork
- Installs easily on 2 foot centers
- Will not rust
- Will not corrode from fertilizers or chemicals
- Offers a choice of built-in colors
- Requires no special tools
- Is lightweight and flexible.

A thing of the past?

By KENDACE BORRY

LITITZ – A few seasons back, carousel milking parlors were declared to be the latest thing, an item of the future, but recently they seemed to have fallen in the background, no longer talked about. What has happened to their popularity and what do farmers who have them think of them?

According to one dairy equipment dealer, carousel milking parlors are no longer on the market. "They're no longer available," was his quote.

"They were a good idea," he further explained, "giving complete individual cow attention and control but they limit a dairy to around 60 to 75 cows per hour. A farmer just couldn't expand."

"Today automatic parlors are taking over the market for the simple reason that they can be expanded. The set-ups are designed for one person to milk a higher number of cows."

Other dealers confirmed his thoughts on the carousel system, adding that they hadn't been pushed for awhile. However, some companies still have the system on the market, sales just aren't being urged. Carousels can still be purchased.

But what of the farmers who have this system? What is their reaction?

Robert Rohrer, Washington Boro R1, will have had his system five years by the Fall of this year. He milks 200 cows.

"I like it," he stated. "There's less walking than with other types of milking systems."

He noted that he spends about 3½ hours in the barn for each milking system. And he also related that one of its strongest drawbacks is that it can't be expanded.

"I was impressed when I saw it," he observed. "And I had it built for 150 cows. What I have is an eight cow machine."

"A carousel's first cost is a little higher, and there is a bit more maintenance but I still like it," he concluded.

Near Columbia, Amos Breneman milks 100 cows. He stated that he doesn't plan to have more than 100 to 110 cows and for him, the carousel is "okay".

"We've had it since February of 1974," he related. "And we can milk one cow a minute. We got the carousel because the idea looked good. I have no complaints about it."

"Sure once in a while you'll have a mechanical problem, but no more than with anything mechanical. I only hope that if they're being taken off the market, repairs will be able to be done in the future."

Glenn Rohrer, Lancaster R2, said the carousel milking parlor cut down on labor quite a bit. "And," he added, "I like the fact that I can see the cows being milked."

The Rorhers' milk around 168 cows, and they've had their carousel for five years now. They spend about 6½ hours daily milking.

"We'll probably keep our herd the same size for the next ten years or so," he said. "And we have the automatic take-off, which I really think is a coming thing of the future. I really like the carousel."

And Allan Kreider, speaking for himself and his father in Quarryville, said, "We really like our carousel. We milk 200 cows and two people can go in there and milk 90 cows an hour without hurrying. That's fast. I like the way the cows move in and out. This way you have the cow getting on and off and you don't have to move around so much. I'm really pleased with it."

Getting the milk from the cow to the consumer is still the primary function of milking equipment. Those farmers that use the carousel milking parlors seem satisfied with their performance and like the systems.

Pa. broilers up

HARRISBURG -- Placements of broiler chicks in the commonwealth during the week ending June 3, were six per cent more than the same week a year ago, according to the Pennsylvania Crop Reporting Service.

The placements totaled 2,131,000, two per cent below the previous week. Average placements during the past ten weeks were nine per cent above a year earlier.

Placements of broiler chicks in the 21 poultry-producing states were 77,380,000, about the same as the previous week but seven per cent more than the same week a year ago.

Average placements in the 21 poultry-producing states during the past ten weeks were five per cent above a year ago.

The number of broiler-fryers slaughtered in Pennsylvania under federal inspection during the week ending May 24 were 2,020,000 with an average weight of

Commodity futures market explained

By H. LOUIS MOORE
Professor of
Agricultural Economics Extension
Pennsylvania State University

UNIVERSITY PARK – Fact 1: The agricultural boom of the 1970's, along with the increased price instability of agricultural products, has turned the commodity futures exchanges into growing giants.

Fact 2: Most farmers are cautious, conservative, and somewhat confused regarding the purposes and methods of operation of commodity exchanges.

Fact 3: Farmers, the biggest risk-takers in commodities, seldom shift their risks through the use of futures contracts. A survey by the U.S. Department of Agriculture and the Commodity Futures Trading Commission showed that only 5.6 per cent of the 8,000 farmers surveyed use the futures market to fix prices of their products. Probably only one farmer in 30 uses futures markets to any extent.

Those farmers who do not "hedge" were asked to give their reasons for staying away from the commodity markets. About 28 per cent said they were not well enough acquainted with the operation of futures markets. Another 20 per cent indicated their farm operation was too small to warrant trading. The market was considered too risky by 13 per cent, while 10 per cent indicated they lacked sufficient capital.

Futures markets had their beginning in the middle of the last century. At that time transportation was uncertain. Country elevators in Illinois bought grain from farmers and stored it until the canal opened in the spring. The grain was then shipped to large merchants in Chicago. Because of the risks the country elevators had in holding the grain until spring, they developed a practice of selling the grain to Chicago buyers for delivery in the spring. In effect, the risk of a price change was shifted to others who were more willing to absorb it.

By the 1860's the general public became involved as speculators as the large grain buyers sought ways to shift some of their risk of a price change. By the end of the Civil War, contracts became standardized, trading rules were adopted, and trading times and places were specified.

A futures market is nothing more than a market in which certain commodities are bought and sold for future delivery. A December corn contract, for example, is simply a contract calling for delivery of a stated quantity and quality of corn during the month of December. A farmer might make this commitment the previous May when his corn crop is planted, in July when he estimates the approximate size of his crop, or at harvest when he stores or markets the crop. The length of time he hedges will be largely determined by the movement of futures prices as he watches the market during the year.

The futures contract itself is a highly standardized agreement between two parties to buy and sell a specific amount and quality of a commodity at an agreed price at a specified time in the future. One party agrees to deliver while the other agrees to accept the commodity. On the Chicago Board of Trade, the largest of the four grain exchanges, the contract size for grain is 5,000 bushels. The exchange acts as a clearinghouse that keeps records on all transactions occurring on the floor of the exchange. Because the contracts are so highly standardized they can be substituted for each other. Thus, it is not necessary for either party of a contract to deal with the other party when they want to clear out of the market.

The buying and selling of futures market contracts by a farmer is done through brokers, who may be commodity specialists or stock brokers located in nearly any community of any size throughout the United States. These brokers buy and sell on the exchanges after receiving orders from their clients, farmers, and agribusinessmen who are hedgers, and other people in the community who are speculators. The speculator is willing to bear the risk being shifted by the farmer, for example, in return for what he hopes is the potential for a quick and large profit.

Before 1972, farmers were less vulnerable to market fluctuations then they are today. Price support programs and large stocks of surplus grain resulted in stable grain markets through the 1950-72 period. Since the depletion of surplus stocks of grain, beginning in 1972, commodity prices have become highly unstable. The increased risk of violent price changes has created increased interest by farmers and speculators in forward selling.

The volume of contracts traded on the U.S. commodity exchanges reached a record $600 billion in 1975, up 16 per cent from the previous year. The volume of trading continued unabated in 1976, increasing by 16 per cent during the first 11 months of the year. A total of 33 6 million contracts were traded in the January-November 1976 period.

Weather factors and other uncertainties have kept commodity trading in high gear so far in 1977. On the 20th day of May the following number of contracts were traded at Chicago's two exchanges: wheat, 5,398; corn 15,673; soybeans, 31,769; cattle, 14,603; and hogs 6,560. To realize the extent of the volume of trading we must consider the

AFBF opposes gov't. actions for controlling beef prices

PARK RIDGE, Ill. – The administration's action last week allowing additional beef imports into this country was labeled "a grandstand act, played to consumers" by Allan Grant. The Pennsylvania Farmers Association has also protested the move.

Grant, president of the American Farm Bureau Federation, warned that increasing beef imports will have a bad psychological impact on the cattle industry while doing little to reduce supermarket prices, pointing out that imported beef amounts to only about seven per cent of total consumption in this country.

Eugene Thompson

The farm leader said the real effect of the action is to take badly needed dollars out of the pockets of American cattlemen.

"Cattlemen are angry," Grant said, "because they have waited for four years for the market to change. It took difficult management decisions to survive, and hundreds of millions of dollars of debt have been incurred by cattlemen due to the loss position of the cattle industry."

Grant, who is a beef cattle producer himself, said consumers are going to have to pay a little more for beef to assure an adequate supply in the future.

Allan Grant

"It is unfair to a struggling American industry to interfere with a recovery that has taken so long to achieve," Grant said. "Weakening the American beef industry drives consumer's prices higher in the long run.

"The cattlemen are not the culprit in inflation," Grant added. "While beef prices are a very visible part of our daily lives, the root problem with inflation is runaway government spending."

The Pennsylvania Farmers Association also blasted the Carter Administration's move through a letter sent by PFA president Eugene Thompson. Thompson called Carter's decision "a cheap shot at an industry that has taken losses for the last four years and was just now enjoying some signs of improving economic health."

Commodity futures

(Continued from Page 101)

number of bushels or animal units in each contract. At 5,000 bushels per contract the 15,673 contracts for corn traded on May 20 amounted to 78.3 million bushels, the equivalent of nearly one year's production in Pennsylvania.

Could the corn producer have done anything last summer or fall, besides plan to hold his crop in storage, to protect himself against a price decline under the pressure of a possible record corn crop? Yes, he could have hedged in the futures market or signed a cash contract for future delivery of a part of his crop.

Assume a farmer has planted sufficient acreage of corn to yield 10,000 bushels. As the crop progresses up to June 15 he is optimistic about yield prospects. He is interested in hedging half his prospective crop. The process of hedging begins by contacting a commodity broker. Futures trading must be done through someone who has a seat on the exchange. Farmers cannot deal directly with the exchange.

The second step would be to establish with the broker that you are a farmer and will be hedging in the market (the margin requirement for a bonafide hedger is about half what a speculative trader must post). The next move would be to give the broker an "order" instructing him to sell a contract of corn for December delivery. You pick December because you expect to have the corn harvested and ready for sale by then.

When the contract is sold the margin requirement is deposited with the broker (about 10 cents per bushel or $500). By selling a contract the farmer has protected himself against a fall in the price of corn. The cash and futures prices will move together from June through early December and will meet as the maturity date for the contract approaches. When the corn contract was sold on June 14th December corn futures were at $2.83. By December 1, under pressure of a bigger harvest than expected, December futures had dropped to $2.57.

The last and final move in a futures trade is to close out the transaction. The transaction can be closed out at any time after June 14 and before mid-December. Rather than delivering the commodity to fulfill his obligation to deliver corn, the farmer calls his broker and instructs him to take the offsetting position in the futures market. Since a contract was sold in June, one is bought back on December 1 and the farmer is cleared out of the futures market. At this time he pays a brokerage fee ranging from $30 to $45. The fee is paid only once and pays for both the "sell" and the "buy." The trade calls this a "round turn" commission after the completion of both the sale and the offsetting purchase of the contract.

How did this futures transaction turn out? The cash price and the futures price both dropped by 26 cents but the farmer didn't lose any money. He did take 26 cents loss per bushel on the corn he sold on the cash market at $2.57 through his normal marketing channels. But he gained 26 cents per bushel on the futures transaction. He agreed to deliver a contract in June at $2.83 but was able to get out of that commitment at a cost of only $2.57 in December. He did gross $2.83 for his corn while his neighbors were

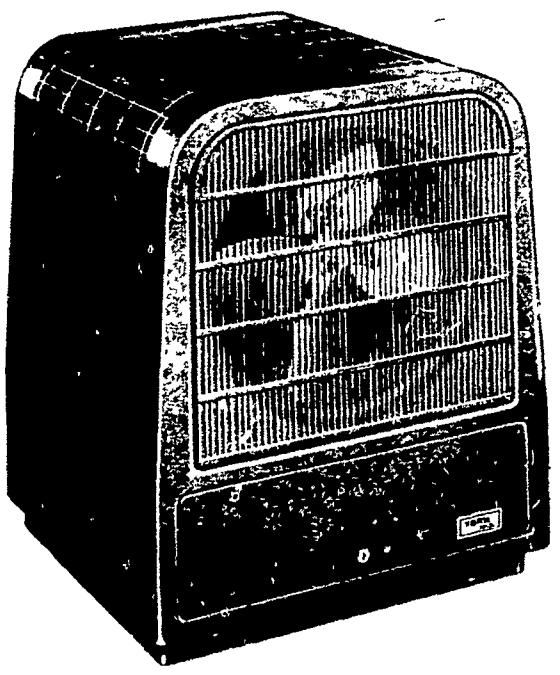
AIR CONDITIONING
YORK CHAMPION IV



THE YORK CHAMPION IV Total Engineering Concept

You expect the air conditioner you buy to cool and dehumidify your entire home In addition, you may be looking for a quiet unit and one that will operate efficiently Certainly you want a system that is easy to maintain or service and one that is built to last Here s how the York Champion IV unit was designed to meet these four basic requirements

I. QUIET OPERATION

The Champion IV unit uses twin fans for low velocity extremely quiet air flow through the unit In fact air flow is so gentle it will not harm vegetation located as close as 12 inches from the coil The compressor is positioned below the twin fans to help disperse its operating sound

The Champion IV unit is engineered to give you as quiet a unit as possible without affecting the other benefits Visit your York dealer and listen for yourself

II. CONSERVE ENERGY

In terms of energy savings the Champion IV unit has been engineered to give you optimum efficiency without sacrificing quiet operation serviceability or durability

Because the York condenser coil uses more fin surface with fewer tubes, a large refrigerant charge is not needed eliminating the need to provide heat to he compressor The Champion IV unit does not consume power when it s off as do conventional units with constantly operating crankcase heaters

Grain industry improving image through FGIS

WASHINGTON, D.C. – The grain industry – symbol of America's agricultural abundance and expertise as well as a top contributor to export earnings – has been much in the news of late. Buffeted by charges of corruption and lax safety procedures, the image of the industry has suffered. The U.S. Department of Agriculture's (USDA) Federal Grain Inspection Service (FGIS), brought into existance by the United States Grain Standards Act of 1976, is working hard – and without fanfare – to help correct these problems.

A key feature of the new agency's work has been to place all inspection and weighing for export under direct federal control or supervision of state agencies. (Previously this had been done, in part, by private inspection agencies.) One such agency was the Albany Port Commission, whose grain inspection and weighing responsibilities were assumed by FGIS on June 5, 1977. Most of its inspectors are now on the USDA payroll. While the basic inspection procedures have not changed, there can now be no question of a conflict of interest since those doing the grading and inspection have no ties to the industry.

John Goitz, heading up the Albany office, described the grading process: "We sample with an automatic sampler, check for condition and quality, and then apply a grade. The grade is determined by an analysis of specific factors. We take into account such factors as odors, the presence of foreign matter in the grain, and the presence of shrunken and broken grain." (A "bad" odor would be a sour, or musty odor indicating out-of-condition grain.)

Goitz is a 30-year veteran in the grain inspection field. He came to work at the private inspection agency in Albany as a sampler in 1947, took the required training, and obtained his license as an inspector in 1951. He worked his way up through the ranks to become the agency's chief inspector.

When FGIS assumed inspection and weighing responsibility at Albany, Goitz transferred to the federal side along with several other key workers.

"We have a top-flight staff of eight people on duty here now, and if we need more help, we can call on other experienced people from the FGIS field office at Philadelphia," Goitz said. "This gives us flexibility to deal with fluctuations in the need for our services."

Some subtle but significant changes that have taken place include the following: When managed by the Port Commission, weighing was done only to meet the regulations of the Association of American Railroads, which required supervision of 25 per cent of the weighing operation. Now, under federal law, the FGIS office is responsible for supervising 100 per cent of the operation, thus providing full service and an anbiased mechanism for handling complaints.

Violations, such as loading off-grade grain results in the sublot being removed from the ship or separately certificated, and the penalties imposed for non-compliance carry the full force of the federal government behind them. Also, services not previously available will soon be added to the Albany operation. Examples of protein and aflatoxin testing follow.

Testing for protein content in hard red winter and hard red spring wheat became available at Albany on May 1. New near-infrared testing equipment has been brought in which can provide an analysis of protein content in about two minutes.

The Albany office is already equipped to provide a black light screening test for aflatoxin, a possible cancer-causing mold in corn. The office also has the equipment to provide the more exact minicolumn test for aflatoxin, and will start that service as soon as the elevator installs the required exhaust system.

"Meanwhile, we can send any samples down to Philadelphia if we need the minicolumn test now," Goitz said. Several foreign governments, including the large-scale Russian buyers, have been requesting that aflatoxin tests be run on corn that they buy.

These additional tests will help answer an increasing demand for additional information about U.S. grain from foreign buyers, and help to further strengthen the nation's export trade.

Since passage of the Grain Standards Act of 1976, many industry leaders have cooperated with FGIS in implementing the Act by such methods as allowing pilot studies to be conducted in their plants. Moreover, they meet continually with USDA officials to share their concerns and to keep each other informed of new developments.

FGIS officials in Albany – and throughout the United States – recognize the central role that grain plays in our balance-of-payments standing. In fact, before oil prices began their dizzying upward spiral, grain was well on the way to becoming the solution to our blance-of-payments problems. If the United States is to retain its key role in world trade, the grain industry must have the confidence of foreign importers, and it is to that end that FGIS' diligent efforts are directed.

As Deputy Administrator for Program Operations, David Galliart, put it, "the grain inudstry moves a product from farmer to consumer – both domestic and foreign – and does so with great efficiency.

Lower fibre dairy rations may reduce Summer production slump

DECATUR, Ind. – High temperatures, high humidity, high fiber rations and poor roughages are summertime conditions that can put milk production in a slump.

"When temperatures top 80 degrees, milk production may drop off as much as 10 per cent," says Dr. Rodney Dennis, Master Mix dairy research specialist.

"When temperatures pass 90 degrees, reductions of 35 per cent or more are possible, especially if the humidity is high," Dr. Dennis says.

He explains that high temperatures decrease the cow's appetite. He reports that a Missouri test showed hay consumption decreased from 29 pounds per day to 15 pounds when the temperature increased from 50 to 90 degrees.

"The feeding of poor quality roughages, or grazing on poor or mature pastures, can cause further milk reductions since they are low in energy and high in fiber.

"As a result, the cow is consuming less of a lower energy feed that in turn produces more body heat and further decreases appetite," Dr. Dennis says.

The Master Mix researcher says that dairymen can turn the 'Summer slump' around by feeding liberal amounts of a high-energy/low-fiber grain ration.

"Such rations provide more energy for milk production, produce less body heat, and help overcome heat stress," he says.

The Master Mix Researcher reports that feeding cows good quality roughages, providing adequately ventilated housing and shade and controlling insects are other management practices dairymen can utilize to prevent summer reductions in milk production.

Order 4 milk $10.71 for May

ALEXANDRIA, Va. – Market Administrator Joseph D. Shine recently announced a May 1978 base milk price of $10.71 per hundredweight for the Middle Atlantic Marketing Order and an excess milk price of $9.08. The weighted average May price is $10.53 and the butterfat differential for the month is 12.3 cents.

The May base milk price is unchanged from March and April 1978 but is 65 cents above the May 1977 base price. The gross value of all producer milk was $50.1 million. Deductions for the Advertising and Promotion Fund totaled $332.0 thousand in May. Order No. 4 prices are announced for 3.5 per cent milk f.o.b. plant location within 55 miles of Philadelphia, Pa. and also within 75 miles from the nearer of Washington, D.C. or Baltimore, Md. There is a 6-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine reported that May producer milk receipts totaled 474.3 million pounds, and the number of producers was 7,219. The average daily delivery per producer was 2,120 pounds. Class I producer milk accounted for 52.04 per cent of total May producer deliveries, compared to 54.54 per cent in April and 53.29 per cent a year ago. Base milk represented 89.53 per cent of total May production.

Middle Atlantic Order pool handlers reported Class I in-area milk disposition of 6.94 million pounds per day during May. Statistical data for May are not comparable with previous data because a handler formerly associated with Order 4 was regulated by another federal order in May.

4-H 5-year plan announced

LEESPORT – A five-year plan for the future of the Berks County 4-H program was presented to the County 4-H Development Council during a meeting on June 12, at the Berks Agricultural Center.

The five-year plan was compiled by a 4-H program review committee consisting of development council members, 4-H leaders, and 4-H teen leaders. Mrs. Sue Roth, a 4-H Horse and Pony leader, presented the committee's final report to the council stating, "We hope this report will be used as the guideline to strengthen the existing 4-H program and to expand 4-H into new areas."

Among the committee's recommendations are plans to develop a 4-H memorial fund, to create a 4-H public relations position, to investigate the possibility of paying area 4-H coordinators, and by 1983 to open an inner-city Reading 4-H office.

Ms. Barbara Stratton, 4-H Extension assistant who advised the committee, commented, "The growth of 4-H depends largely on our ability to spread the word that 4-H isn't just cows and cooking. The scope of 4-H includes everything from an inner-city one-on-one basketball program, to beekeeping, to photography, clothing, ceramics, dog care and much, much, more. We need to do a better job of publicizing what we do. That is why the committee recommends hiring a person strictly for public relations purposes."

The five-year proposal will now be reviewed by various development council committees to assign who will be responsible for carrying out the recommendations.

In other business, the development council heard from Clyde Myers, Extension county agent, on the progress of the 4-H Center, and saw slides presented by Ms. Stratton, on the 4-H public affairs leadership program.

HFA promotions named

BRATTLEBORO, Vt. – Holstein Association staff members James F. Pound, Ronald L. Silverthorn and Michael A. Snyder have received promotions to management positions in the organization's newly created Field Division, Zane Akins, HFA executive secretary, recently announced.

Pound, formerly Director of Extension, has been appointed director of the Field Division, which includes Classification Services, Consultation Services performed by program directors and the Holstein Sire Development Service, HSDS. James L. Copper will continue as manager of HSDS.

Akins said Pound's responsibilities include the management and coordination of all services and programs through the Association's field staff. Pound is also responsible for junior programs and communication with state associations.

Pound is a native of Pennsylvania, where he grew up on a Holstein farm. He graduated from Pennsylvania State University with a major in Animal Husbandry.

Michael A. Snyder, manager of Consultation Services, is responsible for the training, coordinating, supervising and evaluating of 19 program directors, explained Akins. These 19 men, working in 16 geographic areas of the country, provide professional consultation services to Holstein dairymen. Snyder will be managing the Genetic Evaluation and Management Service as well as the Classification Herd Builder Service.

Ronald L. Silverthorn will be responsible for managing, supervising, training, and evaulating the Holstein Association's staff of twenty-two official classifiers.

Silverthorn has a lifetime of experience working with registered Holsteins. He was born and raised on a Holstein farm. After graduating in 1962 from the University of Missouri with a major in dairy science, he returned to the home farm and went into partnership with his father and brother. They milked 100 Holsteins on the 500 acre farm.

Strawberry champion wins top honors again

By KENDACE BORRY

LANCASTER – For the third year in a row, the top championship honors of the Lancaster County 4-H Strawberry Roundup went to Glenn "Buddy" Shenk, Lititz R2. The 16-year-old member of the Elm-Penryn 4-H remarked that he hadn't expected to win the top spot this year, as his strawberry crop was "just starting to come in".

This is his sixth year raising strawberries, and he has about 350 plants in his patch. A business that started with him just selling his produce to his neighbors has blossomed into a strawberry service for which now he takes orders for his prize winning berries.

The championship box of the red fruit was bought by Andrew Gianopoulus, Lancaster, who runs his catering service. Price for the quart was $50.

A second box of the top winning strawberries went for $40 and was bought by Dale High.

Reserve champion honors were won by Ed Nissley, Manheim, who is a member of the same club. While not present to receive his award, his younger brother Phillip, who placed third in the strawberry standings, saw that his fruit was sold. Prices for the reserve champion two boxes of strawberries were $10 and $8.

Glenn "Buddy" Shenk, Lititz R2, shows his prize winning box of strawberries. He has something to smile about for this is the third year in a row that he has won championship honors in the contest.

The champion, reserve champion, and third place strawberries were the Jersey Bells variety.

Other placings included: fourth place, Martha Gregory, Lititz; fifth place, Ray Wallace, Quarryville R2, sixth place, Bev Buckwalter, Lititz R3. Seventh place winner was Alex Hartzler, Mount Joy R1; eighth place went to Cindy Risser, Leola R1; ninth place went to Sheila Nolt, Ephrata R1; and tenth placing was won Karen Mullen, Peach Bottom R2.

Sixteen 4-H'ers participated in the contest. The event was held at the Lancaster Farm and Home Center, and sponsored by the Lancaster Rotary Club.

Auctioneer for the event was Harold Keller, who remarked that he sold his first box of strawberries for 4-H in 1961 and had been doing it ever since. Under his spirited prompting, the price of the champion box of strawberries rose from its starting bid of $10 to its final price of $50. Last year's championship box also brought $50.

Keller urged the Rotary members to look at the champion fruit, which were a deep red and the size of silver dollars. He told young Shenk to keep from smiling until after the award winning box was sold, so that the bids would go higher. And, stopping for a moment during the sale, he let Shenk comment that "it was cold picking the berries" that morning.

Third place boxes of strawberries brought $8 and $5. The fourth place price of strawberries was $3.50.

In addition, the 4-H'ers sold other boxes to the Rotary members for $1 each.

AFBF, PFA blast Carter for allowing more meat into country

PARK RIDGE, Ill. – Farm ureau is strongly opposed government actions med at controlling beef ices by increasing meat nports.

In a telegram to the president, Allan Grant, president of the American Farm Bureau Federation recommended that no action be taken at this time to increase meat imports, saying his position "is supported by an analysis of the present and prospective beef situation."

Farm Bureau Federation last week recommended that no action be taken at this time to increase meat imports, saying his position "is supported by an analysis of the present and prospective beef situation."

Despite the warning from AFBF and other organizations, President Carter last week authorized an increase in beef imports.

The telegram said that beef prices are currently at levels substantially above those anticipated by most, if not all, forecasters and may stabilize or even decline if nothing is done.

Farm Bureau said that rising domestic beef prices, long overdue, are a very small part of the government's inflation problem and charged that the basic cause of inflation is excessive government spending.

"Renegotiation of the existing voluntary quotas on foreign beef or a complete suspension of the Meat Import Act would be very costly to the U.S. cattle producers and feeders who have sustained tremendous financial losses over the past several years due to inflation and the adverse effects of the cattle cycle, compounded by drought," the telegram said.

Pointing out that hundreds of millions of dollars of debt have been incurred by cattlemen due to the loss position of the cattle industry for the past four years, Farm Bureau said the beef industry, responding to higher prices, is now beginning to rebuild cattle herds.

Farm Bureau added that the beef industry has the ability to meet the needs of consumers "barring artificial interruptions to the production and marketing of livestock and meat."

Ground broken for new USDA soil and water laboratory

BECKLEY, W. Va. – Ground was broken here June 10 for a new U.S. Department of Agriculture (USDA) laboratory for the study of soil and water problems in the central and northern Appalachian region.

When completed, the Appalachian Soil and Water Conservation Research Laboratory will provide space and facilities for 16 research scientists plus 35 to 40 technicians, field workers and other support staff. Facilities will include eight laboratories and six greenhouses, plus growth chambers, shops, and storage buildings in a 42.7 acre site.

Scientists at the Beckley laboratory will deal with a variety of problems associated with hill-land agriculture and reclamation of strip-mined and other disturbed land.

This research will have special application to revegetating surface mine spoils by developing practices to minimize soil and water loss from these areas.

Another research goal is to develop conservation cropping systems. One approach is no-tillage and minimum-tillage systems that aid in crop production and at the same time reduce soil and water losses. Another is establishing and maintaining legumes in hillside pastures, which may involve special seeding and fertilization techniques.

Scientists at the Beckley lab will also be working on methods to use water more efficiently. This is particularly important on the shallow soils and steep slopes that are typical of the Appalachian region. Ways will be developed to conserve the available water and to prevent water pollution from runoff and erosion.

HOW UNIPEL® 10-10-30 puts new flexibility in fertilizer planning:

This UNIPEL fertilizer provides all of the Phosphorus and Potassium needed for a Spring plowdown application for soybeans. It's also an excellent fertilizer to boost forage yields of legume crops such as alfalfa.

If you use split-application fertility for corn . . it provides all the P and K you'll need to team up with the Spring supplemental N of your choice.

The chemical combination of N and P in UNIPEL 10-10-30 enhances Phosphate uptake and increases the fertilizer's efficiency. ORTHO's unique "Phospho-Nitric" manufacturing process for UNIPELS produces its long-lasting form of Phosphate that resists fixation in acid soils and is readily available for plant use whether applied Spring or Fall.

UNIPEL 10-10-30 gives you lots of options for fertility programming. Let's discuss how we can fit it in yours.

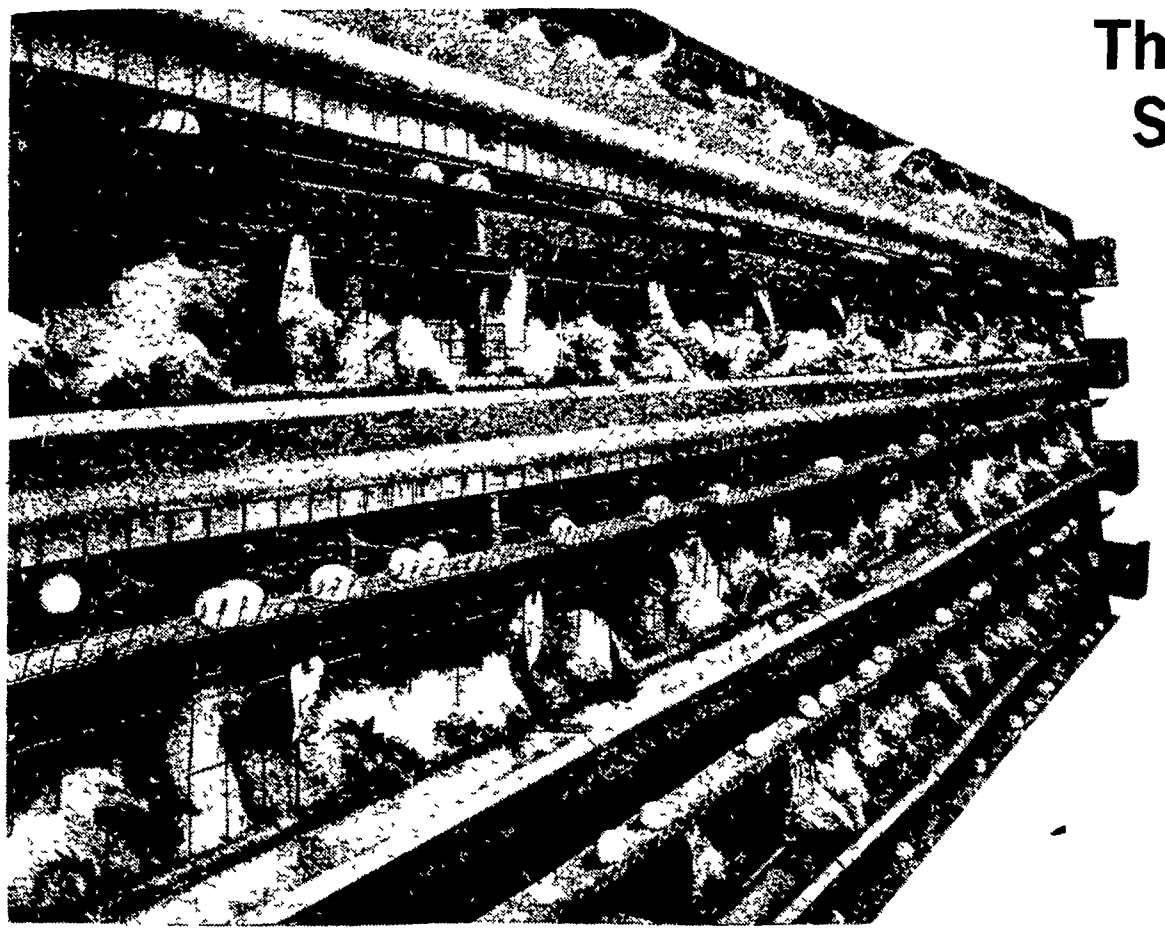
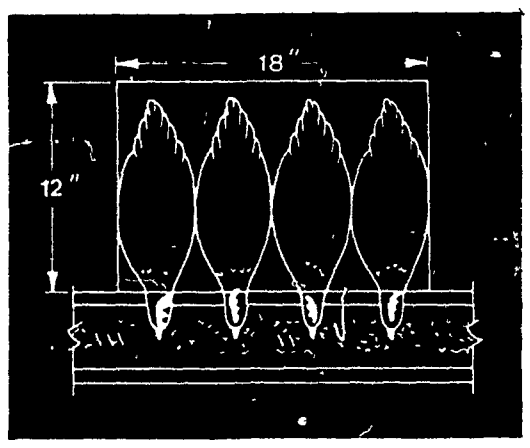
THE REVERSE CAGE

EVERYBODY'S TALKED ABOUT IT. A. R. WOOD BUILT IT.



The 4-Deck Reverse Cage Slant Back System From A.R. WOOD Is Built To Deliver EXTRA NET PROFIT: UP TO 50¢ EXTRA NET PROFIT PER HEN PER YEAR!



Research has confirmed that less competition at the feed trough is one key to more eggs and more net profit. With proper management, The Northco® 4-Deck Reverse Cage Slant Back System from A.R. Wood will deliver extra net profit from the day it's installed. Here's why: ■ The extra equipment costs are offset by savings in building costs (in new construction). ■ There's no increase in operating cost, no extra feed. ■ The Reverse Cage delivers fewer cracked eggs. ■ Slant back design eliminates the need for dropping boards and dropping board scrapers. ■ The Northco® Core Auger mixes the feed as it moves, to prevent feed separation. ■ There's only a 2" setback per tier, so there's easy access to all levels.

AAW urges reconsideration of meat import expansion

MANCHESTER -- American Agri-Women has contacted President Jimmy Carter urging him to reconsider the recent decision to expand meat imports.

In a wire sent last week to both the President and Secretary of Agriculture Bob Bergland, the A.A.W. membership urged: "Please be informed that American Agri-Women is against your pending decision to relax the meat import quotas on beef.

We are aware that the Senate passed HR 5052 and Chairman Foley's urging that the administration avoid action to increase beef imports.

Will the leadership never learn? Restraining cattle prices by increasing imports, the bottom line will be damaging to consumers. Remember 1973.

Supply and demand – how can the market place work, when the government artificially creates or surpresses a market? The United States is supposed to be a "Free Society." Let your administration now step forward to guard our freedom, whether it be a racial issue or an agricultural issue."

Ethel Gross

Ethel Gross, Manchester R2, state coordinator of Penn's Agri-Women urges members to immediately contact their representatives in Washington with economic information on how expanded beef import quotas will affect their farm incomes.

"Call or write to President Carter, Secretary Bergland, Senators Heinz and Schweiker and you congressman," emphasized Mrs. Gross. "They need to hear immediately from their farm constituents that more meat imports will only prolong the food supply problems, make the United States more dependent on foreign imports, weaken our balance of trade, and undermine the stability of the American farmer."

Penn's Agri-Women is an affiliate of American Agri-Women. Both organizations are coalitions of farm wife groups and individuals, and were founded to work toward fostering a better understanding of farm problems by the non-farm consumer.

AUTOMATIC ELECTRONIC
FEVER THERMOMETER
Operates on 9-volt battery.

A new, affordable, needed product for livestock. Ideal for veal operations. No need to wait 3 to 5 minutes. Actual time required is about 30 seconds.

House ag subcommittee approves bill okaying percentage livestock tariffs

WASHINGTON, D.C. – The House agriculture subcommittee on livestock and grains has adopted a substitute bill introduced by Rep. Ray Thornton (D-Ark.) to recognize the legality of value based, percentage livestock tariffs and lessen the government's authority over marketing service rates and charges.

The substitute bill (H.R. 9482), which now goes to the House Agriculture Committee, was developed by Livestock Marketing Association (LMA) working with Rep. Thornton and the subcommittee staff.

LMA, which has taken the lead in seeking deregulation of the marketing sector, had formally opposed a March 30 administrative proposal by the U.S. Department of Agriculture. That proposal would prohibit value-based tariffs and otherwise tighten government control over marketing businesses.

The Subcommittee, meeting on June 8, considered the substitute Thornton bill and a new bill offered by USDA. The government's bill would have allowed per-head or value-based tariffs, but would have continued to allow USDA's Packers and Stockyards branch to determine whether such charges were "reasonable."

After considering comments from USDA's Packers and Stockyards, Agricultural Marketing Service, the subcommittee voted to adopt and forward the substitute bill to the full House Agriculture Committee.

Commenting on the Subcommittee's action, J.D. Branscome, chairman of LMA's Livestock Marketing Forum, said, "The Thornton bill will give the nation's livestock marketing business the right to determine their own rates and charges, governed by the competitive pressures in a free economy.

"The marketing sector simply could not consider supporting the proposed USDA bill because it still allowed the government to decide what charges were 'reasonable.' Our position is that USDA's concession to now allow percentage-based tariffs is meaningless as long as the agency retains the right to arbitrarily approve or disapprove the charges.

"We're pleased that the Subcommittee agreed with that position," he added.

Noting that LMA's Washington Affairs office had a key role in drafting the amended Thornton bill, LMA General Manager C. T. 'Tad' Sanders said the office also had analyzed letters USDA had received commenting on its March 30 proposal.

"Of the 716 letters the agency received, an overwhelming number opposed any government regulation of rates and charges. The Thornton bill now reflects this position and we will continue to press for its final passage," Sanders said.

Peach production down

HARRISBURG – Pennsylvania Secretary of Agriculture Kent D. Shelhamer recently said the state's 1978 peach production is expected to lag last year's crop substantially.

Shelhamer said a survey by the Department's Crop Reporting Service shows Pennsylvania peach production is forecast at 85 million pounds as of June 1. This would be 10 million pounds or 11 per cent below the 1977 crop.

United States peach production is forecast at 2.73 billion pounds, down nine per cent from last season and 10 per cent below the 1976 total.

The California Clingstone Peach crop is expected to total 1.25 billion pounds, 17 per cent less than both 1976 and 1977.

White's 2-135 Field Boss...new built-in strength and working features in the 135*-hp class.

If you're in the market for a big row crop tractor, we invite you to consider the extra built-in strength and working features of a new White 2-135 Field Boss® that some competitors consider options.

White provides you with the largest displacement turbocharged engine in the 120 to 140-hp class. Plus our proven 18-speed 3x6 Over/Under Transmission with 3-speed powershift and 13 working speeds is standard equipment.

More extra value features...standard engage on-the-go differential lock...a standard Cat. III-II hitch with quick coupler plus extra heavy duty inboard planetary final drives. Then add 14,000 lbs. of actual built-in working weight...plus a standard new deluxe Field Boss cab.

Measure our competitor's tractor...by our tractor. See us today.

Northampton Co. dairymen crown 1978 princess

EASTON – Diane Liiro of Bangor became the 1978-79 Northampton County Dairy Princess at a pageant held June 9 at the Palmer Mark Mall, Easton. The 17-year-old June graduate of Bangor High School and Eastern Northampton Vo-Tech is a daughter of Mr. and Mrs. Salvatore Liiro.

Named alternates were Cindy Fredricks, 19, daughter of Mr. and Mrs. William Fredricks, of Easton, and Martha Guest, 17, daughter of Mr. and Mrs. Herbert Guest, of Nazareth.

Miss Liiro was a member of the dairy judging team at the vo-tech school and vice president of the FFA. She owns four Holstein heifers and is a full-time employee of Fancy Furrow Farms, Easton. She is also treasurer of the district Dairylea Young Cooperators.

This is the first time in over 10 years that Northampton County has held a dairy princess competition. Miss Liiro will be the official representative of the county dairy industry throughout the year, and will compete in September against county princesses throughout Pennsylvania for the state title.

Over 100 persons watched as each contestant presented an original demonstration and was then asked a series of questions by master of ceremonies Ernest Miller, a Berks County dairy farmer, and father of the current Pennsylvania dairy princess, Sandy Miller, who crowned the winner.

The contestants were judged on their personality, appearance, ability to speak in public, and knowledge of the dairy industry. Judges were Mrs. Richard Anderson, past chairman of the Lehigh Valley dairy princess contest; Mrs. Kenneth Gross, former home economist with the Lehigh County Cooperative Extension Service, and David Dunbar, county agent with the Lehigh County Cooperative Extension Service.

Diane Liiro of Bangor was chosen this year's Northampton County dairy princess.

In the hour preceeding the program, Mrs. Eleanor Karaffa, a nutrition consultant in Northampton County and graduate student at Columbia University presented a talk on the value of milk, and samples of dairy products were offered to mall shoppers.

Each contestant was presented with an engraved pitcher, and Miss Liiro was given a $25 savings bond.

The event was sponsored jointly by the Northampton County Cooperative Extension Service and the Northampton County Holstein Club.

Muncy Chief supports pullers

MUNCY – The Muncy Chief Hybrids Seed Company of Muncy, Pa. has announced an expanded pulling support program with the National Tractor Pullers Association for 1978.

The seed company has been involved with the NTPA's "Puller of the Year" program for the past three years, but for 1978, the program will be re-named "Modified Puller of the Year".

Additionally, Muncy Chief sponsored the Penn National State Fairy-Muncy Chief Tractor Pull at Grantville, Pennsylvania's Penn National Race Course.

The Penn Winternationals invitational pull in Harrisburg at the Pennsylvania Farm Show Arena in January has also been co-sponsored by Muncy Chief for the past three years.

Highly prized by modified tractor competitors, the Muncy Chief Award is one of the highlights of the NTPA Awards Banquet to be held on December 2, 1978 in Indianapolis, Ind.

Keep boars from heat -- up conception rates

DECATUR, Ind. – Hog producers who have seen sow conception rates slip from July through September can put at least part of the blame on heat-stressed boars.

High temperatures normally associated with these hot Summer months can seriously affect boar reproductive performance unless steps are taken to keep them cool, according to Dr. Jerry Faber, a Master Mix swine research specialist.

Dr. Faber says North Carolina State researchers have found that permanently housing boars in facilities with temperatures under 80 degrees will help maintain high conception rates all year long.

Tests conducted at Oklahoma State University revealed that exposing boars to a temperature of 94 degrees eight hours daily over a six week period resulted in reduced semen quality and sperm numbers.

"The stress effect on semen quality was noted up to five weeks after the end of heat stress," he says.

Dr. Faber adds that when heat-stressed boars were mated to gilts, conception rates dropped 23 per cent compared to those for gilts bred to boars housed at 74 degrees.

The swine specialist says that simply providing shade during hot months is not enough.

"If controlled temperature facilities are not available, providing shade with sprinklers is the next best thing.

If it's not feasible to keep boars cool during Summer months, then consider breeding additional gilts during the stress period, Dr. Faber says.

It has been estimated by researchers at North Carolina State University that a producer with a 90-sow herd could increase income by $7700 per year with every 10 per cent improvement in conception rate.

Pesticide contaminated clothing requires special handling

NEWARK, Del. – If you farm or garden, the way you launder your clothing may be bad for your health. According to Delaware Extension home economist Janet Goszyk, clothing worn during pesticide application picks up residues which can then enter the body through the skin. Pesticide need not actually be spilled on the clothing for this to occur, as contamination may also be caused by drift.

A group of Iowa researchers wanted to find out if these dangerous residues were being removed by normal home laundry procedures. They chose two common work fabrics, a heavy-weight cotton denim and a polyester/cotton blend chambray. They tested them with two representative agricultural chemicals, an insecticide called Thiamet and an herbicide called atrizene (AAtrex).

In the tests, the prewashed fabrics were contaminated with the chemicals and washed and dried following normal home laundry procedures. The fabrics and water samples were then tested for chemical residues.

The study showed that there are good ways to remove agricultural chemicals from work clothing, but a little extra care is required.

The following laundry procedures are best for removing pesticides or herbicides:

*Clothes worn while applying the chemicals should be laundered daily.

*Contaminated clothing should not be mixed with other laundry.

*Contaminated clothing should be placed in a plastic bag to await laundering, or placed directly into the washing machine after removal.

*Use hot water (140 degrees F.) and a full water level.

*Use the manufacturer's recommended amount of heavy duty phosphate-based detergent.

*Thoroughly dry the clothes in an automatic dryer for 30 minutes at the regular fabric setting.

*Remove any leftover chemicals from the washing machine by running the machine through the complete laundering cycle using the detergent but no clothing.

Wool pool set

FLEMINGTON, N.J. – The annual wool pool of the N.J. Sheep and Wool Cooperative is scheduled for Friday through Sunday, June 23 to 25, at Cook College, New Brunswick.

The bid this year went to A.H. Helmig Co., Narberth, Pa.

Deductions are made for a marketing charge and $1 for membership fee.

The hours are: Friday, 1 to 6 p.m., Saturday and Sunday, 8 a.m. to 6 p.m.

The receiving point is the Machinery Garage, College Farm Rd., on the Cook College Campus, adjacent to Rt. 1.

Commodity futures

(Continued from Page 102)

selling for $2.57. (He did have the additional cost of the commission and the cost of the interest on the margin money posted in June.) Table 1 shows how this transaction turned out:

Table 1: Corn growers hedge in a falling market

Cash market	Futures market
Owns 5,000 bu. of corn @$2.83	Sells 5,000 bu. of corn @$2.83
Sells 5,000 bu. of corn @$2.57	Buys back 5,000 bu. of corn @$2.57
Result is $.26 decline	Result is $.26 gain

Table 2: Corn growers hedge in a rising market

Cash market	Futures market
Owns 5,000 bu. of corn @$2.83	Sells 5,000 bu. of corn @$2.83
Sells 5,000 bu. of corn @$3.09	Buys back 5,000 bu. of corn @$3.09
Result is $.26 gain	Result is $.26 decline

In this example the farmer gained 26 cents per bushel or $1,300 for his 5,000 bushels of corn by hedging on the futures market. In June he shifted his price risk to a speculator. One man's gain is another's loss. In this case the speculator lost 26 cents per bushel or $1,300 for the contract. There is no question that hedging at the right time would have helped many grain growers in 1976.

But suppose the harvest wasn't so good in 1976 and the cash and futures markets increased by 26 cents per bushel. The cash and futures transactions would look like this:

Even in this example the farmer didn't lose any money. He gained on the cash market what he lost in futures. He had the security of knowing that he would get $2.83 for his corn all through the growing season. A speculator picked up the price risk for the farmer and gained 26 cents per bushel in this example. The farmer was assured $2.83 per bushel for his corn. However, if he had not hedged he would have gotten $3.09 for his corn in the example. By letting someone else carry the risk of a price change he had to forego some of the profits in a rising market.

Hedging in the futures market often offers producers the advantage of being able to lock in a satisfactory profit for crops yet unplanted, growing, or in storage. It reduces the risk of a price change, gives the grower some security, and gives some stability to the planning processes of farmers. The farmer can make more rational production and storage decisions and many will find that hedging enables them to get needed credit. Many lenders to larger farmers require that they hedge their operations because of the large amounts of capital borrowed.

Hedging requires a great deal of knowledge about how the markets operate. A considerable amount of time will be spent in conversations with your broker, too. Most contracts involve large amounts of the commodity — 5,000 bushels of grain, 40,000 pounds of cattle, or 30,000 pounds of live hogs. This gives the impression that hedging is only for larger producers. There is the added disadvantage that each commitment in the market must be backed with margin money. This becomes a sizable hurdle for many farmers, especially if the money must be borrowed. The risk of an additional margin call by the broker is also a concern of producers. Additional margin money is required if the market goes against you and the original margin money is depleted by a given percentage.

Commodity Futures

(Continued from Page 114)

In the past many producers shunned hedging because they considered if a form of gambling. They were fearful of the image they would gain in the community if it became widely known that they were hedging. But speculators do the gambling, not the farmers.

Many accuse the futures market of being the primary reason we have had such great instability in prices of farm commodities. They cite the growth in trading as evidence. The truth is that trading has increased sharply because of the instability and has not caused the instability.

Another closely related myth is that wide use of hedging will cause prices to be stable over the period of a year and will free the market from such wide price variations. Price variations in the 1972-76 period have been exceptionally large, during precisely the years of increased trading.

This depends entirely on what an individual's marketing objectives are. If you are a middle-aged farmer, financially independent, and can take price risks and survive, you will probably prefer to take your chances in the cash market.

A younger farmer may be unable to assume the risk of a price change because he is heavily in debt and may not have the temperament to worry constantly about price changes. Hedging can give this man some marketing security. Some choose to hedge with half the crop and speculate with the other half.

If the mechanism of the futures market completely mystifies a farmer, he can still do some "hedging" without the mechanism of the market. This is called forward cash pricing. Here he agrees to deliver the actual grain to a buyer at a future date at a specified price. By forward "booking" with a buyer, the grower has much the same security as with hedging.

However, the buyer is assuming some of the market risk in forward contracting so he may not offer a price as high as the futures price. He is providing a service to the producer and often covers his risk by hedging. While essentially the same as hedging, forward cash contracting frees the producer from learning all the mechanisms of the futures market.

Forward pricing by hedging or forward cash pricing allows a farmer to "presell" his crop while it is in storage, still growing, or even before the crop is planted. Forward pricing can be seen as a substitute for a cash sale. Because of the increasing risks in agriculture, it is expected that all forms of forward contracting will grow in the future.

Farmers pride themselves on being part of the big business known as agriculture. Those who continue to grow in the business may have to accustom themselves to using big business tools such as forward pricing, whether it be hedging or cash contracting.

N.J. battles cereal leaf beetles

NEW YORK -- A significant battle in the war against cereal leaf beetle is taking place this month in New Jersey as federal and state agents launch their second consecutive biological control attack against this destructive pest of small grains.

The agencies involved – the U.S. Department of Agriculture (USDA), and New Jersey Department of Agriculture – held a Cereal Leaf Beetle Parasite Field Day June 8, as this year's compaign gets underway.

Representatives of the USDA's Animal and Plant Health Inspection Service (APHIS) collected cereal leaf beetle parasites at an insectary on land owned by USDA near Niles, Mich.

After the parasites were collected, and packed in specially prepared containers, they were flown to designated airports around the state where New Jersey Division of Plant Industry coordinators distributed them to county agents waiting to pick them up. Later that same day, the agents released the parasites in preselected fields infested with the cereal leaf beetle.

Tiny wasps imported from Europe, which attack only the cereal leaf beetle and do not sting, are the key to the federal-state biological control program for this pest. The wasps seek out the beetle's larva (the growth stage following the egg stage) and lay their own eggs inside the host. When the parasite eggs hatch, the young wasps eat their way out, destroying the cereal leaf beetle larvae in the process.

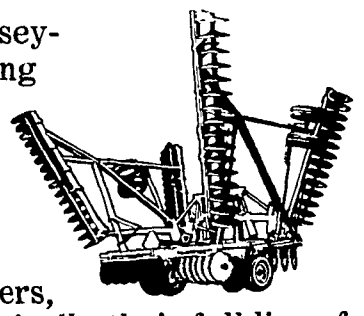
The beetle is primarily a European-Asian pest that was first identified in the United States in 1962 in southwest Michigan. A flying pest, the beetle has since spread via prevailing winds to the north and east, and to a lesser extent to the south, including all or parts of Ohio, Illinois, Kentucky, Maryland, Michigan, Missouri, New York, Pennsylvania, Tennessee, Virginia, West Virginia, Delaware, New Jersey, Massachusetts, Vermont, Wisconsin, New Hampshire and Connecticut.

Massey-Ferguson

Summer Stampede Sale!

Big Cash Rebates On MF Implements – Save $30 to $400

That's right. Massey-Ferguson is offering big cash rebates right now on plows, discs, cultivators, drills, mowers, rakes, grinder mixers, spreaders . . . practically their full line of MF implements. Depending on the implement you purchase, Massey-Ferguson will give you a $30 to $400 cash rebate! There's a lot of work ahead this season, so now's a great time to gear up at the best prices ever.



$600 Rebate on Tractors, Too!

Massey-Ferguson is also offering a $600 cash rebate on the purchase of any 34 to 81 hp tractor. With MF's wide selection in this all-around power range, there's sure to be a model that just fits your needs. But hurry — the rebate offer is in effect only during our Summer Stampede Sale.

MOVE UP TO MASSEY-FERGUSON

Hurry! Summer Stampede Sale offer ends July 28, 1978. Limited to available inventory.

Legislation is sprouting for land preservation

By JERRY WEBB
University of Delaware

NEWARK, Del. – The time is at hand for action in preserving this nation's valuable agricultural land. Although there has been a lot of talk, some legislation, and a small amount of money set aside for that purpose, very little has been done on a nationwide basis to preserve our important food-producing space.

A number of states have taken some legislative action, mostly in the vein of giving farmers tax relief, but only one has funded legislation that will effectively preserve agricultural land.

Last December the governor of Massachusetts signed the Agricultural Preservation Restriction Act, which made that state the first to take that step. Maryland passed a law, but has not funded it; New York has invested considerable money in a pilot program on Long Island; and New Jersey is experimenting in three townships. But the Massachusetts program authorizes a five million dollar bond issue with the revenues to be used for the express purpose of preserving that state's ability to produce food. The record shows that in about 30 years time, the Bay State went from 35,000 farms to only 5,000.

The new law gives Massachusetts farmers an alternative to selling their farms to land developers, and since virtually all farmland is no more than an hour from an urban center, it's all worth much more for development than for farming. And, of course, that's the problem. The old concept of selling agricultural land to the highest bidder has put that state in a very unique position. It now imports 85 per cent of the food its people eat and without the preservation act it might, in the very near future, import all of it.

With this in mind the Massachusetts legislature passed, and the governor quickly signed, the preservation act knowing that further delays would reduce the farmland base even more. That state now has only 60,000 acres of farmland, compared to about two million acres back in 1945.

High real estate taxes and high inheritance taxes have been the primary cause of the demise in Massachusetts farming. Farmers found they could no longer pay the heavy taxes from farm earnings. So they turned to their best alternative and that was to sell the land to a developer.

Under the new law, if a farmer is willing to give up his development right the state will pay him the difference between what the land is worth as a farm and what he could get for it on the open market. The net effect is to give the farmer income, which he deserves, from the potential value of the land without sacrificing the agricultural productivity of that land.

Once the development rights are sold the farm returns to its value as an agricultural unit. That means both land taxes and inheritance taxes will be based on its farming potential.

The long-range implications of this statewide act are enormous. Most important, it will put farmland values more in line with poduction potential, which in turn will open them up to new buyers – young men and women who would like to farm but who up until now could not afford development prices.

No doubt the Massachusetts act will become a model for many states that are already talking about such a law. A Vermont congressman has introduced a bill that would provide federal funding for states that want to develop pilot agricultural preservation programs. That bill, if it finally clears Congress, would supply up to 75 per cent of the cost of such farmland perservation programs.

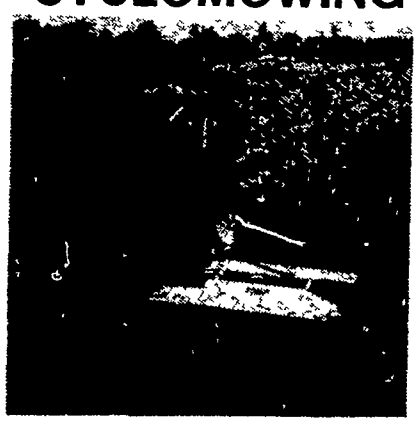
Most discussions I've heard about this kind of farmland preservation center around the cost per acre to buy development rights, what a farmer has to give up, and what the taxpayer is buying. Some taxpayers find it difficult to pay a farmer a large price for a piece of land that the farmer continues to own and operate. On the other hand, many farmers are reluctant to sell the inheritance value that might someday go to their sons and daughters at a price that seems fair now but in 20 years might be ridiculously small.

No doubt participation in such a program depends on a large amount of funding and substantial figure per acre for development rights. After all a farmer who signs such a program enters into it forever and gives away that one important right – that is to sell it to the highest bidder for whatever purpose. It is one that farmers in-general will enter into very cautiously.

Nutrition education funded

WASHINGTON, D.C. – Assistant Secretary of Agriculture Carol Tucker Foreman has announced that the U.S. Department of Agriculture is making $26 million available to states to conduct a new nutrition education and training program. Pennsylvania will get $1.3 million.

Haymaking Made Easy
CYCLOMOWING - with PZ



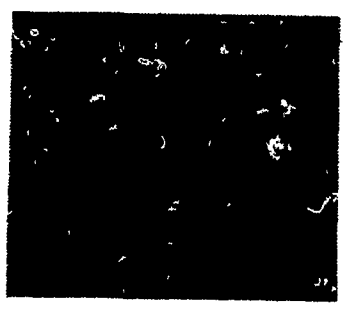
- Two & four drum mowers
- The answer to saving wet hay and making quality hay fast, easily and efficiently.

Experience very fast clean, non-stop, non-choking mowing day or night under adverse conditions - even in wet, blown-down, tangled crops.

The Cyclomower will **spread the hay as you mow for faster curing** or windrow for direct baling.

All knife blades are low cost and changed in just seconds.

PZ HAYBOB HAYMAKER



- Two & four rotor models
- Spreading
- Tedding
- Windrowing

Spreading and tedding of wet green hay, plus raking loose fluffy windrows - with just one machine

Widths up to 16 feet, with one or two windrows each trip The Haybob can pay for itself in just one wet hayfield

Let us demonstrate the new PZ Cyclomower and the PZ Haybob to you Through the local dealer of your choice we'll show you how to make quality hay without the usual frustrations of aggravating machinery and rainy weather

Heavyweight hogs win at market show and sale

LANCASTER – The pen of ten heavyweight hogs weighing 253 lbs. owned by Jacob F. Stoltzfus, Gap R1, was named champion at the Lancaster Market Hog Show and Sale held at the Lancaster Stockyards Wednesday. The hogs brought $57.00 per hundredweight and were sold to the Leidy Packing Company, Souderton.

Reserve champion pen of hogs came from the mediumweight class, weighing 230 lbs. The animals, owned by Amos B. Hoover, Denver were bought by Hatfield Packing Company, Hatfield, for $55.00 per hundredweight.

First place in the lightweight division went to David Z. Martin, whose hogs weighed in at 198 lbs. They, too, were bought by Hatfield Packing Co., for $52.00 per hundredweight.

Judge for the event was Daryl Sheiss, Chambersburg, who raises hogs. He told his audience that the champion hogs were the kind of hogs that the packers would like, with a lot of red meat. He added that the animals would stay sound, and were just generally "good hogs". He noted that he was pleased with the top end of all the classes of hogs.

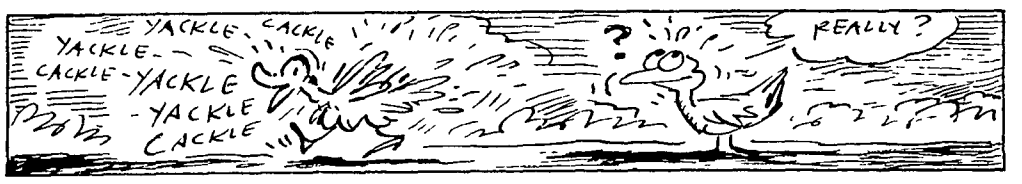
There were 230 head of animals shown in the sale. Average weight of the hogs was 223 lbs., with the average price of the sale being $52.22 per hundredweight.

Other placings included: Lightweights, second, Edwin Ranck; third; Clair Frey; fourth, Stephen S. Stoltzfus; and fifth, John D. Stoltzfus. Mediumweights, second, Dutch Valley Farm; third, E.M. Herr; fourth, C. David Landis; and fifth, James Ranck.

In the heavyweight division, placings included: second, Rutter; third, Amos M. Stoltzfus; fourth, Ralph Myer; and fifth, Amos Lapp.

In the heavyweight division, placings included: second, Rutter; third, Amos M. Stoltzfus; fourth, Ralph Myer; and fifth, Amos Lapp.

Ken Hershey, representing Leidy Packing Company, Souderton, stands with some of the hogs named champion at the market show and sale. The hogs were sold for $57.00 per hundredweight.



Some say cackling geese foretell rain.

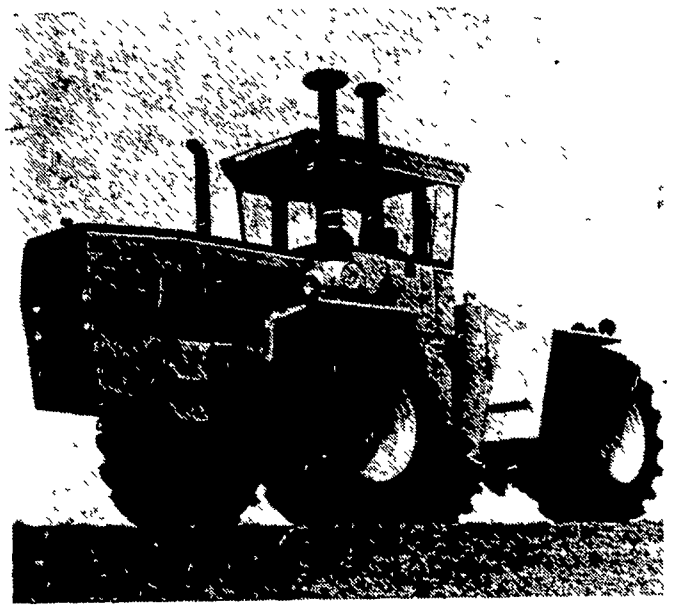
WHAT'S NEW



STEIGER WITH AUTOMATIC SHIFT

Steiger Tractor, Inc. has introduced a fully automatic transmission tractor to their current product line. The new model, designated Panther PTA is powered by a Cummins V-908 V8 engine either naturally aspirated or turbocharged.

The manufacturers estimated horsepower rating is 295. The Panther PTA is equipped with an Allison transmission capable of fully automatic shifting into four forward speeds. A torque converter in the transmission "locks up" in each gear automatically.

In addition, the Panther PTA is equipped with a two speed transfer case for a wide range of field and road working speeds.

Other features on the Panther PTA tractor include:

- Air conditioning and heater in cab
- Cab pressurized for dust control
- A fully adjustable Bostrum cloth seat
- A hydrostatically powered electronically controlled power take-off system (optional)
- no spin differential (optional)
- extra heavy duty dozer blade (optional)
- 132.5 inch wheel base.

HAY RAKE

P.J. Zweegers en Zonen, a leading Dutch manufacturer of farm equipment sold worldwide, has announced the introduction of its new Super Rake, the CZ-330, in the United States, thus expanding the company's line of rakes for the American farmer.

The super rake differs from conventional rakes in that it provides farmers with the option of raking 11 feet of cut crop into a windrow on a single pass, or raking 22 feet of crop by adding another 11 feet on the previously raked windrow.

The CZ-330 has a minimum of leaf loss because of low rotation speed and a unique tine attachment. The lower tines are designed to follow uneven ground by lifting when they hit an obstruction in the field. This avoids breaking of the tines and raking soil into the crop.

The CZ-330 is characterized by its clean raking and high working speed.

The CZ-330, as well as Zweegers' cyclomowers, conventional rakes and haybobs are available through local farm equipment dealers across the country or the company's U.S. distributors.

For more information please contact: J.S Woodhouse, Inc., Box 900, West Springfield, Mass 01089.

York County demonstration winners chosen

By JOYCE BUPP
Staff Correspondent

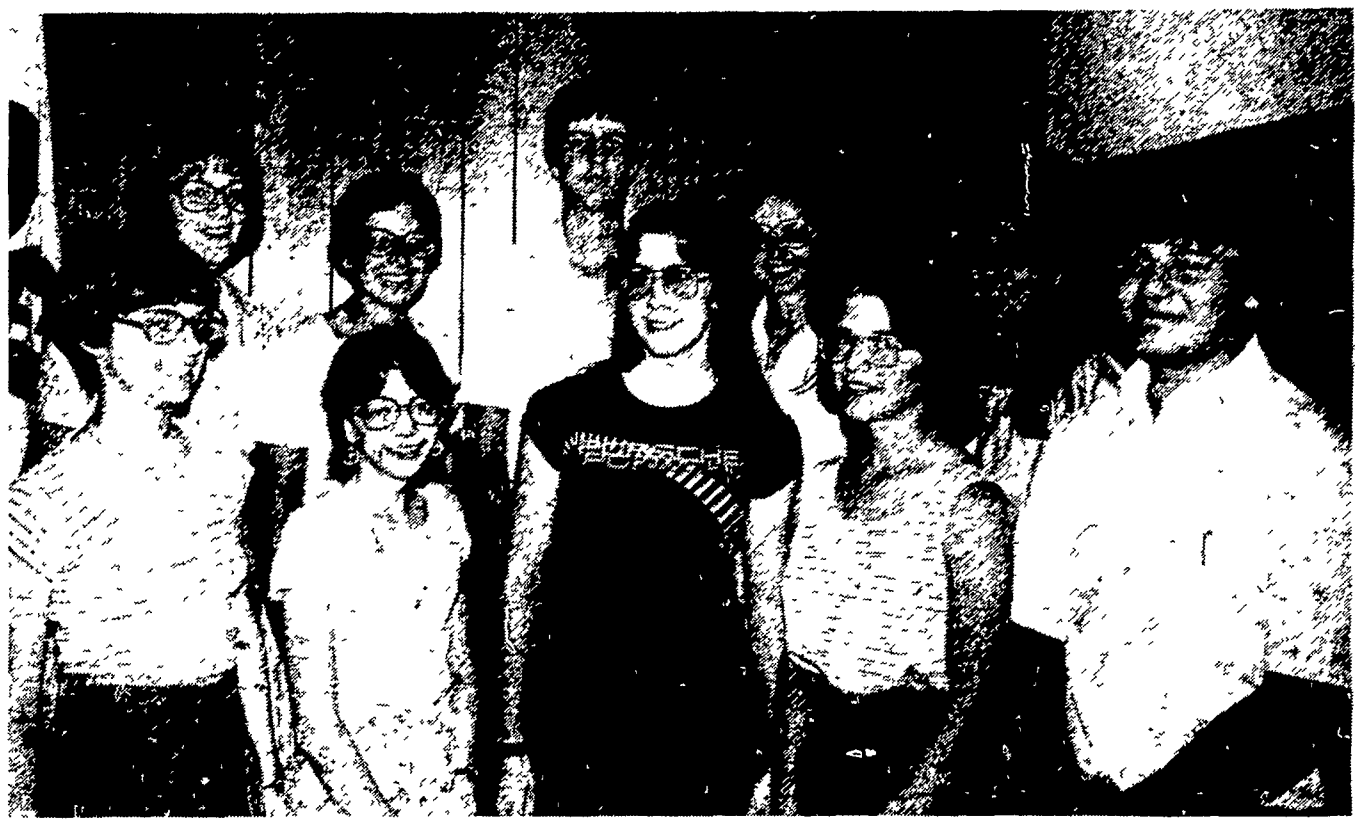
BAIR – Seventeen junior and senior 4-H'ers will represent York County at regional demonstrations on July 6. The county winners were selected during countywide competition last Saturday at the 4-H Center.

Christy Waltersdorff, Hollywood Drive, York, captured the top spot in senior public speaking with a well-prepared speech entitled, "I Pledge Myself To 4-H." She is the daughter of Mr. and Mrs. Robert Waltersdorff and has been active in 4-H programs for several years.

Junior public speaking category winner was Renee Lehman, the daughter of Mr. and Mrs. Rolla Lehman, Dillsburg R3. Her winning talk was titled, "What 4-H Can Do For You."

Others attending the regional competition are: Joyce Hemminger, Glen Rock R1, senior clothing category, "You Are What You Wear;" Rita Laughran, Dallastown R1, "Creating Corsages," and Laura Stabley, Loganville, "Roots," both senior winners in plant science; Angie Welch, Shrewsbury, junior plant science winner with "Gardening in Glass;" senior general category winners Bonnie Wire, Spring Grove R4, "Kidography,"

(Turn to Page 120)



Winners in the senior division of the York County demonstration contest included, front row from left: Bonnie Wire, Laura Stabley, Rita Loughran, Nancy Eisenhart and Joey Welsh; back from left are Brooke Palmer, Chris Itle, Bryan Palmer, Christy Waltersdorff and Kathy Rauhauser.

York County demonstration

Junior 4-H demonstration winners were, from left, Susan Eisenhart, Angie Welch, and Susan Janney.

(Continued from Page 119)

and Nancy Eisenhart, Thomasville R1; and junior general category winners Susan Janney, Brodbecks R1, "32 Reasons To Care," Susan Eisenhart, Thomasville R1, "Mail Call," and Michael Welsh, East Berlin R1, "Through The Pin Hole."

Also, in the engineering category were seniors Bryan Palmer, Shrewsbury, Joey Welsh, East Berlin R1, "Spot The Hazards," and Tommy Welsh, East Berlin R1, "A Wise Investment."

Brooke Palmer, Shrewsbury, will compete in the senior foods and nutrition category. Senior home and family management area will be represented by Christine Itle, Lewisberry R2, and Kathy Rauhauser, Dover, with "Operation Hobby: Ceramics."

Judges for the annual demonstration competition included Mrs. Harold Raubenstine, Mrs. Ann Janney, Dale Myers, Mrs Sharon Ebaugh, Russell Wire, Mrs. Pat Dobrosky, Mrs. Sandy Feeser and Mrs Vickie Rohrbaugh.

In the language of flowers, a bright pink peach blossom means "I am your captive."

6 co-op winners named

SHIPPENSBURG – Six outstanding boys and girls have been named winners in the Cooperative Business Education Program sponsored by the Lancaster Co-op Council and will represent Lancaster County at the Pennsylvania Association of Farmer Cooperatives Summer Institute at Shippensburg State College from July 9 to 12.

Those chosen to attend the institute are: Martha Gregory, Lititz R1; Maxine Messner, Leola; Duane Weber, Reinholds R2; Jeffrey DeLong, Peach Bottom R2; and Tony Eberly, Denver R2 first year scholars; and Daniel Witwer, East Earl R2, Agribusiness Explorer who will return to the institute for the second year.

Winners were selected on the basis of their knowledge of the business enterprise system in America, the cooperative way of doing business, and on activities of the participants identifying them with school, community, church, and youth organizations.

These young leaders will be accompanied to Shippensburg by Jay W. Irwin, county agent and Clifford Day, vocational agriculture instructor, Garden Spot High School, who will act as chaperone and resource persons for the delegation.

The Institute program is designed to teach youth more about the business enterprise system in the United States, to help in planning their future by pointing out career possibilities in agribusiness, and provide opportunities for individual leadership development.

Approximately 200 young adults, representing the best of 4000 participants in the annual P.A.F.C. youth education program, will attend the four-day event.

The Institute is a joint effort of the Pennsylvania Association of Farmer Cooperatives, local Co-op Councils, and the College of Agriculture of Penn State University.

A total of 60 local boys and girls took part in this year's cooperative program sponsored by the Lancaster Co-op Council.

BANVEL HERBICIDE

Post-emergence application gets to the root of your tough broadleaf weed problem

Banvel from Velsicol controls hard-to-kill broadleafs . . . smartweed, pigweed, morning glory, thistle, many others.

For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth. Ask us for application details about Banvel, today.

Wheat growers reminded of treated seed danger

EPHRATA – In the next few days and weeks, Pennsylvania's wheat growers will begin combining their crops and hauling them to nearby grain terminals and flour mills. Sometimes by design, often by accident, a tiny amount of treated seed wheat is mixed in with wheat destined for human or animal consumption.

"Every year, it seems, we do get a load or two of wheat that's been contaminated by seed wheat," notes Morris Brown, Jr., F. M. Brown's Sons, a Berks County flour miller. "If we find just one kernel of treated wheat in a load from a farm, we have to reject it. We try to remind all our growers every year to be careful not to bring us any treated grain."

Last year Brown served as chairman of the flour committee for PennAg Industries Association, a trade organization whose membership includes some 400 Pennsylvania agribusiness firms. While it is nowhere near a major problem for the state's wheat industry, Brown said treated seed is a persistent annoyance, both for farmers and mill owners.

Selling treated seed wheat as untreated wheat is against federal law. Seed wheat is coated with a very toxic mercury compound to protect it from damage by insects and fungus.

"We don't make any friends when we must reject a load of wheat because it's contaminated," Brown said. "But we cannot let seed wheat get into the food supply. And if an FDA inspector were to find a single kernel of seed wheat in any one of our silos, he'd reject the entire silo. Some of our silos hold 55,000 bushels of wheat."

Wheat growers are reminded not to mix treated seed wheat with that which will be combined in the upcoming months.

Mill owners throughout the state are constantly watchful of the wheat they buy. James Nolt, of C. O. Nolt & Son in Lancaster County's Bird-in-Hand, said he rarely finds any seed wheat mixed in with good grain, but they watch for it, nevertheless.

"It was more of a problem years ago when farmers stored more wheat on the farm," Nolt pointed out. "Today most of the wheat we buy from farmers comes right in from the combine in the field."

In Landisburg, Perry County, David Wentzel, president of H. R. Wentzel Sons, said they watch very closely, too. "All treated seed is a different color than normal grain," Wentzel said, "so it's easy to spot. We haven't had any seed wheat come in here in the past three or four years. If we do spot any, we make no bones at all about rejecting it."

Morris Brown said treated wheat gets into normal grain sometimes by design but often by accident. If some seed wheat happens to be lying on the bottom of a wagon or truck at harvest time, it could accidentally get mixed in with harvested grain.

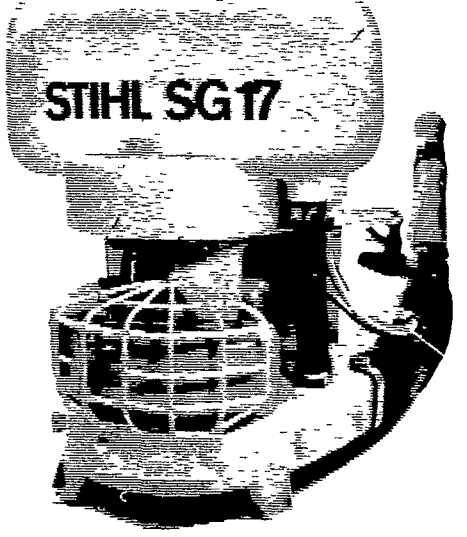
"Or a thoughtless grower, and they're very few indeed," Brown said, "might try to mix five or 10 bushels of treated seed into a load that he's hauling to the mill. In theory, this practice could net him a few extra dollars from oudated seed wheat he'd otherwise have to throw away. In fact, that practice will get his entire truckload rejected."

"We're fortunate that Pennsylvania wheat growers are honest and conscientious, or we'd have a lot more wheat rejected," Brown said. "But even though it's a minor problem, we have to be constantly on guard, for the farmers' sake, for our sake as mill owners and operators, and certainly for the sake of the consumers who eventually end up eating bread from the flour we produce."

STIHL®

It's a bargain when it's a Stihl.

Stihl® Model SG-17 Mistblower



One good Stihl deserves another. And when it comes to spraying, blowing, or dusting anything, the SG-17's got it covered. On top of that, it's lighter and more powerful than anything like it in the field. And it comes complete with all the engineering craftsmanship and know-how that goes into each and every piece of equipment Stihl makes.

So, if you'd like more information about the SG-17 and all of its attachments, or about other Stihl farm tools, ask your dealer.

DAIRY MONTH SPECIAL ON RED BARN COW MATS

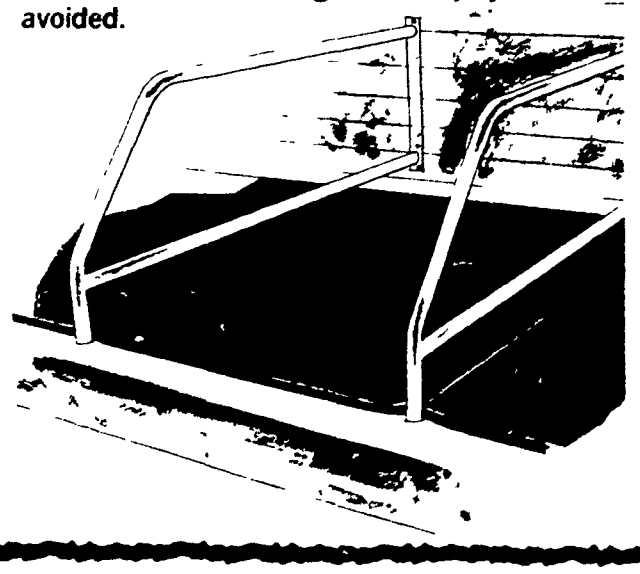
BUY 9 OF ANY SIZE MAT AND GET ONE FREE

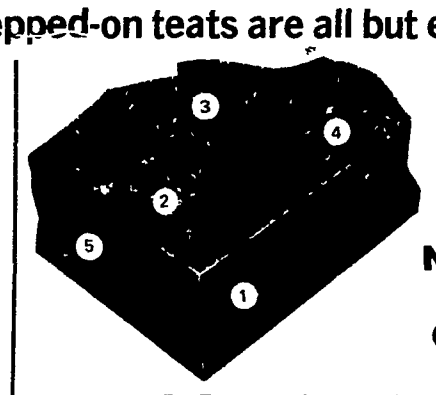
Why and How RED BARN Rubber Mats can reduce costs, cut injuries.

RED BARN floors are 100% vulcanized rubber. They were first manufactured and installed in 1968, and have proven their worth to dairymen ever since. Whether these mats are used in free stalls or stanchion barns, their non-slip qualities provide both comfort and safety for your herd. Dairymen everywhere report bedding cost reductions of 80% and more, and a dramatic decrease in clean-up time. Slips and falls that result in swollen hocks and stepped-on teats are all but eliminated.

LABOUR COSTS CUT DRAMATICALLY

RED BARN rubber flooring cuts free stall cleaning time to a minimum. One dairyman with 165 stalls averages only 15 minutes per day to keep ALL stalls clean (testimonial on request). Because RED BARN mats are tough, depressions cannot develop that require filling, as is often the case with other types of flooring. Broken dividers causing animal injury are also avoided.





NOTE THESE SPECIAL QUALITIES

1. RED BARN is the thickest mat there is, measuring over ¾".
2. Surface has a grained, pebbled texture for easy cleaning and non-slip qualities.
3. Surface is resilient for comfort, yet springs back to original form.
4. TOUGH. Each mat contains over 100 pounds of vulcanized rubber. NO WIRE, METAL OR CLOTH BONDING MATERIALS ARE USED.
5. RED BARN is non-absorbent.

RED BARN Soft, Tough Mats Save Costs & Protect Animals.

VANCO SALES CO.
Phone 717-776-3494
Ask For Van Hocker.

RED BARN rubber mats come in four standard sizes and will fit virtually any floor installation No adhesives are required the corners of each mat are fastened with cement nails or Ram-Set pins and washers The 100 pound weight of each mat does the rest Mats are easily cut and fitted — the only tools needed are a piece of chalk, a square and a utility knife To assure dry floors and good drainage, a slope of about 3 inches per 7½ feet is recommended

DETAILED INSTRUCTIONS FOR BOTH FREE STALL and STANCHION BARN INSTALLATIONS are AVAILABLE on REQUEST.

WE HAVE IN STOCK:

Pseudorabies vaccine licensed

WASHINGTON, D.C – The U.S. Department of Agriculture (USDA) has licensed the first killed-virus vaccine for protecting swine against pseudorabies, a viral disease that causes high mortality in young pigs.

The USDA license was granted to Salsbury Laboratories of Charles City, Iowa, after Department veterinarians determined that the vaccine met federal requirements for safety, purity, potency and effectiveness. Distribution will be limited to users approved by state animal health officials, and is subject to any additional conditions those officials may require.

Dr. Pierre A. Chaloux, depty administrator of USDA's Animal and Plant Health Inspection Service (APHIS), said the killed-virus vaccine is only the second product to become available for prevention of pseudorabies – also known as Aujeszky's disease or "mad itch." A year ago, USDA licensed the first modified-live-virus vaccine for pseudorabies, produced by Nordon Laboratories of Lincoln, Nebr.

APHIS officials caution swine producers to use the vaccine with care since pseudorabies antibodies in vaccinated swine produce blood test reactions identical to those from infected swine, and this could result in restrictions on the movement of vaccinated animals.

The USDA license provides use of the vaccine in swine only. Vaccination is recommended for newborn pigs over three days old if they are nursing non-immune sows. If piglets are nursing immume sows, however, vaccination should be delayed until maternal antibody levels have declined, generally when pigs are 3 to 8 weeks of age.

Revaccination is recommended twice a year for breeding animals – just before breeding for sows and at any time for boars. Immediate vaccination for all animals in a herd may be necessary in an emergency where there is an imminent threat of exposure to the disease.

4-H'er wins N.C. trip

BLOOMSBURG – Pammy Robbins, Bloomsburg, R4, Pennsylvania 4-H member, was recently named to receive an honor trip to the North Carolina 4-H Congress to be held in Raleigh, July 24 to 28.

She received the trip on the basis of her leadership and citizenship activities, reports Henry T. Moon, 4-H specialist at Penn State.

The North Carolina 4-H Congress is designed to increase leadership skills to further benefit the county 4-H program.

Pammy also will have an opportunity to meet with North Carolina delegates and share ideas on outstanding 4-H projects and programs.

She and another state 4-H member, Douglas Martin, Rochester R1, will take part in the conference.

Chickens susceptible to heat stress

DECATUR, Ind. — Poultry and egg producers can help head off Summer heat-related production slumps now by planning ways to keep both pullets and layers comfortable on extremely hot days.

"There are several hot weather management practices that will help keep birds cooler," says Dr. Stephen Hull, Master Mix poultry feeds director.

"The birds should have easy access to plenty of cool water. Layers will consume up to 25 per cent more water when temperatures hit 90 degrees or above. And protect water lines from direct sunlight," Dr. Hull says.

He says that since poultry do not sweat and their feathers restrict heat transfer, adequate air movement must be provided. Additional fans should be added as needed. Reducing bird density will help reduce bird-produced heat.

He also says that new types of evaporative cooling systems now available are effective in both low and high humidity areas.

"Ceiling insulation helps lower house temperatures. And roof sprinklers lower house temperatures without excessive water usage," he says.

The poultry specialist says feed intake for both layers and pullets decreases as temperature increases. Adjustments must be made in feeding programs to help maintain pullet weight gains and layer egg sizes and numbers.

Rations higher in non-calorie nutrient density must be fed to compensate for reduced consumption. "Know how much your hens are consuming and feed accordingly," Dr. Hull stresses.

He also recommends a representative sample of pullets be weighed to be sure the feeding program is doing the job. "If pullet weight gains are running low, the non-calorie nutrient density must be increased either through mixing or changing to a more dense feed."

He advises producers to adjust feeders accordingly and says the feed in these troughs should be stirred and kept fresh.

Winter wheat production down

HARRISBURG – Pennsylvania Secretary of Agriculture Kent D. Shelhamer recently said that Pennsylvania's 1978 winter wheat production is expected to lag last year's crop substantially.

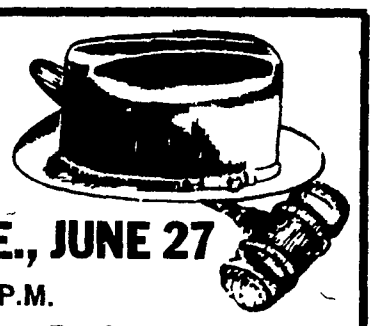
Shelhamer said a report released by the Department's Crop Reporting Service shows that based on conditions June 1, the state's Winter wheat crop is expected to produce 8,085,000 bushels. If realized, this will be nine per cent below last year and will be the second lowest production on record.

United States winter wheat production, forecast at 1.31 billion bushels, is up two per cent from the May 1, 1978 forecast but 14 per cent below the 1977 crop.

Spring potato prospects in the United States decreased to a record low production of 18 million cwt. (hundredweight), down nine per cent from the May 1 forecast and 21 per cent below last year.

PUBLIC AUCTION

HOUSEHOLD GOODS



TUESDAY EVE., JUNE 27

7:00 P.M.

Located along Penryn Road, next to Pleasant View Rest Home.

Examination of plants urged

HARRISBURG – State Agriculture Secretary Kent D. Shelhamer recently said that home gardeners and growers should be careful to examine cabbage seedlings for caterpillars when purchasing them.

According to the Agriculture Secretary, each Spring, millions of cabbage seedlings are imported into Pennsylvania for purchase. "In some instances, large shipments of these plants may contain small green caterpillars that feed on the leaves. It is also possible that the seedlings will contain eggs that will eventually hatch into caterpillars," he said.

He explained that these tiny eggs and caterpillars often escape detection when large numbers (usually millions) of these plants are being inspected for insects and disease.

If the plants are infested with caterpillars, control measures may be in order. "Ignoring such problems could lead to a loss of the plants or certainly decreased yields," Shelhamer noted.

When a small number of plants are purchased for home gardens, the caterpillars can often be picked off in a relatively short time and spraying may not be necessary. However, he noted, the plants should be examined on a periodic basis to detect any new infestations that may occur.

The Agriculture Secretary said that commercial growers may have to spray to combat the caterpillars because of the large quantities of plants. Use of the insecticides carbaryl (commonly known by its trade name Sevin), Dipel or malathion may be used for control measures.

Shelhamer reminded purchasers of pesticides to read the label before buying or using the material, and noted that the label directions should be followed accordingly.

Beef imports may reach record

WASHINGTON, D.C. – Beef imports are now expected to hit about 1.5 billion pounds for 1978, a record, say USDA officials The increase comes as a result of President Carter's decision last week to boost imports of fresh and frozen beef an additional 200 million pounds.

Beef imports in 1977 stood at 1.25 billion pounds, which compares with a previous record high amount imported in 1973 – 1.36 billion pounds. Imported beef, USDA says, represents about five per cent of U.S. beef consumption, and only 3½ per cent of total red meat consumption.

U.S. beef and veal production totaled 26.1 billion pounds last year, while consumption totaled 27.9 billion pounds. Over-all red meat output totaled 39.7 billion pounds, and consumption 41.4 billion pounds, says USDA.

Auto Service Tips

Whether manual or automatic your car s transmission fluid level should be checked periodically and changed at recommended mileages Trouble indicators include jerky acceleration, growling noises, or a whine" while driving Learn correct procedures for checking With automatic transmission, engine must be warm and running car parked on level ground

Grange observes dairy month

QUARRYVILLE – Fulton Grange 66 observed June Dairy Month Monday on June 12 at their hall in Oakryn by making 85 quarts of ice cream and serving it with luscious strawberries. This was also Lancaster County's Grange visitation meeting when Colerain, Salisbury, and Fulton Granges presented the program.

Introducing the program on the theme "Lancaster County's Contribution To The County, State and Nation", Fulton Grange's Lecturer, Mrs. William Rhoades, gave a history of early Lancaster County. Mrs. Richard Maule, Lecturer of Colerain Grange, assisted by Mrs. Melvin C. Boyce, at the piano, conducted a game "Musical Romance". Miss Helen Wanner, Lecturer of Salisbury Grange, conducted a quiz.

The Master, Edward L. Zug, conducted the business session when they took action on the following bills in the Pa. Legislature: They favored S.B. 736, Printers No. 1857, which would restrict insurance companies from cancelling, nonrenewing or refusing to write auto insurance based on accidents that are not the fault of the insured. It also provides protection for a policy holder whose agent has been terminated by the company.

They opposed S.B. 522, Printers No. 540, which would permit the Pa. Dept. of Transportation to acquire land in fee simple for transportation purposes. The bill would also permit the Secretary to sell the land if it is not required for highway purposes. The Grange also opposed Senate Bills 252 and 253 which would reduce the drinking age from 21 to 19 years of age.

Grangers were encouraged to participate in the various contests and to attend Leadership School at Elizabethtown College June 20, 21, and 22.

Glenn Hough, Fulton Grange, placing first in instrumental competition and best of show at the Pa. State Grange talent contest May 27 at Penn National State Fair, Grantville, received two trophies and a $50 Savings Bond.

The Fulton Grange youth committee is sponsoring a volleyball party July 7, 7 p.m. at the home of Mr. and Mrs. J. Everett Kreider.

The tour committee, Charles McSparran, chairman, is taking reservations now for a three-day bus tour to Niagara Falls, Hamilton, and Toronto in Ontario, Canada, and the Grand Canyon of Pa. on August 4, 5, and 6.

The agriculture committee will be in charge of the program at the next meeting June 26.

Feed values to be revised

LOGAN, Utah – For years, scientists have analyzed the nutritional values of livestock and poultry feeds in an effort to improve animal diets, boost production efficiency and help keep consumer food costs down. In the process, much of the data has become scattered in many sources, some of it lost.

Now, under a $33,000, 16-month cooperative agreement between Utah State University and the U.S. Department of Agriculture's Science and Education Administration (SEA), the nutritive values of about 500 animal feeds will be updated and revised.

Lorin E. Harris, an animal nutritionist at the university here, will conduct chemical evaluations and biological tests and compile data from published and unpublished sources. Dr. Harris will then computerize the information, incorporating it into feed rations that will meet nutritional requirements of different types of animals in the most economical and efficient means.

SEA animal scientists Melvin J. Anderson, also of Logan, will represent the department in the agreement and serve as a consultant.

COMPLETE MILKING HERD DISPERSAL

WILLIAM & JANE RANDOLPH, SR.
Moravia, NY

THURSDAY, JUNE 22
7:30 P.M.

EMERGENCY DAIRY DISPERSAL

CHARLES & ANNETTE HUIZINGA
R.D., Afton, NY

WEDNESDAY EVE., JUNE 21
7:30 P.M.

Due to the barn roof caving in Mr. & Mrs. Huizinga have commissioned us to sell their dairy at auction on their farm on Rt. 7, 22 miles East of Binghamton, 2½ miles West of Afton, 2½ miles East of Nineveh.

100 - HIGH GRADE HOLSTEINS - 100

This top Holstein dairy features 90 mature cows of which 20 are fresh, 55 are due to freshen from July to December, balance in all stages. 10 large Holstein heifers all handling or springing. This dairy is presently producing 2 tons of milk per day and last year sent 1,600,000 lbs. of milk to the creamery. You will find a top dairy here with size, udders, and youth. Many cows milking 80-100 lbs. per day. A top dairy with many many fall freshening cows. Necessary cattle bed examined for pregnancy. This dairy has been blood tested for Brucellosis & TB tested & are eligible for immediate interstate shipment.

P.S. - Don't forget Wed. Evening, June 21, 7:30 P.M. A real opportunity to purchase those right kind of replacements. One of the best dairies to be sold this year & would not be for sale if not for the barn roof caving in.

USSR buys
13 million tons grain

WASHINGTON, D.C. – Soviet officials confirmed for U.S. delegates to the U.S.-USSR Grain Agreement consultation in Moscow May 15 that they had bought about 13 million tons of U.S. grain thus far for shipment in the current year of the agreement.

They indicated that grain shipments from the U.S. by the end of April totaled about 8 million tons, about 1.1 million behind schedule. They said shipments of about 3.1 million tons would be required in May to make up the deficit.

The U.S. group was advised that purchases for shipment in the current agreement year, which ends Sept. 30, may not yet be completed and that further purchases could still be made in June, or perhaps even as late as July.

Dr. Dale E. Hathaway, Assistant Secretary of Agriculture for International Affairs and Commodity programs, headed the U.S. delegation. Boris Gordeyev, Soviet Deputy Minister of Foreign Trade, led the Soviet group.

The Grains Agreement, signed in 1975, requres semi-annual consulations. Under terms of the agreement, the Soviet Union is committed to buy at least 6 million tons of U.S. wheat and corn yearly. The agreement also commits the two countries to consult before purchases for shipment in any single year of the agreement exceed 8 million tons. However, at the consultation in Washington last October, the Soviets were invited to buy up to 15 million tons in the current year without further consultation.

Department of Agriculture figures show Soviet purchases of 13.1 million tons of U.S. wheat and corn had been reported as of May 19 for delivery during October-September. Shipments for the year as of May 19 were reported at 8.7 million tons.

This is the second year of operation for the 5-year agreement.

Less wheat foreseen

WASHINGTON, D.C. – The United States Department of Agriculture now predicts Winter wheat production to be 1.31 billion bushels, up two per cent from the May 1 forecast. If correct, it'll be 14 per cent below the harvested 1977 crop, and the lowest since 1973.

A breakdown shows production in Kansas to be down six per cent, Oklahoma down 17 per cent, Nebraska down four per cent, and Texas down 50 per cent.

But, output in Montana is seen as being up by 22 per cent, and Washington is up 27 per cent. The eight states account for 80 per cent of U.S. Winter wheat production.

Ag exports

(Continued from Page 95)

the single most important country to import U.S. farm products, he noted. Commodities exported in order of importance are feed grains, oil seed and oil seed products, and livestock products.

The Holstein-Friesian official said that 54,000 dairy cows were exported last year, valued at $40 million. Dairy bull semen exports amounted to $9.6 million over the same period of time.

"It isn't the dollar value of animals exported that is important to the individual dairyman," Rumler pointed out. "These exports provide a base for U.S. dairymen to benefit in increased value domestically."

This livestock export effort has increased the net worth of U.S. dairymen by almost $1 billion. And, it helps livestock enterprises in other countries by improving production efficiency.

Rumler, a 1936 Penn State graduate with a major in dairy science, represents agricultural interests on many national and international advisory groups.

In 1974, he was appointed to the US/USSR Joint Commission of Agricultural Cooperation as the only member representing the private sector.

FFA officers elected

The Chester-Delaware County FFA had its election of officers for the 78-79 school year. Held at the Octorara High School, the following people received offices: President, Daryl Schafer, Owen J. Roberts; vice-president, Duane Hershey, Octorara; secretary, Renee McCardell, Oxford; treasurer, Chester Soltys, Owen J. Roberts; reporter, Peter Scallan, Oxford; chaplain, Louis Dolenti, Owen J. Roberts; sentinel, Dave Lantz, Octorara; and student advisor, Dave Wylie, Oxford.

They also had a number of candidates receive the county degree, and approved the delegates to the State Convention on June 13, 14, and 15 and the National Convention in November.

Those that received the county degree included: Donald Maser, Octorara; Jeff Stolzfus, Octorara; Andy Blank, Octorara; Renee McCardell, Oxford; Peter Scallan, Oxford; David Wylie, Oxford; Alan Mason, Oxford; William Summer, Oxford; Mike Coomes, Oxford; Daniel Hamm, Oxford; Matt Brimmeir, Oxford; Dale Davis, Oxford; Chester Soltys, Owen J. Roberts; and Louis Dolenti, Owen J. Roberts.

LMA pres. says deregulation coming

FRESNO, Calif. – The U.S. Department of Agriculture's proposal to force all livestock marketing businesses to charge for their services solely on a per-head basis and otherwise tighten its authority over rates and charges will be "thrown out in favor of a plan for deregulation of rates and charges," the president of Livestock Marketing Association predicted recently.

"While we are far from home on the rate policy issue," Loran Casey told the California Livestock Markets and Dealers Association, "I think we can agree that things are now moving in that direction."

If the proposal is discarded, Casey said, "It will be because of (an) unprecedented example of industry response and cooperation in voicing its opposition." Casey cited "the score upon score of letters from marketmen to the USDA hearing clerk, strongly opposing the proposal."

Casey quoted excerpts from copies of letters on file with USDA from marketmen across the country who oppose the proposal. "Those letters, without question, were written by people who have had enough government ... and by people who are also plenty mad," he said.

The Sidney, Mont., marketing businessman told his audience on June 4 that the need for deregulation of livestock marketing goes "far beyond the single issue of rate policy. While marketmen are deeply concerned about the direct economic impact of the rate proposal on their businesses, they ... are equally fearful of the growing presence of government in their lives and their businesses."

The rate policy proposal, which was opposed almost unanimously by witnesses at public hearings in seven cities earlier this year "is a classic example of the kind of detached and arbitrary administration that is inherent in the bureaucracy of regulation.

"In other words," Casey continued, "even under the most well conceived regulation, the risk of abuse by those responsible for enforcing the regulation – whether intentional or simply out of ignorance, incompetence or oversight – is constantly present."

The removal of that risk is one of the key goals of the trade group's "Freedom in Livestock Marketing" campaign that calls for total deregulation of livestock marketing, he noted.

"Even with a successful settlement of the rate policy matter we still have a long way to go as an industry before we can truly run our businesses, without dealing with the federal government as a senior partner. To accomplish that, we will have to maintain the same spirit of involvement, cooperation and determination that brought forth the outpouring of reaction from marketmen on the rate issue," he said.

Summer lunch tips given

SOUTHAMPTON -- Summer's arrival means a welcome change of lifestyle for most of us.

For school-age youngsters, it means more time out-of-doors and a wider choice to things to do. For the family mealplanner, it means some readjustments, too. For instance, if the children have been receiving lunch through the school lunch program, it means picking up where the program left off.

According to Dairy Council Inc., Southampton, Pa., the school lunch program is set up to provide about one-third of the Recommended Daily Dietary Allowances for children in this country. It includes 8 oz. of milk, meat or other protein food, two or more servings of fruits and vegetables, and a grain food such as enriched bread.

"Serving your child an equivalent lunch may seem a tall order," says Dairy Council Nutrition Director Terry Heller, "but it needn't be a problem."

Providing the milk, she explains, is a simple matter of filling a glass or offering cheese or ice cream instead. Lunch meat in an enriched bread sandwich provides the protein and grain nutrients. By adding carrot sticks and an apple, one has a lunch that packs the power youngsters need for Summer fun, and for growing bodies, too.

"There is nothing really difficult about nutrition–Summertime or any other time," says Mrs. Heller. "Just remember to provide the family with ample servings from each of the food groups: milk, meat, grain, fruit and vegetables."

A. Diffenbach's Auctioneers conducted the sale.

xxx

A Public Sale of a 55 acre farm and brood sows was held June 6 by Mae Barrow, in London Grove Twp., Chester Co., Pa.

The 55 acre farm was purchased by a neighbor for $125,000 and included a 2½ story brick colonial & part frame house, farrowing house and nursery and gestation building.

The 100 brood sows ranged in price from $350 to $460.

Sale handled by Elton & Alvin Horning Auctioneers.

xxx

A Public Sale of household goods was held June 8 by Sam Rhiel and Fred Rissel at the intersection of Route 10 and Route 340 at Compass, Pa.

Items sold included: old Railroad Switch Lamp $60, Breakfast Set $110, Depression Glass Pieces $50 to $65 ea., Cottage Dresser $70 and 4 ladder back chairs $40 each.

Auctioneers were Leroy Zook and Leon Kurtz.

Milk production up 4 per cent

HARRISBURG – State Agriculture Secretary Kent Shelhamer recently reported that milk production in Pennsylvania during the first quarter of 1978 totaled 1,888 million pounds, or 878,140,000 quarts.

Quoting a special dairy report published by the Pennsylvania Crop Reporting Service, Shelhamer noted, "This is two per cent more than the corresponding period a year ago and six per cent more than in 1976. The average production per cow was 897 pounds or 417 quarts, up nearly three per cent from a year ago."

The number of milk cows in Pennsylvania averaged 702,000 head in the first quarter, down 2,000 from the first quarter of 1977.

Wholesale milk prices reported by dairymen for the first three months of 1978 averaged four per cent higher than in the same period of 1977. The March 1978 average blend price of $10.33 per cwt. is down seven cents from the previous month, but 52 cents above March 1977.

"In terms more familiar to the consumer," Shelhamer said, "the amount the farmers received in March of this year selling milk to the wholesaler comes to 22.2 cents per quart. This figure is 1.1 cents per quart more than in March 1977 but 0.1 cents less per quart than they received in March 1976."

Production costs for Pennsylvania dairymen for the first quarter of the year averaged $10.03 per cwt. or 21.5 cents per quart, according to the report. This reflects a profit of 0.7 cents on each quart of milk produced.

Production costs for dairymen were 23 cents more per hundredweight than last December and 69 cents more, or 1.5 cents per quart, than in March of 1977

Shelhamer said that machinery, labor, farm real estate values, taxes and hay prices contributed the most to the production cost increase. In addition, the index of prices paid for building and fencing material increased about eight per cent over the last year.

"Let us never forget that the cultivation of the earth is the most important labor of man.

PUBLIC SALE

FRIDAY EVE., JUNE 23

At 5 P.M.

Located in Path Valley Picnic woods on Route 75, 4½ miles north of Exit 14 on the Pennsylvania Turnpike.

INTRODUCING:

NEW . . . UNIQUE!

PURIDINE™

(Patent pending)

- No other product available can be used for **both** teat dipping and udder washing.
- One percent iodophor. Highly effective against spread of organisms which may cause mastitis.
- Controlled viscosity provides better control of mastitis-producing organisms.

- Emollients help keep teats soft, reduce chapping and irritation.
- Controlled PH (4.0 to 4.4) helps prevent irritation.
- Convenient sizes for either small or large herds.

The only combination teat dip and udder wash in America.

Cash Rebates Up To $20.00

PURIDINE REBATE SCHEDULE:

$2.00 rebate per 2½-gal. jug
$4.00 rebate per case (2-2½-gal. jugs)
$20.00 rebate per 30-gal. drum

Also companion cash rebates on New Purina Dairy Cleaner
$1.00 rebate per 25 lbs
$3 00 rebate per 100 lbs
$5.00 rebate per 150 lbs.

Offer expires Dec 31 1978
